This Gazetteer is issued as a standard component of the National Intelligence Survey for Tanzania and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

This gazetteer contains about 16,500 entries for places and features in the United Republic of Tanzania, with separate listings for Tanganyika (14,150 entries) and Zanzibar (2,400 entries). The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The name coverage corresponds to that of maps at scales varying from 1:100,000 to 1:500,000 for Tanganyika and the scale of 1:63,360 for Zanzibar. Entries include the names of administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

This gazetteer together with those issued in 1964 for Kenya and Uganda supersedes the 1956 British East Africa gazetteer. The present Zanzibar listing contains a few corrections of the separate gazetteer of Zanzibar issued in 1964 before the union of Zanzibar with Tanganyika. Thus both the British East Africa and the Zanzibar gazetteers are now superseded.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names containing generic or other elements preceding the specific term (except names of populated places) are transposed and alphabetized by the specific part; thus Mwamba Ribunda is listed as Ribunda, Mwamba.

In writing Tanzanian names in capital and lowercase letters, the Swahili particles *kwa*, *la*, *wa*, and *ya*; the Masai particles *o* and *ol*; and the Arabic article *el* (the) are written in lowercase. With a few minor exceptions, all other separate and hyphenated words are capitalized.

In Zanzibar, and to a lesser degree in Tanganyika, the same name is sometimes applied to two or more nearby but distinct settlements. In such instances, all duplicated names are individually listed in the gazetteer.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in *this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Tanzania some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of capes and points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column indicates the first-order administrative unit of Tanganyika (region) or Zanzibar (district) in which the place or feature is located, as listed below:

56800	Tanganyika (general)	56812	Morogoro Region
56801	West Lake Region	56813	Coast Region
56802	Mwanza Region	56814	Mbeya Region

The general numbers (56800 and 56900) are used for international features and for features in two or more first-order administrative units.

Locational reference.—A number other than 00 in the last column indicates a map on which the feature may be located by its standard name or a recognizable variant of its standard name, as follows:
