FOREWORD

This gazetteer contains about 42,000 entries for places and features in the Republic of Nigeria. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds generally to that of maps at the scale of 1:250,000. *Entries* include the names of first-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or both of the following sources:

*Nigeria 1:50,000*, Federal Surveys, Nigeria, or Directorate of Overseas Surveys, 1956-69.

*Nigeria 1:100,000*, Federal Surveys, Nigeria, or Directorate of Overseas Surveys, 1951-69.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

**Name.**—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see". Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus River Anyim, the name of a stream, is listed as Anyim, River.

**Designation.**—The second column contains designations or abbreviations of designations of the entities to which the names apply, as listed below. Since practically all geographic terms have varied meanings, the senses in which many of the designations are applied in *this gazetteer* are stated in the list to reduce ambiguity. It should be noted also that the differentiations of terms that can be made in any gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Nigeria some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

- ADMD first-order administrative division (state)
- AIRP airport (place where aircraft regularly land and take off, with landing strips and related improvements and major facilities for the commercial handling of passengers and cargo)
- ANCH anchorage (place within a harbor or roadstead where ships anchor)
- BAY bay (coastal indentation of a size intermediate between a gulf and a cove)
- BGHT bight (open body of water forming a slight recession in a coastline)
- BSN basin (international; drainage basin of Lake Chad)
- CAPE cape (seaward end of a projection of land of such position and size as to affect the course of ships)
- CHNN navigation channel (passage between areas of shallower water sufficient for navigation of ships or boats)
- CLF bluff (high, steep bank without conspicuous exposed rock, overlooking a lower area)
- CMP camp(s) (buildings used for camping)
- CNFL confluence (place where two or more streams flow together)

CNL	canal (undifferentiated)	LGN	lagoon (waterbody along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)
CNLN	navigation canal	LK	lake
CNYU	submarine canyon (a relatively narrow, deep depression with steep slopes, the bottom of which grades continuously downward)	LKC	crater lake (lake in the crater of an extinct or inactive volcano)
DAM	dam (barrier constructed across a stream to impound water)	LKI	intermittent lake (seasonal waterbody which becomes a lake during periods of rain but which dries up or becomes a marsh or waterhole during the dry season)
DEEP	deep (area of markedly deeper water in a stream)	LKS	lakes
DLTA	delta (land formed by the deposition of alluvium at the mouth of a stream, commonly in the form of a triangle or Greek letter <i>delta</i> )	MN	mine
ESTA	plantation (large commercialized agricultural landholding with associated dwellings and other facilities, having unified ownership and management but requiring more than a one-family labor force and specializing in a single tropical or subtropical cash crop)	MRS	marsh(es) (wetland characterized by grasses or bush vegetation and few or no trees)
FLL	waterfall	MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
FLT	mud flat(s) (part of a streambed consisting of silt or clay sediments that are exposed at low water)	MTS	mountains
GASF	gasfield (area containing a subterranean store of natural gas of economic value)	OILF	oilfield (district containing a subterranean store of petroleum of economic value)
GRGE	gorge (relatively narrow, steep-sided segment of a streamcourse)	PCLI	independent political entity (republic)
GULF	gulf (large, broad waterbody indenting a coast)	PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)
HBR	harbor (body of water providing shelter for ships)	PK	peak (separately named summit on a more extensive elevation)
HLL	hill (landform of moderate relief, moderate elevation, and small summit area)	PKS	peaks
HLLS	hills	PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)
HSP	hospital	PLN	plains (landforms of low relief, slope, and elevation)
HSPL	leper settlement	PND	pond (small standing waterbody)
ISL	island	PPL	populated place (city; town, village, settlement)
ISLS	islands	PPLQ	abandoned populated place
LCTY	locality (minor area with one or more unnamed habitations; may have dispersed population)	PPLS	populated places (two or more populated places or habitations with a single name; the generics <i>Hamlets</i> or <i>Villages</i> may be included in the name)

PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)	SPUR	spur (short sloping ridge extending laterally from a mountain or other elevation)
PT	point (minor projection of land, or its extremity, into a waterbody)	STM	stream
RCH	reach (relatively straight, low-gradient segment of a stream)	STMA	anabranh (stream that leaves the main stream and rejoins it after a separate course for a considerable distance)
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)	STMD	distributary (secondary watercourse carrying part of the drainage of a larger stream into another waterbody; characteristic of deltas)
RESF	forest reserve (area under public management and controlled use; includes areas of dense forest and areas of sparse tree or bush vegetation)	STMM	stream mouth(s)
RESW	game reserve (area set aside for the habitation of game)	STMX	section of stream (separately named section of a stream having the same other name applied both above and below it, whether or not the section is delimited by confluences)
RF	reef (an offshore consolidated rock hazard to navigation with a least depth of twenty meters (or ten fathoms) or less)	SVN	savanna (natural grassland interspersed with trees or bush)
RCN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)	UPLD	upland (broad elevated area with low or moderate surface relief)
RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrop situated on land)	VAL	valley (area drained by a stream, or a named segment of such an area)
RSTN	railroad station (building used for the transaction of railroad business, located beside a railroad track at a point where trains regularly stop to take on and discharge passengers or freight)	WTCD	deltaic watercourse (lesser watercourse connecting distributaries or other drainage features on a delta)
RSV	reservoir (large artificially impounded body of water)	WTLD	wetland (marsh, swamp, or other poorly drained area with a mixture of tree and grass vegetation or with unspecified vegetation)
RUIN	ruins (structures in a state of ruin, but not necessarily of great antiquity or archaeological interest)		
SHOL	shoal(s) (an offshore hazard to navigation with a least depth of twenty meters (or ten fathoms) or less, composed of unconsolidated material)		
SITE	site (location of a former cultural feature with scant remains of the original structure)		

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, and near the centers or midpoints of other features.

Area number.—The number in the fifth column indicates the first-order administrative unit (state) of Nigeria in which the place or feature is located, as listed below:

53800 Nigeria (general)	53807 Lagos
53801 North-Western	53808 Western
53802 North-Central	53809 Mid-Western
53803 Kano	53810 Rivers
53804 North-Eastern	53811 East-Central
53805 Kwara	53812 South-Eastern
53806 Benue-Plateau	

The general number (53800) is used for international features and for features in two or more states.

Glossary of generic terms

The following terms occur as the generic parts of standard names listed in the gazetteer. The meanings given include those supported by application to features named in the gazetteer, whether or not these meanings are given in dictionaries. The parenthetical symbol (Fu) designates Fulani words; the remainder are Hausa.

agwan, anguwan, anguwar, angwa, angwan	populated place
baraki, bariki, barikin	populated place
birni, birnin	populated place
burji	hill
chappal	(Fu) mountain
duchi, duchin, dutchen, dutse, dutsen, dutsi, dutsin	hill

gari, garin, geri, gerin	populated place
gida, gidan	populated place
gulbin	stream
hosere	(Fu) hill
kafi, kafin, kaifin, keffi, keffin	populated place
kogin	stream
korama	stream
kurimi, kurmi, kurumi	forest reserve
mayel	(Fu) stream
mayo	(Fu) stream
ruwan	stream
tabkin	lake
tsauni, tsaunim, tsaunin	hill
tudu, tudun, tundun	hill
tugan, tunga, tungan, tungar, tungu	populated place
un;kwan, ungua, unguwa, unguwan, unguwar, ungwawa, ungwawan, ungwawar	populated place
woro, wulo, wura, wuro, wurro	(Fu) populated place

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for the future printing by reporting errors and name changes to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
