in view of their common interest in painting. Others of special interest are the subjects of paragraphs 4e, 4g and 4c. The remainder we are less able to evaluate. It is suggested that in his re-debriefing of Source, ASCASSONARY/29 ask her which of her friends and acquaintances would be must likely to respond to a call for action on behalf of the Ukraine and against the Soviet regime, as well as to which ones she might agree to pen a letter of introduction to be used by some trusted visitor from the West in the future. All information which Source has on these people should be drawn from her. We are most interested in any suggestions or plans either FOB or Stockholm might have with regard to operational follow-up on any of these operational leads. ARCASSONARY/15 is currently mounting a REDSKIN operation, the primary mission of which will be inter-nal contact. (Gathering of PI will be secondary.) Several other travellers are being lined up to follow during the summer. If source's lands are substantial enough, we might consider building contact with one or more of these leads into these operations. It is requested that the field design its REDEKIN operations with the same contact possibilities in mind. We would like to strive for an eventual operational collaboration in which Headquarters and field ARCASSONARY/1. REDSKIN operations are closely coordinated, with travellars from both areas participating in various aspects of the same internal contact operations where appropriate. Such a collaboration would provide us with highly desirable flaxibility in our timing and approach. The areas in which we currently have potential internal recruits is loov (or Lviv, as Ukrainians prefer). This is not surprising, as low continues to be the Mecca of Ukrainian nationalism and many Western Ukrainians have friends and family there.
