Review of Project AENOBLE SR/Headquarters

1. Production and Evaluation

AENOBLE produced 21 positive information disseminations during the twelve months - 1 July 1956 through June 1957. These reports concerned information of military interest in the Ukraine and in the Bryansk, Orel, Voronezh, and Pskov Oblasts of the European USSR plus five disseminations of information on general public reaction to political events and to the de-Stalinization campaign. Military reports included jet bomber descriptive information and markings, information on military units and personnel, airfields, and air raid drills in Soviet factories. This latter subject was rated of considerable value and of continuing interest by the Air Force while jet bomber descriptive information and markings filled a priority ORR information need and were considered of value by the Air Force.

2. Rating of Production: B

3. Requirements

Guidance for AENOBLE in the collection of intelligence information exists in specific customer requirements and in targets listed by the IPC for the USSR.

4. Recommendation

Renewal is recommended.
