FOREWORD

This gazetteer contains about 5,400 entries for places and features in the Pacific Ocean generally south of 15° north latitude, including the Line Islands, Phoenix Islands, Tokelau Islands, American Samoa, the Territory of Western Samoa, the Cook Islands, French Oceania, and the colony of Pitcairn Island. The entries include approved standard names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word “see.” Where part of a name is underlined, the use of the non-underlined part is optional. Where two names are approved for a feature, they are separated by a semicolon and either or both may be used. Names that include specific and other elements (except names of populated places) are alphabetized by specific part; thus Baie d’Afareaitu is listed as Afareaitu, Baie d’. Diacritical marks include the acute accent (as in Actéon), the grave accent (Rivière), the circumflex (Côte), the turned comma (A<sup>ˆ</sup>ana), the dieresis (Naiades), and the cedilla (Français). The same marks are to be used whether the names are written in capital or lowercase letters.
