

CIA snow job cools Amerika

Nixon says that we've got to stop the smack from flowing into this country from Turkey and Mexico, but this is not where most of the dope is coming from.

About 80% of the world's heroin comes from S.E. Asia now, according to the UN Commission on Drugs, the International Policing Agency (Interpol) and high officials in the narcotics control division of Canada. In 1966 Interpol told the UN that 83% of the world's opium (which is made into heroin) comes from the Fertile Triangle, the area controlled by the U. S. Supplied Mao tribes of Laos.

For the people that live in the Fertile Triangle, opium is their only cash crop. They get \$50 a kilo in Laos. A kilo is worth \$2000 in San Francisco. Most of this dope is made into heroin and sent to the U.S.

The Mao are trained and sup-

plied by the U.S. and used as mercenary soldiers in the war against Communism. The "Far Eastern Economic Review" tells of a Mao mountain city called Long Cheng. Long Cheng is a military base built by the U.S. in 1962. By 1964, Long Cheng's population was almost 50,000, made up largely of refugees who had come to escape the war in Laos, and, who are kept busy growing opium. Carl Strock reported in the January 30 "Far Eastern Economic Review": "Over the years eight journalists, including myself, have slipped into Long Cheng and have seen American crews loading T-28 bombers while armed CIA agents chatted with uniformed Thai soldiers and piles of raw opium stood for sale in the market." The CIA not only protects the opium in Long Cheng and various other pick-up points, but also gives clearance and protection to opium-laden aircraft

flying out.

Most of the dope from S.E. Asia is flown out in U.S. planes by U.S.-supported smugglers. The U.S. backed South Vietnamese vice-president Ky are major drug transporters. But one of the biggest dope smugglers is a company called Air America -- supposedly a privately owned American airline. Air America's main contract is with the CIA and its main purpose is to fly opium from S.E. Asia by various routes into the U.S. It is odd (and impossible) that the U.S. government with the most massive intelligence network in history could miss this business.

To make it clear, the CIA, with its puppets and allies, is the greatest junk dealer in history. They're the big-daddy of a \$250-500 million a year industry which is living off the misery of the S.E. Asian people and addicts around the world.
