SECURITY INFORMATION

1953

MEMORANDUM FOR: Secretary of The Project Review Committee

SUBJECT: Project AERODYNAMIC/PBCRUET

1. Project AERODYNAMIC embraces those activities of the SR Division targeted at the Ukraine. In effect, it is a sub-program for this area. The NSC 10/2 portion of AERODYNAMIC for FY '53 was approved by DCI on 30 January '53 in the amount of \$115,900. Now compartmented into sub-project form as PBCRUET, I have this date approved the NSC 10/2 portion in the reduced amount of \$95,900.00 for FY '53, subject to the following conditions:

- a. That an Administrative Plan covering those aspects which cannot be accomodated by existing Confidential Funds Regulations be completed on a priority basis (This condition was not included in the original approval.);
- b. That the "Ukranian Information Bureau" proposed in Para. 3 (1) of the Project Outline be re-submitted, prior to further implementation, as a separate annex containing fuller elaboration;
- c. That it be understood, in accordance with the PRC action on 13 January 1952, that the physical establishment of a "Cadre School" (see Para. 4 d. of Project Outline) is not within the authority granted herein, though not to preclude further exploratory activity and the assessment of potential students.

2. Though I concur in the desirability of conducting the many activities proposed in the Project Outline, it presents a rather ambitious prospectus; and, accordingly, I have cautioned the SR Division against dissipating its efforts and undertaking activities beyond its capability to support.
