USCINCEUR's Revised UW Requirements dated
9 December 1960

1. All of the USCINCEUR revised UW Requirements as listed in Reference A are accepted by SR/DOB. At the present time, the AEDEPOT Program has a cadre of 54 trained assets who have been slotted against 22 of the 27 targets. Furthermore, in view of the anticipated 20-30 additional assets to be trained during 1961, we have accepted the remaining 5 targets on a programmed basis. We would like to call your attention to the fact that of the 22 "ready" targets, 12 have a team coverage and 10 have a singleton coverage. It is also anticipated that a number of the latter targets will have a team coverage by the end of the 1961 calendar year.

2. Although AEDEPOT assets have been slotted against the targets and team groupings have been formulated, it should be understood that this is a tentative slotting and subject to change. The primary purpose is to show immediate availability of assets. As the AEDEPOT cadre begins to receive its advanced training along ethnic lines, it is anticipated that a much clearer picture of potential teams will begin to emerge.
