FOREWORD

The gazetteer contains about 35,000 entries for places and features in the Arabian Peninsula and associated islands and waters. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

*Interpretation of entries*

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

*Name.*— Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names that include specific and other elements (except names of populated places) are alphabetized by specific part; thus Al Jabal al Akhḡar is listed as Akhḡar, Al Jabal al, and Jabal ar Rīsh is listed as Rīsh, Jabal ar. Names beginning with a definite article are alphabetized under the article unless they contain a generic term.

The diacritical marks used in the approved names are the macron (ˉ) as in *bāb*, the acute accent (´) as in *marsá*, and the cedilla (¸) under certain *d*'s, *h*'s, *s*'s, *t*'s, and *z*'s, as in *rawḡat*, *ḡazm*, *ṣayhad*, *ṡawil*, and *ṡahr*. In addition there are letters ' (*hamzah*) and ' (*ayn*).

In writing Arabic names in upper- and lowercase letters, every word in a name should be capitalized except the following when they are not name-initial: *bīl*, *wa*, and the definite article (*ad*, *aḡ*, *adh*, *al*, *an*, *ar*, *as*, *aṡ*, *ash*, *at*, *aṡ*, *ath*, *az*, *aṡ*; see Note 8 of the transliteration table).

So far as possible, and with the exception of conventional names such as those for major administrative entities and certain international features, names in the gazetteer have been romanized according to the system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN System). This system requires that names be transliterated as though they were written in Arabic and that no concessions be made to dialectical forms except as explained in the notes accompanying the system.

Where it was not possible to determine complete BGN/PCGN forms because of disagreement among sources or where source material allowing transliteration or reconstruction in terms of the system was lacking, names have been given in the forms found in existing romanized sources and marked with an asterisk preceding the designation; however, individual words, where recognizable in such names, have been rendered in the system.

*Designation.*— The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are stated for many terms in the list to reduce ambiguity. The distinctions that can be made by the designations in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that have names.

*Latitude and longitude.* — Coordinates, in the third and fourth columns, are for finding purposes only. They were generally read to the nearest minute. For precise location, large-scale maps should be used.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at one end of canals, at the summits of mountains and hills, at the extremities of capes, near the centers of areas, and at the midpoints of most other features.

*Area number.* — The number in the fifth column indicates the administrative or geographic unit in which the place or feature is located, as listed below:

- 41500 Arabia (General)
- 41502 Neutral Zone (Iraq-Saudi Arabia)
- 41503 Kuwait
- 41504 Neutral Zone (Kuwait-Saudi Arabia)
- 41505 Bahrain
- 41511 Colony of Aden, including Kamarān, Perim, and the Kuria Muria Islands.

The general number 41500 is used for features in major administrative units having indefinite boundaries and for international features.

*Locational reference.* — The number in the last column indicates a map, chart, or other source on which the feature may be located by its standard name or a recognizable variant of its standard name.

NOTES

1. *Hamzab* is written in Arabic over all initial *alifs* except those which belong to the definite article *al* or bear a *maddab* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *alif*, *wāw*, and *yā'* (without dots). *Hamzab* following *i* is written **ئ** (almost always the *yā'* is in the **يـ** or **يـ** form) and the dots are omitted. Example: **ئبشر**. *Hamzab* following *u* is written **ؤ**. *Hamzab* following a long vowel is written **ء** without anything under it ("without a bearer"). The transliteration of *hamzab* (') should always be carefully distinguished from that of *'ayn* (').
2. *Alif* as such is not transliterated when it is bearer of *hamzab*, but see *fatḥab alif* and *alif maddab* in Table II. See also note 1 above and note 10.
3. An original *tā'* in certain endings is written **تـ** (i.e., *bā'* with two dots) and is called *tā' marbūḥab*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzab* (isolated form) and *hamzat al waṣl*. A pronounced final *bā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥab* precedes it (Al Marāḥ). Cf. also note 4.
4. The two-letter symbols *th*, *kh*, *dh*, *sh*, and *gh* are convenient for use and easily comprehensible. The infrequent sequences of *t*, *k*, *d*, or *s* followed by *h* can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true *h* from a preceding *t*, *k*, *d*, or *s*; that is, *th* represents *tbā'*, but *t/h* stands for *tā'* followed by *bā'*. Cf. also note 3.

5. Where special considerations are paramount, the sub-dot (ḥ, ṣ, ḍ, ṭ, ḏ) may be used in place of the cedilla (ḥ̣, ṣ̣, ḍ̣, ṭ̣, ḏ̣).
6. The letter yā' is also used in writing *alif maqṣūrah* in which the dots are omitted. See Table II.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (Arabic *tanwīn*) may be transliterated when necessary by a<sup>n</sup>, i<sup>n</sup>, u<sup>n</sup>. In modern Arabic these endings have become silent and are omitted in transliteration: classical *alifu<sup>n</sup>*, modern *alif*.
8. Doubled consonant sounds are written in Arabic by placing the *tashdīd* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with t, th, d, dh, r, s, sh, ṣ, ḍ, ḡ, ḫ, l, n (the so-called "sun letters"), the l is assimilated in pronunciation, giving tt, thth, etc.
9. *Hamzat al waṣl* is transliterated ' in classical forms, as illustrated in its classical name *hamzatu 'l waṣli*, but ignored in modern forms, as in *hamzat al waṣl*.
10. *Maddab* is a horizontal wavy line over *alif*. Since *maddab* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddab* as well as for *fatḥab alif*.

In transliteration this l should be omitted and the following letter written twice, once after the a of the article and secondly at the beginning of the next word. Example: An Nil, not Al Nil.

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Laḥm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., 'Abd Allāh, 'Abd ar Raḥmān, Dhū al Faḡār.
5. The word Ibn will be transliterated Bin wherever written without *alif*, that is, between two proper nouns; e.g., 'Umar Bin al Khaṭṭāb.
6. The Turkish word Paşa will be transliterated directly from Arabic script as Bāshā; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where written *bā'-kāf* and as Bayk where written *bā'-yā'-kāf*.
7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidī if the latter is indicated by the Arabic script or other evidence - for instance if the yā' is written with *tashdīd*.)
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written *mīm-yā'-tā'* on Arabic maps will be transliterated Mayyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either *ḡā'-bā'-rā'* or *ḡād-bā'-rā'* in Arabic sources, the spelling used in the sources will be followed.
