Southern Rhodesia

OFFICIAL STANDARD NAMES

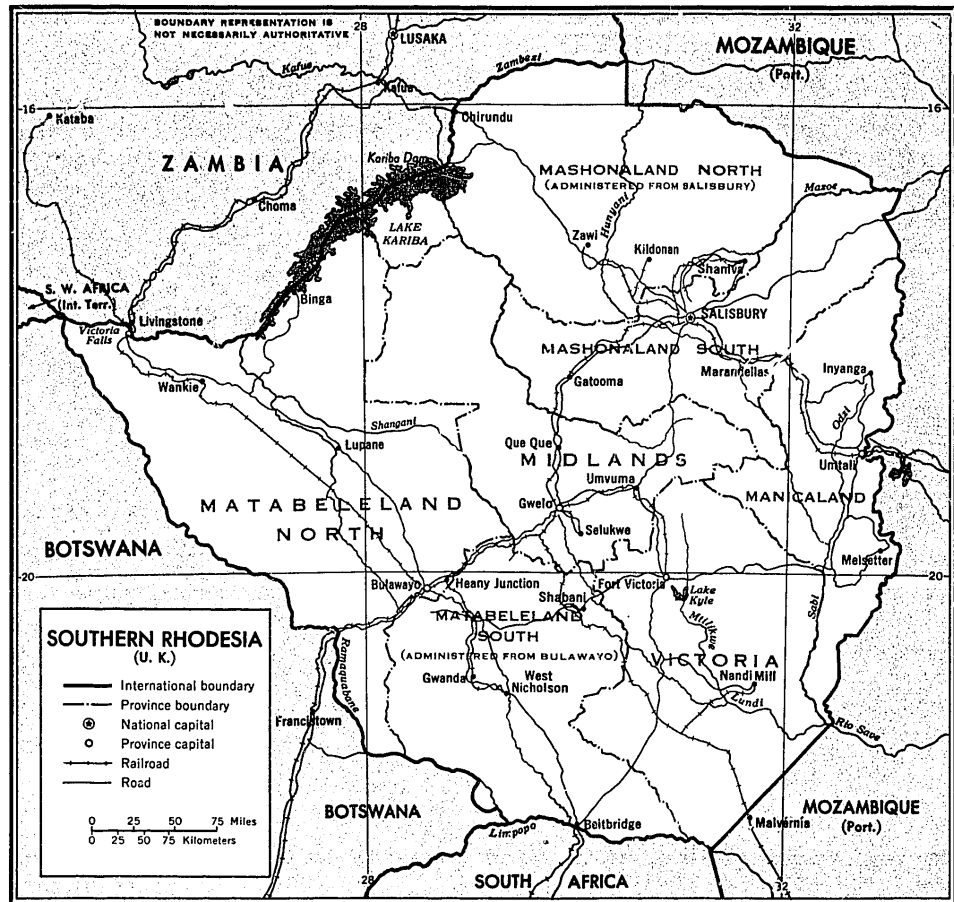

approved by the

UNITED STATES BOARD ON GEOGRAPHIC NAMES

Prepared by the

Defense Mapping Agency Topographic Center

Washington, D.C. 20315, June 1973

FOREWORD

This gazetteer contains about 22,500 entries for places and features in Southern Rhodesia. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the areas concerned.

The basic name coverage corresponds generally to that of maps at the scale of 1:250,000. Entries include the names of first- and second-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *Gazetteer of Geographical Place Names in Southern Rhodesia*, Ministry of Lands and Natural Resources, Department of the Surveyor General, 1963.
2. *Joint Operations Graphic (Ground) 1:250*, Director of Military Survey, Ministry of Defence, U.K., 1967-1972. (Incomplete coverage)
3. *Rhodesia 1:250* (and other titles), the Surveyor General, Rhodesia, and others, 1959-1969.
4. *Rhodesia 1:50,000* (and other titles), the Surveyor General, Rhodesia, and others, 1957 to date.

Evaluation

The quality of names in this gazetteer is rated as very good. The local official map sources used in the preparation of the gazetteer were compiled from aerial photography beginning in the late 1940's and continuing through 1965. These were of such

quality as to permit definitive interpretation of the features in almost all cases.

The Southern Rhodesia Geographical Names Standing Committee, established in 1952 and presently operating through the Department of the Surveyor General, has approved some 6,000 names appearing in the 1963 *Gazetteer of Geographical Place Names in Southern Rhodesia*. This document was used as a primary source in the preparation of the present BGN publication.

Correspondence with the Standing Committee during the research phase of this BGN gazetteer revealed that certain Southern Rhodesian gazetteer names had been reconsidered and that the more recent decisions had been applied to maps which postdate the gazetteer. In such cases, except where linguistic considerations precluded it, map names were given precedence. For other names the latest map was generally preferred in selection of the BGN approved spelling.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see". Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Lake Kariba*, the name of a reservoir, is listed as *Kariba, Lake*. Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Local names of international features are identified by major-political-entity labels. Where only one

country is identified parenthetically, no name is available for the feature in the other country or countries.

Name entries which have an asterisk (*) preceding the designation are those taken from the *Gazetteer of Geographical Place Names in Southern Rhodesia* for features which were not named on any map available to the Board on Geographic Names.

Designation.—The second column contains designations or abbreviations of designations of the entities to which the names apply, as listed below. Since practically all geographic terms have varied meanings, the senses in which many of the designations are applied in *this gazetteer* are stated in the list to reduce ambiguity. It should be noted also that the differentiations of terms that can be made in any gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Southern Rhodesia some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD first-order administrative division (*province*); second-order administrative division (*district*)

AREA area (intensive conservation area); or (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)

BDC bridge

BLDG building(s) (functions either unspecified or as indicated by the generic term)

BND stream bend (conspicuously curved portion of a stream; may in some cases include the area enclosed by the bend)

BP boundary pillar

CAVE cave

CH church

CHNL lake channel (channel between islands in a lake or between islands and the mainland)

CLF cliffs (high, steep rock face overlooking a lower area, such as a water body, coastal lowland, or valley)

CMP camp (usually of unspecified use)

CMPM military camp

COLF coalfield

COVE cove (small bay)

CRRL corral(s) (enclosure for cattle)

CSWY causeway (raised roadway across wet ground or shallow water; may include low bridges in part)

CTHS courthouse

CTRB business center (may include some permanent population)

DAM dam (barrier constructed across a stream to impound water)

DIKE dike (linear earthwork constructed to restrain or prevent the encroachment of water)

DPR depression (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream)

FLLS waterfalls

FLLX section of waterfalls

FLT mudflat(s) (extensive mud deposit on a section of a broad valley floor)

FORD ford (place where a stream may be crossed safely without a bridge or boat; may include the terms Drift or Crossing in the name)

FRM farm (includes a wide range; from small, single-family units to ranches, estates, plantations and large landholdings)

FRMS farms

FRSF fossilized forest

FRST forest (includes features named Forest Area and Forest Reserve)

FT fort

GATE gate (opening in a cattle fence; sometimes called "fly gates" where tsetse fly control is practiced)

GRGE gorge (relatively narrow, steep-sided part of a stream-course)

HLL hill (landform with moderate relief, moderate to low elevation, and small summit area)

HLLS hills

HSP hospital

HSPC clinic

HTL	hotel	PPLQ	abandoned village
INLT	inlet (drowned indentation in the shore of a lake or reservoir, usually at the mouth of a stream)	PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)
ISL	island	PRJI	irrigation project
ISLS	islands	PRK	national park
LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries)	PT	point (relatively minor projection of land, or its extremity, into a water body)
LNFP	purchase land (land set aside for purchase by African farmers)	RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)
MESA	mesa (flat or nearly flat landform, less extensive than a plateau, separated from lower surrounding land by abrupt slopes)	RECF	recreational facility
ML	mill	RESW	game reserve (includes wildlife areas and controlled hunting areas)
MN	mine	RH	resthouse(s)
MNA	mining area (includes leased areas)	RJCT	railroad junction
MNMT	monument; national monument	ROAD	road
MNQ	abandoned mine	RPDS	rapids
MSSN	mission	RSD	railroad siding
MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)	RSTN	railroad station (building used for the transaction of railroad business, located beside a railroad track at a point where trains regularly stop to take on and discharge passengers or freight)
MTS	mountain range; mountains	RSTP	railroad stop
PAN	pan (shallow depression retaining water after rains)	RSV	reservoir(s) (artificially impounded body of water; may include the generic term "dam" in the name)
PANS	pans	RUIN	ruin(s) (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
PASS	pass (way over or between mountains or other elevated land)	SCH	school
PCLD	dependent political entity (colony)	SCHC	college
PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)	SCRP	escarpment (more or less continuous line of cliffs or steep slopes facing in one direction, caused by differential erosion or faulting or both)
PK	peak (separately-named summit on a more extensive elevation)	SPNG	spring(s); hot spring(s)
PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)	SPNS	sulphur spring(s)
PLN	plain (landform of low relief, slope, and elevation)	SPUR	spur (sloping ridge extending laterally from a mountain or other elevation)
POOL	pool (small body of water in the bed of an intermittent stream)	STM	stream (river or other running fresh water body, perennial in all or a part of its course)
PP	police post		
PPL	populated place (city, town, village, settlement)		

STMA anabranch (stream that leaves the main stream and rejoins it after following a separate course for a considerable distance)

STMX section of stream (separately named part of a stream, not delimited by significant confluences)

STNE experiment station

STNR radio station

STOR store(s)

TMB grave

TNKD cattle dipping tank

TNP township (African township)

TRL trail

TTL tribal trust land

VLEI vle (shallow grassy valley formation between wooded areas)

WEIR weir

WLL well (dug or drilled source of water)

WTLD wetland (marsh, swamp, or other poorly drained area with unspecified vegetation)

WTRH waterhole (place in an otherwise dry area where water is obtained by wild or domestic animals; includes rain pools)

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only. Where features could be located on maps, coordinates were read at the map symbol for

populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of other features. In the case of asterisked (*) entries (See Interpretation of Entries, above) the coordinates are those given in the *Gazetteer of Geographical Place Names in Southern Rhodesia*.

Area number.—The number in the fifth column indicates the first-order administrative unit (*province*) in which the place or feature is located, as listed below:

57500	Southern Rhodesia (general)	57505	Mashonaland South Province
57501	Manicaland Province	57506	Matabeleland South Province
57502	Midlands Province		
57503	Mashonaland North Province	57507	Victoria Province
57504	Matabeleland North Province		

The general number (57500) is used for international features and for features in two or more first-order administrative units.

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200030002-2

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
