Preliminary Cacha Report

Permanent Cache

- 1. a. One RS-6
 - b. Forest soil, moist
 - c. One man can carry about 17 pounds
 - d. Packaged individually, four parts
- 2. a. Temporary cache in East Zone, see previous report hand-carried to COM on 19 September by
 - b. NA
 - c. NA
 - d. NA
 - e. V=03 and V=3k9, East Zone CADRASTIC agents, will drive to the area in V=03's car. They will park on a side road and proceed on foot to the eache site, see map. After a search of the area for the presence of other persens, they will cache the equipment at the site indicated on the map. They will alternate digging and look-out assignments.
- 3. a. The cache area is in the Tornau Forest and is surrounded by full grown trees as well as extensive bilberry briars. It is, however, accessible from all sides. It is located near the Leipsig-Wittenberg bighway ("Staatsstrasse 2") at a point lh.7 km South of Wittenberg, where there is an intersection. There is a small cemetery at the Southwest corner of the crossroads. Seventy-five meters West from the Leipsig-Wittenberg road on the road ("Weg") into the forest one turns right at a 90 degree angle to approach the cache site. There is a group of three beech trees at this point. The cache site is 60 m. North of these trees. At the cache site there is a beech tree of about .30 m. diameter with a striking low-hanging branch. The cache is located under this branch at a distance of 1.20 m. from the trunk. Two parts lie about .60 m. below the surface and under a root. The remaining two sections are buried .40 m. below these or one meter underground. Above the site at a distance of 1.30 m. from the ground, the letters "RF" appear on the tree. The letters have been there for a great many years.
 - b. See sketch
 - c. There are no unusual controls in the area, as it is forested and does not lie in the neighborhood of any sensitive installations.
 - d. The equipment will be cached more than two feet below the surface of the earth.
