CENTRAL INTELLIGENCE AGENCY

Washington, D.C.

September 1964

This Gazetteer is issued as a standard component of the National Intelligence Survey for Tunisia and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

## FOREWORD

This gazetteer contains about 23,000 entries for places and features in Tunisia. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds approximately to that on maps at the scale of 1:200,000. Entries include the names of first- and second-order administrative divisions, populated places of all sizes, numerous minor cultural entities, and a variety of physical features.

### Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name. — Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names containing generic or other elements preceding the specific term (except names of populated places) are transposed and alphabetized by the specific part; thus Kudyat al Jubayl is listed as Jubayl, Kudyat al.

As far as possible, Arabic names in the gazetteer have been romanized according to the transliteration system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN 1956 System), which follows on pages ix-xiii. Transliteration by this system is

done from Arabic script. It is almost always necessary to add missing symbols for vowels (vowel points) and to rewrite dialectical forms in standard written Arabic. Names written in roman letters but recognizable as Arabic have been put into Arabic script (reconstructed) and then transliterated.

Where it was not possible to determine complete BGN/PCGN forms of Arabic names because of disagreement among sources or where source material allowing transliteration or reconstruction in terms of the system was lacking, names have been given in the form found in existing romanized sources and marked with an asterisk (\*) preceding the designation; however, individual Arabic words recognizable in these names, such as generic terms like *jabal* added to non-Arabic words, have been rendered in the system. Also, every attempt has been made to render Arabic specific terms in the BGN/PCGN System even though only non-Arabic generic terms are available, especially where related feature names have been rendered completely in the BGN/PCGN System. Approved names not marked by an asterisk are either (1) BGN/PCGN transliterations of Arabic names or names established in Arabic forms, or (2) names containing only French or Italian words, for which Arabic names are not available, and those standardized only in conventional English form.

The diacritical marks used in approved names in Tunisia are, in Arabic names, the macron ( ¯ ), the cedilla ( ¸ ), and the acute accent ( ´ ); and, in French names, the circumflex ( ^ ), the acute accent ( ´ ), the grave accent ( ` ), and the cedilla ( ¸ ). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the letters ' (hamzah) and ' (ayn) frequently occur in Arabic names.

In writing Arabic names in capital and lowercase letters, every word in a name should be capitalized except the following when they are not name-initial: *wa* (and) and the definite article *al*, *al*, *adh*, *al*, *an*, *ar*, *as*, *as*, *ash*, *at*, *at*, *ath*, *az*, and *az*. In French names the initial letter of each word is capitalized except for noninitial articles, prepositions and conjunctions.

Cross-references have not been provided in the gazetteer for variant names which differ from approved names only in the spelling of the following generic terms:

Approved spelling	Variant spelling
'ayn	ain, aine
bilād	blad, bled
dhirā'	draa
hanshīr	hennshir
ḥasy	hassi, hasi
jabal	djebal, djebel, jebel
kāf	kef
karūmat	kroumet
kudyat	koudiat
qar'at	garaet, garaat, garaa, garet
ra's	rass
sabkhat	sebkret, sebkha, sebkra
shaṭṭ	chott
ṭawil	touil
'uqlat	oglat
wādī	oued

Designation.—The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in *this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary the quality of the maps of the area and with the nature of the entities that are named.

ADMD	first-order administrative division ( <i>wilāyat</i> ); second-order administrative division ( <i>mu'tamadiyat</i> )
AIRF	airfield
AREA	area (tract of country identified by a name, but without recognizable boundaries and not considered to be a tribal area; see also TRB)
BAY	bay
BDLD	badlands (area of deep and intricate erosion, with narrow ravines and sharp crests and pinnacles)
BGHT	bight (open body of water forming a slight recession in a coastline)
BLDG	building(s) (function not identified)
BNKM	marine bank (elevation of the sea floor over which the depth of water is relatively shallow but sufficient for safe surface navigation)
BSNH	headwater basin (area drained by the headwaters of one or more streams)
BUTE	butte(s) (isolated flat-topped hill with steep sides)
CAPE	cape (seaward end of a projection of land of such position and size as to cause offshore coastwise shipping to change course)
CAVE	cave, sea cave (recess in a cliff facing the sea; formed by the action of waves and tidal currents)
CHNM	marine channel (channel between coastal islands, reefs, or shoals or between an offshore feature and the mainland; deepened passage through a shallow marine waterbody)
CLF	cliff (high, steep rock face)
CMP	campsite
CMTY	cemetery
CNLA	aqueduct (for municipal supply)
CNLI	irrigation canal
COVE	cove
CSWY	causeway (raised roadway across wet ground or shallow water)

CTN	cistern(s) (storage place for water, usually masonry-lined and below ground level)	ISLS	islands
DAM	dam (structure for impounding water in a streambed)	LBED	lakebed (dried up or drained area of a former lake, marsh or other standing waterbody)
DPR	depression (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream; includes elevated basins)	LGN	lagoon (waterbody along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)
DPRM	submarine depression (small area of greater depth than adjacent areas, on the floor of a continental shelf)	LK	lake
DSRT	desert	LT	lighthouse
DUNE	dune(s) (hill or ridge of sand formed by the action of wind)	MESA	mesa (flat or nearly flat landform less extensive than a plateau and separated from lower surrounding land by abrupt slopes)
DWL	dwelling	MKT	marketplace
ENTR	entrance (opening from the sea into a lagoon, bay, or harbor)	MLM	ore treatment plant
FRM	farm (may include some rural dwellings and properties not used for farming)	MLO	olive oil mill
FRMS	farms	MLWD	windmill
FRST	forest	MN	mine
FT	fort (active or former fort or protective way station on a route of travel); military post (not necessarily garrisoned)	MNMT	monument
GRGE	gorge (relatively narrow, steep-sided part of a streamcourse)	MRSH	marsh (wetland characterized by grasses or bush vegetation and few or no trees)
GULF	gulf	MSQE	mosque
HBR	harbor (body of water providing shelter for ships)	MT	mountain (landform of conspicuous relief and small summit area)
HDL	headland (conspicuously high piece of land jutting out into or fronting the sea)	MTS	mountains, mountain range, mountain system
HLL	hill (landform of moderate relief and small summit area)	OAS	oasis (watered area in a desert; usually with cultivation dependent on underground water)
HLLS	hills	PASS	pass (way over, through, or between mountains or other high land); gap (low place in the relatively even crestline of a ridge or other elongated relief feature, apparently not used as a pass)
HMDA	hamada (stony plain or upland in a desert)	PCLI	independent political entity (republic)
INLT	inlet (small, narrow indentation in a coast)	PEN	peninsula
INN	inn	PK	peak (separately named summit on a more extensive elevation)
ISL	island (includes elevated areas in sabkhas)	PLN	plain (landform of low relief, slope, and elevation; includes alluvial plains and reclaimed wetlands)
		PND	pond (small inland waterbody)

POOL	pool(s) (small body of water in the bed of a stream or wadi)	SCRP	escarpment (more or less continuous line of cliffs or steep slopes facing in one direction; caused by erosion or faulting)
PPL	populated place (city, town, village, walled village, settlement; includes small clusters of rural habitations)	SEA	sea
PPLX	section of populated place (part of a city or suburb contiguous thereto)	SHOL	shoal(s) (offshore hazard to navigation with a least depth of ten fathoms or less, composed of unconsolidated material)
PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)	SLP	slope (gradient on the side or end of a mountain or other relief feature, less steep than a cliff)
PT	point (relatively minor projection of land into a waterbody, or its extremity)	SPIT	spit (protruding tongue of sand or silt deposited by a coastal current)
RDGE	ridge (elongated, relatively narrow and even-crested relief feature)	SPNG	spring(s)
RDST	roadstead (place, less protected than a harbor, where ships may ride at anchor)	SPUR	spur (sloping ridge extending laterally from a mountain or other elevation)
RGN	region (area recognized as an entity by reason of the unity of its history, people, landscape, or other condition)	STM	stream (river or other running fresh waterbody, perennial in all or a part of its course)
RKSW	rocks in water	STMX	section of stream
RKW	rock in water (may be above or below the water surface)	STNE	experiment station
RSTN	railroad station	STRT	strait (relatively narrow water passage connecting large bodies of water)
RSTP	railroad stop	TMB	tomb(s)
RSV	reservoirs (large artificially impounded bodies of water)	TRB	tribal area (some may now be converted to property ownership; see also AREA)
RUIN	ruin(s) (structure in a state of ruin, but not necessarily of great antiquity or archaeological interest)	UPLD	upland (broad elevated area with low to moderate surface relief)
SALT	salina(s) (salt-evaporation field, usually diked and ditched)	VAL	valley
SAND	sand area (includes large tracts of desert sand not in the form of dunes)	WAD	wadi (watercourse or drainageway that carries only occasional flows of water)
SBKH	sabkha (area of salt-impregnated ground without vegetation, intermittently wet from rainfall or seepage; slippery when wet, salt-encrusted when dry; occurs in depressions; includes intermittent lakes and salt marshes)	WADX	section of wadi
		WLL	well
		WLLS	wells

Latitude and longitude. — The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the

mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of capes and points, and near the center or midpoints of other features.

Area number. — The number in the fifth column indicates the first-order administrative unit (*wilāyat*) in which the place or feature is located, as listed below:

51800 Tunisia (general)	51807 Al Qaşrayn
51801 Sūq al Arba'a'	51808 Al Qayrawān
51802 Bājah	51809 Sūṣah
51803 Banzart	51810 Qafṣah
51804 Tūnis wa al Aḥwāz	51811 Ṣafāqis
51805 Al Waṭan al Qibli	51812 Qābis
51806 Al Kāf	51813 Madaniyīn

The general number (51800) is used for international features and for features in two or more first-order administrative units.

Locational reference. — A number other than 00 in the last column indicates a map on which the feature may be located by its standard name or a recognizable variant of its standard name, as follows:

01 *North Africa 1:250,000*, P502, Army Map Service, Washington, 1954-61.

02 *Tunisie*, Institut Géographique National and Service Géographique de l'Armée, Paris, 1928-38; scale 1:200,000.

03 *Carte de Tunisie au 50000e.*, Institut Géographique National and Service Géographique de l'Armée, Paris, 1897-1960.

The code 00 is used for cross-references and for standard names found only on references other than those listed above.

Coordinates on most sheets of references 02 and 03 are expressed in grads with longitude east of Paris (2°20'14" east of Greenwich) rather than in degrees. The grad is based on a right angle of 100 units, whereas the degree is

based on a right angle of 90 units. Thus 1° equals 1.11 grads and 1' equals .0185 grads. Conversely 1 grad equals .9° or 54'.

The following tables of equivalents indicate the approximate relation of grads to degrees in Tunisia.

LATITUDE		LONGITUDE

NOTES

1. *Hamzab* is written in Arabic over all initial *aliifs* except those which belong to the definite article *al* or bear a *maddab* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *aliif*, *wāw*, and *yā'* (without dots). *Hamzab* following *i* is written ؤ (almost always the *yā'* is in the ي or ـي form) and the dots are omitted. Example: بشر. *Hamzab* following *u* is written ؤ. *Hamzab* following a long vowel is written ؤ without anything under it ("without a bearer"). The transliteration of *hamzab* (') should always be carefully distinguished from that of 'ayn (\*).
2. *Aliif* as such is not transliterated when it is bearer of *hamzab*, but see *fatḥab aliif* and *aliif maddab* in Ta'rie II. See also note 1 above and note 10.
3. An original *tā'* in certain endings is written ٲ (i.e., *bā'* with two dots) and is called *tā' marbūʿab*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzab* (isolated form) and *hamzat al waṣl*. A pronounced final *bā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥab* precedes it (Al Mara/h). Cf. also note 4.
4. The two-letter symbols th, kh, dh, sh, and gh are convenient for use and easily comprehensible. The infrequent sequences of t, k, d, or s followed by h can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true h from a preceding t, k, d, or s; that is, th represents *tbā'*, but t/h stands for *tā'* followed by *bā'*. Cf. also note 3.

5. Where special considerations are paramount, the sub-dot (ḥ, ṣ, ḍ, ṭ, ḏ) may be used in place of the cedilla (ḥ̣, ṣ̣, ḍ̣, ṭ̣, ḏ̣).

6. The letter yā' is also used in writing *alif maqṣūrah* in which the dots are omitted. See Table II.

TABLE II  
TRANSLITERATION OF THE ARABIC VOWELS,  
DIPHTHONGS, AND SPECIAL MACRITICAL MARKS

ARABIC LETTER	NAME OF LETTER	TRANSLITERATION	EXAMPLES AND REMARKS
	fathah	a	البصرة Al Baṣrah. Placed over consonant after which pronounced.
	kasrah	i	الرياض Ar Riyāḍ. Placed under consonant.

ـ	tanwīn ḍammah	u <sup>n</sup>	See note 7.
ـ	tashdīd	doubling	See note 8.
ـ	hamzat al waṣl	'	See note 9.
آ	alif maddah	ā	آلبومعيط Ālbū Mu'ayṭ. See note 10.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (Arabic *tanwīn*) may be transliterated when necessary by a<sup>n</sup>, i<sup>n</sup>, u<sup>n</sup>. In modern Arabic these endings have become silent and are omitted in transliteration: classical *alif<sup>n</sup>*, modern *alif*.
8. Doubled consonant sounds are written in Arabic by placing the *tasbīd* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with t, th, d, dh, r, s, sh, ṣ, ḍ, ṭ, ḏ, l, n (the so-called "sun letters"), the l is assimilated in pronunciation, giving tt, thth, etc.
9. *Hamzat al waṣl* is transliterated ' in classical forms, as illustrated in its classical name *hamzatu 'l waṣli*, but ignored in modern forms, as in *hamzat al waṣl*.
10. *Maddab* is a horizontal wavy line over *alif*. Since *maddab* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddab* as well as for *ḥaḥab alif*.

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Laḥm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., 'Abd Allāh, 'Abd ar Raḥmān, Dhū al Faqār.
5. The word Ibn will be transliterated Bin wherever written without *alif*, that is, between two proper nouns; e.g., 'Umar Bin al Khaṭṭāb.
6. The Turkish word Paşa will be transliterated directly from Arabic script as Bāshā; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where written *bā'-kāf* and as Bayk where written *bā'-yā'-kāf*.
7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidī if the latter is indicated by the Arabic script or other evidence - for instance if the *yā'* is written with *tasbīd*.)
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written *mīm-yā'-tā'* on Arabic maps will be transliterated Mayyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either *zā'-bā'-rā'* or *ḍād-bā'-rā'* in Arabic sources, the spelling used in the sources will be followed.
