After-Action Report

Class # 17-02 (b)(3) CIA Special Services Branch Canine Unit (b)(3) July 31 – November 17, 2017 (b)(3) Background – The foundation for the course was a based on classical conditioning paired with a food reward methodology and a passive final response that is indicated by the dog through a change in behavior when exposed to an explosives odor. (b)(3) (b)(3) (b)(3) (b)(3)

Purpose/Objectives – The purpose of this course is to train canines that can safely and effectively conduct a basic detection search of luggage, mail, post blast scenes, vehicles, buildings, and open areas for explosives and weapons.

The objective of this course is to develop a new student and canine into an effective team while emphasizing to the handler to think on his/her own, and to work independently. The student is taught how to evaluate a situation that requires an explosive detection capability and correctly employ his/her team for maximum effectiveness while understanding the team's limitations.

(b)(3)

Prior to departing the CIA Canine Training Center, the student has a working knowledge of how to conduct effective explosives and scent discrimination training, and is taught how to maintain their assigned canine in the optimal physical condition at all times.

Attendance - 1 Frederick County Fire Marshall, 1 Fairfax County Police Officer and CIA Police Officers

(b)(3)

Summary of Evaluations – Members of the class rated the course as follows: 2 - 5 "highly satisfied", 3 – 4 "More than satisfied". 4.4 Average

Instruction Quality- The instructors were rated very high on their overall knowledge and delivery of the course. 3 - 5's, 2-4's. Average of 4.6

Customer Satisfaction Data – A copy of the Student Critiques has been forwarded to the Chief, CIA Security Protective Service for review.

Training Assessment – The One dog from Puppies Behind Bars and five dogs from Susquehanna Service dogs with the five handlers that were paired with them performed very well (see below on the sixth). All the dogs are very confident and show no signs of anxiety in any environment and grew in confidence as the weeks went on. The teams graduated class with all the necessary training to prepare them for work in the field. We are confident that the five dogs and handlers will have long careers as strong successful teams.

**Canine Lulu (From Susquehanna Service Dogs) was dropped from the Class on August 27, 2017 due to her reluctance to work. K9 Heron, aka "Harry" was selected and began on August 28, 2017. K9 Suni was dropped from the program during week 6 of class, October 16, 2017. Due to the teams "incompatibility" it was in the dog's and Handler's best interest to not continue training. The Handler will attend the spring 2018 class.

Proposed Changes – More field searches and weekends off after the second week.

(b)(3)

Exercises Performed: Intro to Sniffer Tins, Intro to Quarts, Intro to Gallons, Intro to "seek." (All exercises performed in booth), Saturday – Intro to Line discrimination and "seek"

Trainer's note:

A great 1st week. Each dog was beginning to show a change of behavior (COB) on the cans. Each dog will sniff them and either double tap it or look straight at the trainer for their reward. We didn't have to work through any serious issues and don't have any concerns with any of the dogs. The more we do exercise's the more confidence they will show. This class of dogs is a fun group and look forward exposing them to new things.

Thursday 8/24

|                                                                                        | (1) (2)    |
|----------------------------------------------------------------------------------------|------------|
| and I were in the booth as Mike and Lulu began working. Lulu                           | (b)(3)     |
| was reluctant at first but began imprinting.                                           |            |
| She worked at first but began skimming and not searching the negative cans             |            |
| and only sitting at the hots. On the 2 <sup>nd</sup> circle                            |            |
| Lulu was barley searching the hot can and would skim any other can to get to           |            |
| the hot can then would sit without sitting. She                                        |            |
| was put up after about 12-15 hits.                                                     |            |
| Lulu refused to work cans at all for Mike this session. Trainer had                    | (b)(3)     |
| Mike play with Lulu on the floor for a few                                             |            |
| minutes in which she was very play full and energetic. I instructed Mike to            |            |
| begin working the pallet exercise. Lulu                                                |            |
| worked pallets but did so with hesitation. Mike then worked the seam wall              |            |
| with Lulu, again did so with hesitation. She did                                       |            |
| show that she has great OR. Was put up early and Mike was advised to                   |            |
| schedule a vet appointment so Lulu could be                                            |            |
| evaluated. I advised Trainer of the situation, he advised us to take                   |            |
| out of the circles and suggested                                                       | (b)(3)     |
| switching her food. Pulled the from the can circle then let Mike try to                | (b)(3      |
| work Lulu. She refused to work on cans, worked                                         | (b)(3)     |
| a few blocks then gave up on blocks. I began working her on cans, which she            |            |
| did but with some hesitation. On the 2 <sup>nd</sup> circle                            |            |
| I began having Mike reward her. On the 4 <sup>th</sup> hot can I then passed the leash |            |
| off to Mike and began working her, she veered                                          |            |
| off to the side and refused to work again. He tried a few more times with no           |            |
| success then was put up.                                                               |            |
| Vet appointment at 1400.                                                               | · •        |
| Lulu's vet appt came back perfect, there is absolutely nothing wrong with              |            |
| Lulu. This concerns me because her drive has gotten                                    |            |
| worse each of the last 4 days. I will advise FXCO and Trainer                          | (b)(3)     |
|                                                                                        | ( · /( - / |

(b)(3)

| Fillay 8/23                                                                          | • .    |
|--------------------------------------------------------------------------------------|--------|
| Today's plan: Work Lulu in short increments, 4-5 hits on a positive note and         |        |
| upbeat on any exercise. 1 <sup>st</sup> session Lulu                                 |        |
| worked the seam wall sitting 2-3 times before getting to a hot. Was put up           |        |
| after the 4 <sup>th</sup> hit on a positive note but was                             |        |
| merely guessing. 2 <sup>nd</sup> session, Mike went over to work the block wall, she |        |
| wanted no part of the wall but ended up working the                                  |        |
| block U on her own. When Mike began presenting the holes in the block U Lulu         |        |
| wanted no part of it and even began searching                                        |        |
| backwards on her own. I had a meeting with all 4 trainers discussing the             |        |
| matter advised us to go back                                                         | (b)(3) |
| into the imprinting booth and start from scratch where she had good                  |        |
| memories, then try to come out and work. Lulu sniffed the                            |        |
| sniffer tin on her own, then sniffed the quart can when Mike presented it.           |        |
| Lulu did fine in the booth so we came out to the                                     |        |
| closest can circle. Lulu searched all 15 cans, but at a very slow pace. Mike         |        |
| was instructed to lessen his praise posture                                          |        |
| and reward heavy. 20 mins later Lulu was brought back out and started again          | -      |
| in the imprint booth. We prepared 1 and 1                                            | (b)(3  |
|                                                                                      | (~)(•  |

| DOG  | TRAINER'S OBSERVATION COMMENTS                                                                                                | Total<br>#REP | (b)(6) |
| Lulu | Today 2 <sup>nd</sup> session, handler Mike was working Lulu. When he was imprinting on (under my supervision),               |               | (b)(3) |
|      | Lulu gave a reaction that's common with She<br>pulled her head out of the can very fast. When he represented                  |               | (b)(3) |
|      | the can she was hesitant on going back in the can but did reluctantly. When Mike went to the next can wheel she refused       |               |        |
|      | to work. I instructed to use higher praise, try quickly moving into a different circle and inside the circle, but all         |               | (b)(3) |
|      | Lulu would do is sit facing away from him. I grabbed the leash from Mike and Lulu worked just fine for me. I gave the         |               |        |
|      | leash back to Mike, hoping she would transition, to no avail<br>Lulu was put up. 3 <sup>rd</sup> session, Trainer worked      |               | (b)(3) |
|      | with Mike and Lulu but got the same result had Mike use<br>a different tone for Lulu, all she would do is face away<br>again. |               | (b)(3) |
|      | She was put up for the day with the hopes that she will come out Wednesday (23 <sup>rd</sup> ) AM and work for Mike.          |               |        |
|      |                                                                                                                               |               |        |
|      |                                                                                                                               |               |        |
|      |                                                                                                                               |               |        |

| Lulu                                   | I had Mike start on the can circles 1 <sup>st</sup> Session today. Lulu | 1        |
|                                        | again refused to work for Mike. I moved back out of Lulu's              |          |
|                                        | line of sight and instructed Mike to go over to the block wall          |          |
|                                        | and go right to a hot. She searched that block and sat. When            |          |
|                                        | Mike continued to work the block wall Lulu again shut down and          | 1        |
|                                        | refused to search. She was put up again, after only a few               |          |
|                                        | reps. brought her out during the break to imprint her on                |          |
|                                        | the 4 new odors today then put her up. Going forward Mike has           |          |
|                                        | to be the only one who works her (minus imprinting) since she           |          |
|                                        | is refusing to work for him but working for and I.                      |          |
| 2 <sup>nd</sup>                        | and I stood off the floor under the roll door hoping our                |          |
| Session                                | presents would help her focus with Mike. Mike brought her out           |          |
|                                        | and searched only a couple cans then again walked away from             |          |
|                                        | him and faced away. When she saw us under the roll door she             |          |
|                                        | ran away from Mike and up to us. She was put in the kennel              |          |
|                                        | awaiting 3 <sup>rd</sup> session.                                       |          |
|                                        |                                                                         |          |
| 3 <sup>rd</sup>                        | We closed the roll door, and I stood in the imprint                     |          |
| Session                                | booths and watched where Lulu couldn't see us. She was                  |          |
| ······································ | reluctant at first but began working for Mike and sitting at            |          |
|                                        | source. She would flinch at hots and occasionally when Mike             |          |
|                                        | praised her. Tomorrow AM we will start with the same thing.             |          |

| Lulu                       |                                                                                                                                                                                                                                                        |               |                  |
| 1 <sup>st</sup><br>Session | and I were in the booth as Mike and Lulu began working. Lulu was reluctant at first but began imprinting.                                                                                                                                              |               | (b)(3)           |
|                            | She worked at first but began skimming and not searching the negative cans and only sitting at the hots. On the $2^{nd}$ circle                                                                                                                        |               |                  |
|                            | Lulu was barley searching the hot can and would skim any other<br>can to get to the hot can then would sit without sitting. She<br>was put up after about 12-15 hits.                                                                                  |               |                  |
| 2 <sup>nd</sup><br>Session | Lulu refused to work cans at all for Mike this session.<br>Trainer had Mike play with Lulu on the floor for a few                                                                                                                                      |               | (b)(3)           |
|                            | minutes in which she was very play full and energetic. I<br>instructed Mike to begin working the pallet exercise. Lulu<br>worked pallets but did so with hesitation. Mike then worked<br>the scam wall with Lulu again did so with hesitation. Che did |               |                  |
|                            | the seam wall with Lulu, again did so with hesitation. She did<br>show that she has great OR. Was put up early and Mike was<br>advised to schedule a vet appointment so Lulu could be                                                                  |               |                  |
| -rd                        | evaluated. I advised Trainer of the situation, he<br>advised us to take out of the circles and suggested                                                                                                                                               |               | (b)(3)           |
| 3 <sup>rd</sup><br>session | switching her food. Pulled the from the can circle then<br>let Mike try to work Lulu. She refused to work on cans, worked                                                                                                                              |               | (b)(3)           |
|                            | a few blocks then gave up on blocks. I began working her on cans, which she did but with some hesitation. On the $2^{nd}$ circle                                                                                                                       |               |                  |
|                            | I began having Mike reward her. On the 4 <sup>th</sup> hot can I then passed the leash off to Mike and began working her, she veered                                                                                                                   |               | -                |
|                            | off to the side and refused to work again. He tried a few more<br>times with no success then was put up.                                                                                                                                               |               |                  |
|                            | Vet appointment at 1400.                                                                                                                                                                                                                               |               |                  |
|                            | Lulu's vet appt came back perfect, there is absolutely nothing wrong with Lulu. This concerns me because her drive has gotten                                                                                                                          |               |                  |
|                            | worse each of the last 4 days. I will advise FXCO<br>and Trainer and work out a plan for Friday.                                                                                                                                                       |               | (b)(3)<br>(b)(3) |
|                            |                                                                                                                                                                                                                                                        |               |                  |
|                            |                                                                                                                                                                                                                                                        |               |                  |

| DOG     | TRAINER'S OBSERVATION COMMENTS                                             | Total | , I              |
|         |                                                                            | #REP  | 1                |
|         |                                                                            |       | l I              |
| Lulu    | Today's plan: Work Lulu in short increments, 4-5 hits on a                 |       | I                |
|         | positive note and upbeat on any exercise. 1 <sup>st</sup> session Lulu     |       | i                |
|         | worked the seam wall sitting 2-3 times before getting to a                 |       | i                |
|         | hot. Was put up after the 4 <sup>th</sup> hit on a positive note but was   |       | 1                |
|         | merely guessing. 2 <sup>nd</sup> session, Mike went over to work the block |       |                  |
|         | wall, she wanted no part of the wall but ended up working the              |       | l                |
|         | block U on her own. When Mike began presenting the holes in                | T     |                  |
|         | the block U Lulu wanted no part of it and even began searching             |       | I                |
|         | backwards on her own. I had a meeting with all 4 trainers                  | 1 1   |                  |
|         | discussing the matter. advised us to go back                               |       | (b)(3)           |
|         | into the imprinting booth and start from scratch where she had             |       |                  |
|         | good memories, then try to come out and work. Lulu sniffed the             |       | i l              |
|         | sniffer tin on her own, then sniffed the quart can when Mike               |       | 1                |
|         | presented it. Lulu did fine in the booth so we came out to the             | 1     | ı.               |
|         | closest can circle. Lulu searched all 15 cans, but at a very               | +1    | i l              |
|         | slow pace. Mike was instructed to lessen his praise posture                | 1     | · · · ·          |
|         | and reward heavy. 20 mins later Lulu was brought back out and              | 1     | 1                |
|         | started again in the imprint booth. We prepared 1 and 1                    |       | (b)(3)           |
|         | (the odor that caused this work strike). Again,                            | -     | (~)(~)           |
|         | Lulu did well in the booth so Mike continued to work to the                |       | l I              |
|         | wheels. Lulu had a few good hits on them but again began                   | 1     | (b)(3)           |
|         | sniffing and licking the floor and being hesitant.                         |       |                  |
| PM      | 1230 Mike again brought her out but started on the can                     | +     | · · ·            |
|         | circles. Lulu had 1-2 good hits then began veering off from                |       | I I              |
|         | the circle sniffing he floor and ignoring Mikes "seek"                     | +l    | í                |
|         | commands. Trainer then took Lulu and tried to work                         |       | (b)(3)           |
|         | her at a high tempo, faster pace. She did ok on the first can              | 1     |                  |
|         | circle but only searched 10-15 of the holes on block wall then             |       | 1                |
|         | began doing her own thing and not searching for Steve. At that             |       | i                |
|         | point she was put up for the day. I requested she be kept in               |       |                  |
|         | the SPS kennel for the weekend to see if that would make her               | +     |                  |
|         | more excitable for Mike. She will get 1 chance to work on                  |       |                  |
|         | Saturday 8/26, if she doesn't respond she will be put up.                  | d     | (b)(3)           |
| -       | was briefed at the conclusion of the day.                                  |       | (b)(3)<br>(b)(3) |
|         | He agrees with that they need a higher drive K9 and Lulu                   | 11    |                  |
|         | isn't cutting it. He will attend training Sunday to observe.               | 1     | (b)(3)           |
| <u></u> | K9 Capt. and Trainer will be advised of the                                | +     | (b)(3)           |
|         | conversation as well.                                                      | 1     |                  |
|         |                                                                            | +     |                  |
|         |                                                                            |       | (6)(0)           |
|         |                                                                            | L     | (b)(3)           |

| DOG     | TRAINER'S OBSERVATION COMMENTS                                                                                                   | Total<br>#REP |
| Lulu    | After speaking with FCPD's we decided to have Lulu<br>go 1 day without working anything. Our hope was that with                  |               |
|         | being kenneled and going without food for a day she would come<br>out Sunday and we would see how willing she was to work a full |               |
| a       | session or session's. She was given several break's and water throughout the day.                                                |               |
|         |                                                                                                                                  |               |
|         |                                                                                                                                  |               |
|         |                                                                                                                                  |               |
| ····    |                                                                                                                                  |               |
|         |                                                                                                                                  |               |

Approved for Release: 2019/12/02 C06769983

### **Exercises Performed:**

Wheels with and w/o hubs, Can line's, can circles, Block line, Block U, 2 Level blocks, Pallets, Seam wall, parcel boxes, parcel boxes with quart cans, luggage.

#### Trainer's note:

All dogs started off great on parcel boxes and luggage. However on Friday all the dogs began guessing or not even sniffing them. We made boxes with boards and quart cans sticking out of them to reinforce "boxes are productive". Sunday all dogs searched 19 boxes and 15 pieces of luggage without any false sits and all aids being found. Continued work on boxes is a must and we have to introduce hodge podge again to them.

Indigo was put into a different kennel 2 weeks ago because she was eating the lower wood separating the kennels. She is now eating the wood post in her new kennel and was moved to the last kennel we have that doesn't have wood but is now eating the paint off the concrete wall. The kennel is constantly causing issues and desperately need a new one.

Lulu was officially dropped from the program and was replaced with K9 Heron. Training staff worked on a plan to catch Heron up to date on the training. Getting Heron into the quart can as fast as possible then to the gallon will allow trainers to start line discrimination. This will be based on Heron showing a good COB and not push him past his ability. By weeks end he was not progressing fast enough for trainers are now continuing his imprinting at the Training Center with hopes the transition him to class in a few weeks.
