13 MAY 1957

Review of Project AEMARSH SR/Latvian SSR

1. Production and Evaluation

Project AEMARSH has produced 17 disseminations since June 1955. These reports included Latvian ports, airfield and military training information; information on living conditions, possible unrest, and coastal security controls; Soviet air activity over Latvia; and other subjects of military interest. Four relatively detailed reports on military installations in Lepaya, on its harbor defenses, ship machine-building plant, and port activities were evaluated by customers as being of value or of considerable value, and commented upon favorably.

2. Rating of Production: B

3. Requirements

Nine AEMARSH disseminations referenced customer requirements. Continued guidance is available in Navy briefing dossiers for Latvian ports, in specific customer requirements for the area and in IPC targets listed for the USSR.

4. Recommendation

Renewal is recommended.
