INTRODUCTION

This Order of Battle Summary is prepared on a semi-annual basis in response to requirements from the National Indications Center (NIC) and normally receives limited distribution. The purpose of the Summary is to provide recipients of the NPIC OAK and OAK Supplement with a resume of photographic sightings at key targets throughout the USSR, Eastern European Communist countries and China, which will assist in establishing Order of Battle norms.

Target selection varies with the geographic and substantive area concerned. General criteria are as follows:
China:

- A. Ground Order of Battle--Major combat arms; installations of at least divisional size, geographically located in relation to major road and rail nets; major equipment observed on past coverage; and other targets of strategic significance. Main emphasis is on targets south of 32 degrees North.
- B. Naval Order of Battle--All active naval bases in the South Sea Fleet;
- C. Air Order of Battle--Gross acceptance of all air-

fields on the COMIREX list south of 32 degrees North and capable of accommodating jet aircraft.
