FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

ANTIBALLISTIC MISSILE WEAPONS (II)

Beijing FANDAODAN WUQI [ANTIBALLISTIC MISSILE WEAPONS] in Chinese Aug 81 unnumbered introduction, table of contents, pp 76-100

[Introduction, table of contents and chapters 9, 10 of book "Antiballistic Missile Weapons" by Liu Shaoqui [0491 4801 3808] and Li Xianlin [2621 7341 7207] published by National Defense Industries Press, 100 pages. Chapters 2-8 of this book published in JPRS 81679, 1 September 1982, No 333 of this series]

[Text] Introduction

It is an objective law of development that every form of attack has its corresponding defense.

The appearance of every new advanced weapon inevitably results in the development of a weapon to defend against it. Antiballistic missiles, which are intended for defense against nuclear ballistic missiles, are still under development.

The antiballistic missile is an extremely large, complex, costly weapon system involving a wide range of technologies. The United States took 20 years and spent a total of more than \$10 billion to produce the Safeguard system, which nonetheless had low effectiveness and was taken out of service in February 1976.

This book presents a systematic introduction to antiballistic missile systems. It is divided into 10 chapters. The first eight describe the organization, capabilities, interception process and guidance principles of the systems, penetration and antipenetration techniques, and the design and characteristics of the antiballistic missiles themselves. Chapter 9 describes other approaches to ballistic missile defense such as laser weapons, particle beam weapons and the like. Chapter 10 describes the status of certain foreign antiballistic missile systems and discusses trends in the development of such systems.

Prof Shi Chaoli [0670 6389 4409] and Comrade Shen Zhongfang [3088 1813 5364] read the manuscript carefully and made many valuable comments, Comrade Chen Mingdi [7115 2494 1717] did much work associated with the writing of the book, and Comrades Chang Bozhi [1728 0590 2535] and Lu Zheng [7120 6154] drew the diagrams and the cover illustration for the book; we take this opportunity to express our gratitude to them.

Because antiballistic missile systems involve an extremely wide range of technologies and our own abilities are limited, the book may contain errors; readers' corrections and criticisms are earnestly solicited.

Data on U.S. and Soviet antiballistic missile systems presented in the text are drawn from open foreign publications; since different publications sometimes present conflicting figures, the data presented here should be used for reference only.

[Translation of] Table of Contents

	[Original Page No]
Chapter 1. An Overview of Antiballistic Missile Systems	1
Chapter 2. The Organization and Capabilities of Antiballistic Missile Systems	4
Warning Systems	5
Target Recognition Systems	6
Ground-Based Guidance Systems	7
The Antiballistic Missile: The Interceptor Component of the System	8
Command and Control Systems	9
Chapter 3. The Missile Intercept Process	12
Simplified Description of the Target Interception Process	12
Time Allocation in the Engagement Process	14
Six Minutes, and 6.5 Seconds	16
Chapter 4. Guidance Principles	19
The Intercept Path	20
Guidance Principles	24
Chapter 5. Design and Characteristics of the Antiballistic Missile	29
General Design	29
Characteristics of the Antiballistic Missile	29
Some Foreign Antiballistic Missiles	36
Chapter 6. The Command Center: The "Brain" of the Antiballistic Missile System	40
The Functions of the Command Center	41
Capabilities of Electronic Computers	44
Chapter 7. Warning Systems and the "Far-Seeing Eye" of Radars	49
Warning Satellites	50
Radar, the "Far-Seeing Eye"	53
Over the Horizon Radar	55
Phased Array Radars	58
Monopulse Radars	60

Chapter 8.	Penetration and Antipenetration Techniques	66
	A Survey of Penetration and Antipenetration Techniques	66
	Several Penetration Techniques	68
	Recognition Techniques	72
Chapter 9.	Other Ways of Intercepting Missiles	76
	Brief Description of Various Means of Interception	76
	Laser Weapons	77
	Particle Beam Weapons	84
Chapter 10.	Current Status and Development Prospects of Foreign Antiballistic Missile Systems	90
	The Status of U.S. Antiballistic Missile Research	90
	Soviet Antiballistic Weapons Situation	95
	Future Prospects of Antimissile Systems	97
Tables		
	Table 1. Ballistic Characteristics of Ballistic Missiles	99
	Table 2. Subdivisions of the Radio-Frequency Spectrum	100
	Table 3. Characteristics of U.S. Antiballistic Missile Weapons	100
