PACE UNIVERSITY

Academic schools:

Dyson College of Arts and Sciences
Lubin School of Business Administration
The College of White Plains
School of Education
Lienhard School of Nursing
School of Continuing Education
The Graduate School of Business
School of Law

Degree offerings:

Associate in Arts
Associate in Science
Associate in Applied Science
Bachelor of Arts
Bachelor of Science
Bachelor of Business Administration
Bachelor of Professional Studies
Master of Arts in Economics
Master of Business Administration
Master of Science in Educational
Administration and Supervision
Master of Public Administration
Master of Science in Management Science
Master of Science in Computer Science
Master of Science (Nursing)
Master of Science in School Psychology
Master of Science in Taxation
Doctor Juris
Doctor of Professional Studies
Doctor of Psychology

Locations:

New York City Campus
New York City Midtown Center
White Plains Campus
Pleasantville/Briarcliff Campus

Your choice

Choosing a college that seems right for you can be a process somewhat similar to the college's own search for students. You and the college study each other's background and potential. You evaluate how well the academic programs and campus life suit your interests and future goals.

Pace believes that you and the University become a team, each a mirror for the accomplishments of the other. Your intellectual and personal development become part of Pace, just as Pace's academic strengths and reputation reflect on you as a student and later as a graduate.

Such interdependence creates a warm and shared experience that goes from classroom to Pub, from faculty office to tennis court, from Senate meeting to mixer, from career seminar to concert stage, and from campus to campus.

Here, then, is Pace University.

The campuses

Location and overall surroundings certainly influence your choice of college, and Pace is particularly fortunate in being able to offer sufficient diversity at its four major sites to appeal to many tastes and requirements. We urge you to visit the campuses and see these distinctive characteristics for yourself.

Each campus holds "open house" events featuring interesting and informative sessions on subjects such as curriculum, financial aid and student life. These informal gatherings also enable you to talk with professors, members of the administration and students.

Throughout the year counselors in the Admissions Offices welcome the chance to discuss Pace with you and show you the campuses. Just call for an appointment.

New York City campus

In New York City the campus faces City Hall Park in lower Manhattan not far from the original site of Pace dating back to 1906. Major financial institutions, striking new office buildings, fine apartment dwellings, the World Trade Center and famous South Street Seaport surround Pace and add to the vitality of this part of the city.

New York is a dynamic campus with early bird classes starting the day at 7 and evening classes closing it at 10. A majority of the 8,000 or more undergraduates hold full or part-time jobs, so it is important for them to reach the campus with maximum convenience. This they can do via any of the city's public transportation lines which converge at the City Hall area.

Among the varied resources of the campus are the 400,000 volume library, the Schimmel Center for the Arts, the Haskins Laboratories, a gymnasium where pro basketball games have been played, and a roof garden and lounges for relaxation. Approximately 300 students live in the dormitory tower.

Major figures from the professional theatre, the arts, music and the corporate and financial worlds often perform and lecture at Pace.

Midtown Center

The Midtown Center offers undergraduate courses in business, arts & sciences and secretarial studies. (Graduate courses in business are also available.) More than 1,000 men and women, most of whom work in the city, study at this convenient location just 3 blocks from Grand Central Station.

Many students continue courses at Pace's New York campus where they complete requirements for a degree. The Center is one of Pace's many success stories.

Pleasantville/Briarcliff Campus

Visitors to the Pleasantville/Briarcliff campus are often surprised to find this beautiful countrified setting in the midst of a suburban residential area. Hilly terrain, rail fences, a spring fed pond and rolling lawns form a natural backdrop for classroom buildings and dormitories.

Although Pleasantville and Briarcliff are a few minutes apart by car, Pace administers these campuses as one and provides frequent bus service between the two locations. Buses also run to White Plains and New York on a regular schedule.

A majority of the student body commutes from within Westchester and neighboring counties, as well as southern Connecticut and parts of New Jersey. Major highways have exits close to the campus.

Approximately 850 students live in dormitories.

Among the many interesting features of the campus is the Environmental Center/Farm. Here students enjoy a wide range of activities from courses in ecology to handmade crafts from the study of small farm animals to horseback riding and other special programs.

The College of White Plains

Students at The College of White Plains enjoy the advantages of a small campus while benefitting from the resources of the University as a whole. There is a sense of belonging here. Freshmen quickly get to know classmates, faculty and staff. For many this makes it easier to become involved in all phases of the college experience.

The College of White Plains became part of Pace University a few years ago, and while continuing its traditional strength in the liberal arts, it has, at the same time, broadened its academic offerings.

Students can easily walk from the lovely campus to downtown White Plains where many hold full or part-time jobs. Its location is such that outstanding persons in the media, government, religion, sports and other fields are attracted to the campus to give lectures and conduct seminars. The School of Law in its impressive new building is at the gateway to the campus. With all major public transportation coming into the city and the Cross Westchester Expressway but a mile away, getting to the campus is easy.

The Classroom

Pace points with pride to its relatively small classes and ratio of faculty to students. However, diversity is often as important as size, and there are times when a larger class or a lecture hall can provide just as effective a background for learning as its smaller counterpart.

Obviously, no two professors are alike. Some are forceful and dynamic, others are quiet and persuasive. Each in his or her own way is completely professional, dedicated to teaching, and deeply interested in students.

Throughout the year, professors can be seen in the dining halls, walking the campus and in faculty offices with their students. Many serve as advisors for clubs, publications and other student organizations.

Technology, information and contemporary society change so rapidly that members of the faculty must become students themselves in order to prepare the men and women of Pace for the future. In many cases, their own research and study is augmented by outside work in their specialties. Consulting assignments and similar professional experiences enable professors to bring the reality of today's world to the classroom.

Campus Life

If you are like most students, you will find college more rewarding if you become involved in campus organizations. Besides the enjoyment of doing things with others who have similar interests, participating in these activities can provide valuable experience that is often viewed favorably when it comes time to look for a job.

At Pace the opportunities for such interests are many and varied: intercollegiate and intra-mural sports, drama societies, student government, clubs related to academic programs, religious societies, newspapers and publications, art and literary clubs, the radio station, community and charity projects, debate team and others.

When visiting the campuses, be sure to ask for a Student Handbook so you can see the full listing of these organizations.

For social life and relaxation there are the Pace Pubs, films, mixers, dances and special events. The tennis courts, Briarcliff swimming pool and the gymnasiums are open to all.

The Performing Arts Department brings name bands, well-known performing artists and professional entertainers to the campuses.

Student Services

Pace provides highly professional counseling in three major areas: academic, personal and career. Members of the faculty schedule regular office hours, and students are always welcome to discuss their courses of study and any problems that may arise related to them. Department chairpersons and deans also meet with the students, when their help is required.

At some time during a college career almost every student faces personal problems that can often be lessened through professional counseling. The Counseling Center offers this important kind of confidential aid.

It is never too early to think about careers and your future, and the Career Planning Center urges students to take advantage of its many services which include career workshops where students learn resume writing techniques and interviewing skills. The Center has an impressive job-recruiting program, career opportunity information, and a listing of available jobs for undergraduates both on and off campus.

Please note: The University offers special concentrations that may not be listed on this chart. Please refer to campus bulletins.

Fields of Study

Accounting

Well known for its excellent accounting programs, Pace offers five major concentrations in addition to a combined BBA-MBA degree. The work of an accountant encompasses a wide range of activities including auditing, accounting and information systems design, taxation, financial planning, budgeting, and management consulting.

Career possibilities:

Public Accounting
Government
Industry
Corporations

Combined BBA-MBA Degree Program in Public Accounting

The combined BBA-MBA program gives students with superior academic ability an opportunity to earn both a bachelor's and a master's degree in less time than normally required. It is possible to complete the program in four years of full-time study including summer sessions. The program satisfies the educational requirements necessary for graduates to sit for the Certified Public Accounting Examination in New York, New Jersey and Connecticut. Admission to the program is highly selective.

General Accounting

The flexibility of the General Accounting major attracts many students, for it provides a broad-based study of accounting, and at the same time, permits course selection through its elective requirements. If they wish, students can develop a second concentration in liberal arts. The program is not intended to meet the specific certificate requirements for public or managerial accounting.

Accounting and Information Systems

Because much of today's accounting process is computer-based, this major develops the student's understanding of accounting as it relates to management information systems and computer-based financial applications.

Accounting and Taxation

For those who plan to specialize in tax accounting, this major provides not only a broad-based program in accounting, but also a concentrated study of the theory and practice of municipal, state and federal taxation.

Managerial Accounting

This is a recommended course of study for students seeking to qualify for the Certificate in Managerial Accounting, (C.M.A.).

Public Accounting

In addition to the combined BBA-MBA program, Pace prepares students for the Public Accounting profession through its undergraduate 133 credit program. The major satisfies the educational requirements for admission to the CPA Examinations in New York, New Jersey, and Connecticut.

Art

Those who study art at Pace find a unique balance between development of their artistic capabilities and education in the humanities. Humanities broaden a student's interests, while studio work provides training in specialized areas.

Career-minded students can major in Art at the Pleasantville/Briarcliff campus and choose a concentration in Graphic Design, Interior Design, Illustration, or Technical and Medical Illustration.

The major program is housed in its own Arts Building with special studios, classrooms, lecture hall, and gallery. The gallery serves as a learning experience for students and the background for many interesting exhibits.

Students are encouraged to enter internships which are available in department stores, art galleries and commercial art studios.

Career possibilities:

- Fashion design
- Interior design
- Graphic design
- Illustration
- Art education
- Creative photography
- Art administration
- Scientific and medical illustration
- Typography
- Art therapy

Banking

Offered at the New York city campus only, the major in Banking provides a thorough study in economics and finance for students who want careers in the banking profession. In addition to the Pace offerings, majors in this discipline may also take advantage of specialized courses given by the American Institute of Banking.

Career possibilities:

- Commercial banking
- Consumer banking
- Marketing
- Loan officer
- Branch management
- Trust administration
- Operations and Personnel

Biology

Biology is the study of living things—plants, animals and microorganisms—encompassing broad areas that range from anatomy to physiology to molecular biology. Concentrations in the field require a basic knowledge of biology, chemistry, mathematics and physics.

Fully equipped laboratories on all campuses including the Haskins Laboratory in New York provide an excellent background for study and research.

A Pre-Veterinarian program and field studies in Ecology are based at the Environmental Center at Pleasantville.

A preprofessional major is intended for those who expect to enter medical, dental or veterinarian schools.

In general, majors continue their study in graduate school or seek employment in areas related to biology.

Career possibilities:

- Medicine
- Dentistry
- Veterinary medicine
- Biological research
- Conservation
- Wildlife management
- Industry
- Pharmacology

Cartography Geography

A cartographer is part geographer, part artist, part mathematician and a liberally educated person.

It is just such an intellectual dimension that students can anticipate when they major in the Cartography/Geography program at the Briarcliff campus.

Students learn technical skills and use them in analyzing social and physical phenomena that involve the urban, economic, political and ecological problems of our times.

A fully equipped cartographic laboratory, optical laboratory and one of the most extensive collections of remote sensing imagery on the eastern seaboard are all part of the equipment and materials available in this program.

Career possibilities:

- Urban redevelopment cartographer
- Cartographic draftsman
- Graphics assistant
- Planning commission cartographer
- Army map services cartographer
- Peace corps teacher
- Architect
- Recreational geographer
- Geological surveyor
- Engineering cartographer
- Map publisher
- Remote sensing analyst

Chemistry

The Chemistry major studies the behavior of matter. Why do things act as they do? What causes materials to have certain properties? How do we change these properties? These are among the many questions asked and considered by chemists. The professional in this field seeks a career in which new and exciting discoveries result in practical applications now and for the future.

Chemistry majors take courses in the related sciences: biology, mathematics, physics and computer science, and they can choose a second concentration such as biology, environmental science, computer science, mathematics, management science, technical writing and pre-medicine.

Career possibilities:

- Research
- Production
- Science writing
- Sales management
- Safety specialist
- Medicine
- Dentistry
- Industry

Computer Science

The effectiveness of a computer depends on those who use it. For this reason, the Pace student who majors in Computer Science must understand the instrument itself and also the programming and software necessary for the computer to solve the problems put to it. Students develop the analytical and technological skills necessary to manage enormous fields of data.

The curriculum permits a crossover in academic study with business and liberal arts subjects, providing a good background for entry-level jobs and future careers.

Career possibilities:

- Business
- Industry
- Government
- Non-profit organizations

Criminal Justice

Individuals who have earned associate degrees in police science, correction science, criminal justice or the equivalent can earn a Bachelor of Science Degree in Criminal Justice at the Pleasantville campus.

Many courses are taught by leading professionals in their fields, such as a chief assistant district attorney, a county judge and a social psychologist with 20 years experience in correctional institutions.

Career possibilities:

- Law enforcement
- Correction
- Courts
- Probation
- Industrial security

Drama and Professional Theatre

The Dramatic Arts program provides conscientious students with the technical skills necessary for careers in professional, community and university theatre. All aspects of performance are emphasized including acting, stagecraft, lighting, dance and makeup. The department has a well-equipped rehearsal hall for drama and dance, and the use of the contemporary Schimmel Theatre.

Relationships with a number of professional organizations in New York add a practical dimension to the programs, and many practitioners of the arts serve as adjunct faculty.

Three or four productions are staged annually, and a close relationship exists with Pace's highly successful Debate Team.

At the White Plains campus Applied Dramatic Arts is a sequence which trains students in the skills of dramatic activity as preparation for involving others in developmental or therapeutic experiences. The sequence focuses on initial stages of theatre training, personal growth and expression, as distinct from the specific craft skills of theatre as an art form.

Economics

Economics is the theoretical study of business enterprise—the “liberal arts” of business and the “business” of liberal arts. It demonstrates how economic systems function and how and why economic decisions are made. It explains how policies and plans can be formulated from this abstract knowledge on the individual and corporate levels, as well as for the economy as a whole. Economics appeals to students who like to deal with abstraction, but who also want concrete applications.

More than 70% of the chief executive officers of the 500 largest corporations have degrees in economics.

Career possibilities:

- Corporations
- Government
- Education
- Management science
- Operations research
- Statistics

Education

Elementary Education

Students who select this major have a choice of ten different liberal arts concentrations which enables them to acquire knowledge in such fields as behavioral science, mathematics, economics, learning disabilities, art and speech among others. This liberal arts background is basic to the credentials of a professional educator and opens the way to a variety of career choices besides teaching.

Secondary Education

The program in secondary education is associated with the following major fields: biology, chemistry, dramatic art/history of drama, English literature, French, mathematics, social science, Spanish, speech arts and speech pathology.

Early Childhood Education

offers two degree programs. The associate degree enables students to initiate or improve their skills over a two year period.

The competency-based Bachelor of Professional Studies leads to a baccalaureate degree and to New York State Provisional Certification (N-6th grade). This program gives college credit for the "life experience" of persons who work with children in a variety of settings.

Career possibilities:

- Teaching in public and private schools
- Training and personnel programs for private industry, hospitals and government agencies
- Educational consulting firms
- Management consulting firms
- Foundation work

Teacher Education

All programs are patterned upon the competency-based teacher education model of the New York State Education Department. Four year degree programs lead to certification in elementary and secondary school teaching. Two-year degree programs lead to specialization in non-certification areas such as early childhood education and teaching of horsemanship.

Students completing four-year degree programs are eligible to enter graduate school in any area related to their major or minor including special education, counseling, reading and the various disciplines. Field experience is basic to all levels of professional study, and special opportunities for prolonged first-hand experience is available in Pàce's own "Little School" at Pleasantville and in the Reading Center at White Plains.

Business Education

The student of Business Education has a wide choice of concentrations from which to choose, including accounting, computer information science, marketing, retail management, secretarial science, stenography and typing.

Changing concepts and technology continually challenges the educator in this field and present interesting choices for careers.

Two year students can continue into a baccalaureate degree with the goal of preparing for positions in office management.

English Literature, Communications

Although programs on the three campuses vary as to individual character, they do lend themselves to a generalized description. Each is distinctive and well-balanced, combining broad cultural education with practical, skill-oriented material. Courses attempt to develop a student's powers to understand, judge, and write about literature and the life that this literature reflects.

Courses in writing range from basic composition and research to journalism to creative writing and practical report writing. Literature courses explore American, British and European works as well as literature from other cultures such as Russian literature in translation.

Communication courses focus on the theory of television, film and radio in addition to the uses of technical "hardware". Speech courses cover basic oral communications and the application of speech skills to the world of politics, business and the media.

The faculty helps students to become imaginative, to research information with insight, to handle paper work with accuracy and clarity, to edit and rewrite material, and to analyze and interpret reports.

Career possibilities:

Media (newspapers, TV, radio, magazines)
Publishing
Business and corporations
Public relations
Advertising

Equine Studies

Pace University offers a full compliment of courses leading to an Associate in Applied Science Degree in Equine Studies with the option of completing a four year Bachelor of Science Degree in Education. These courses are taught by a qualified dedicated faculty made up of prominent local and nationally known horse professionals and veterinarians. Courses are a careful blend of theory and classroom lecture reinforced by practical application.

Career possibilities:

Riding instructor
Stable manager
Horse publications
Veterinary assistant
Horse show manager

Finance

The study of Finance seeks to develop in students an understanding of general accounting and financial management functions with particular emphasis on financial instruments, financial institutions, and capital structure as they relate to the corporate enterprise.

Students are encouraged to develop insight through the use of analytical tools applied to decision making in the corporate enterprise.

The area's primary objective is to develop a sense of priority and value through the use of accounting and other data bases.

Career possibilities:

Underwriting
Brokerage
Financial manager
Credit management
Commodity markets
Financial analyst
Securities analyst

Foreign Languages

The student interested in languages has a choice of majoring in French or Spanish at each of the Pace campuses, and in addition, the opportunity of studying Italian and German at Pleasantville or New York. Basic courses in Mandarin and Portuguese are available at the New York campus. Course work can lead to certification for elementary or secondary teaching.

It should be noted that students who begin the study of French or Spanish in their freshman year can still major in these subjects with careful planning.

Many students combine language with another major or minor field.

Career possibilities:

Education
Social work
International business
Translator
Bilingual practitioner in health, professions, law, etc.
Librarianship
Government

General Business

A very flexible major, General Business allows students to choose two or three areas of concentration rather than the usual single major. By selecting courses from any business area or from especially approved disciplines in the arts and sciences, students have the opportunity to develop special programs of study that meet specific career goals not covered by other majors.

History

History is an ongoing process subject to the changes of time and custom. The study of history offers a perspective toward the present level of civilization. History majors at Pace are trained in the historical method of analysis and study. They acquire competence in evaluating materials, and they pursue research on topics of special interest such as the historical restorations in New York City and Westchester County.

After receiving a basic grounding in Western and American civilization the history major takes eight or nine specialized courses in fields that include America, Europe, the Middle East, Africa, Asia and certain cultural themes.

Career possibilities:

- Professional historian
- Museum curator
- Education
- Archivist
- Government
- Journalism
- Publishing
- Law
- International business

Human Relations

The Human Relations major concentrates on the application of psychological principles to human problems. Students seek insight into human behavior, and they want to work with people and help them in some way.

Courses emphasize the practical application of theory, self-understanding, helpful skills and knowledge of the way community agencies operate. Students often go on to graduate work in areas such as rehabilitation, personnel and social work.

Optional choices include a two-semester practicum for field work in a setting selected by the student, and independent research projects.

Career possibilities:

- Social service agencies
- Hospitals
- Courts and penology
- Personnel departments
- Probation work
- Education

Human Resources

The Human Resources major at White Plains bridges sociology and psychology with sequences of courses that include mental health, social services, family studies and personnel work.

At New York and White Plains students may specialize in Youth Agency Administration in preparation for careers in such organizations as Boy Scouts, Girl Scouts, and YMCAs.

Career possibilities:

- Social work
- Personnel
- Youth agencies
- Family services
- Volunteer service agencies

Insurance

The Insurance major suits the needs of the student who wishes to specialize in insurance within the framework of the arts and sciences. Topics include the essentials of property, casualty and life insurance, and insurance practice and brokerage. Satisfactory completion of the introductory courses in property and casualty insurance satisfy the educational requirements for admission to the New York State Insurance Broker's Examination. Offered at the New York City campus (evenings only).

Journalism

Students interested in journalism have an excellent opportunity to develop their talents through a major in the field at the Journalism Center on the White Plains campus and through journalism courses at New York and Pleasantville/Briarcliff.

Courses in editing, layout, graphics, photography, advertising and public relations all contribute to the students' general background. Specialized workshops and seminars include investigative reporting, sports reporting, reporting the arts, photojournalism, magazine feature writing, journalistic style and reporting political campaigns.

In addition to internships with local newspapers, the student publications at all three campuses provide invaluable firsthand experience.

Career possibilities:

- Print media
- Television and radio
- Advertising
- Public relations
- Media management
- Publishing
- Business communications
- Photojournalism

Labor Management Relations

This major combines study in economics, sociology, politics and law with a strong foundation in business and the arts and sciences. Those who satisfactorily complete the major have the preparation necessary for entry level positions in the field of industrial relations for business, labor, government or educational organizations. They are also equipped for graduate study in the field.

Management

The Management Program offers students a choice of three majors, each specializing in a different area. The intent of the program is to prepare students for entry-level supervisory positions in business, government and non-profit organizations.

Management The major in Management is for students wishing a flexible curriculum and an opportunity to develop a concentration related to their individual interests and career goals. The following are examples of such concentrations: Human Resource Development, Operations Management, Entrepreneurship, Management Services, and General Management.

Career Possibilities:

Production supervisor
Human resource management
Sales management
Small business management
Administrative services
Public administration

International Management

Fundamental to the preparation for a career with multi-national organizations is the ability to analyze and understand the management of multi-national operations. This major is intended to provide the knowledge and tools needed to develop such expertise. Through elective study and an 18 credit foreign language and culture requirement, students enhance their appreciation of a culture and society in which a multi-national organization may be found.

Career possibilities:

International trade
Entry-level management positions with multi-national organizations

Management Science

Students with a strong background in mathematics are given an opportunity to apply their mathematical skills and the scientific method to the solution of business problems. The specialized courses offered in this major provide knowledge of quantitative approaches to the decision-making process and basic tools of mathematics, statistics and operations research.

Career possibilities:

Management scientist
Operations researcher
Statistician

Marketing

Those with an interest in marketing have a choice of two majors: Marketing or Retail Management. Both areas of study provide a background of the marketing process and help students to develop proficiencies in marketing research, product planning, distribution, pricing, promotion and related marketing activities.

In addition to the broad-based course of study, the marketing major has a wide choice of electives. With the aid of a faculty advisor, he or she can concentrate on specialized areas such as advertising, sales management, marketing research, transportation or communication media.

Career possibilities:

Sales
Product management
Market research
Advertising

Mathematics

Mathematics encompasses the study of numerical and spacial quantities. Recognition of the increasing importance of quantitative methods to our contemporary society underlies the mathematics programs at Pace. Majors in the field relate mathematical ideas and concepts to practical applications.

By combining mathematical learning with a second related concentration, graduates are often in a better position to obtain jobs or continue to advanced levels of study and research. Such second concentrations may include accounting, biology, chemistry, computer science, education, finance and management.

Career possibilities:

Statistical analysis
Computer science
Operations research
Management science
Econometrics
Biomathematics
Actuarial studies
Education

Mathematics Major – Computer Information Systems Minor

This major offers advanced study in mathematics within a business context. The minor in CIS allows students to integrate mathematical concepts with the more practical aspects of computing. In so doing, they develop an understanding of the relationship between the two disciplines and learn how both can

be applied to the analysis and solving of abstract and practical problems. The major is offered at the New York campus.

Career possibilities:

Business
Insurance
Scientific agencies of the government

Medical Technology

The allied health sciences are designed for those seeking careers in medical technology, respiratory therapy and medical records. Such individuals must have a period of clinical training in an appropriate institution in addition to study at Pace in order to complete their degree requirements.

Career possibilities:

Medical technology
Respiratory therapy
Medical records

Nursing

The Associate Degree Nursing Program offered at the Pleasantville campus provides a comprehensive education not only in nursing but in the arts and sciences as well. The basic general education includes nursing theory along with guided experience in community hospitals and health agencies. Such clinical experience coordinates with academic programs.

Those who graduate may sit for the New York State Board Examination in Nursing and upon passing all parts of the examination, become licensed registered nurses.

Individuals who have graduated from associate degree or diploma programs often continue their education in the Baccalaureate Degree (B.S.) Program at Pace. Here, they learn physical and emotional assessment skills, and expand health maintenance, promotion, and restoration techniques. Studies also emphasize leadership and changes in nursing practice. Clinical practice includes rural and urban hospital and community facilities.

Career possibilities:

Professional practice in hospitals, nursing homes, clinics, schools and health agencies.

Administrative positions related to health in industry and business.

Political Studies

The Political Studies Program offered on the New York campus probes the qualities and the experiences of human life and asks how public action can improve them. It explores issues of local, state and national government, of political parties and pressure groups, of international affairs, of war, terrorism, taxing and spending, employment, population, pollution, ideologies and beliefs, education and communications.

Students elect courses in politics to enlarge their knowledge and competence as citizens and to enhance their managerial and public relations skills.

Pace's Model United Nations team won highest honors in national competition in 1976, 1977 and 1978.

Career possibilities:

- Law
- Government
- Civil service
- Diplomacy
- Corporations
- Communications
- Journalism
- Education
- Legislative research
- Lobbying
- Public relations
- Consumer action

A number of the career opportunities above require further study, such as law.

Psychology

By providing a scientific basis for understanding human behavior, psychology gives a central perspective about people which helps organize knowledge in the humanities, arts and sciences. The study of psychology yields insights and understanding into the causes of human behavior and what can be done to help people.

The student who majors in this discipline receives a thorough preparation in psychological principles, methods and fields of application.

Career possibilities:

- Mental health center
- Rehabilitation
- Correctional programs
- Personnel departments

Real Estate

Building on a strong foundation in business and liberal arts subjects, the Real Estate major provides students with both theoretical and practical knowledge. Topics covered include real estate management, financing, taxation, and real estate appraisal. Successful completion of RE 101 Real Estate Practice and Brokerage with a "C" or better grade, satisfies the educational requirements for admission to the New York State Real Estate Broker's License Examination.

Career possibilities:

- Sales
- Management
- Brokerage

Retail Management Science

(also see Marketing)

In this major the student concentrates on the retail phase of the distribution process. Unique to the program is a retail management internship arranged in cooperation with a number of major retail organizations. While required of students majoring in Retail Management, the internship is open to all qualified Pace students who have attained junior status. Students receive compensation for 30 hours of work each week. Because of the limited number of internships available, admission to the program is selective and by application.

Career possibilities:

- Buying and Merchandising
- Advertising
- Public Relations
- Human Resources
- Sales Management

Secretarial Science

A two-year program in Secretarial Science offered at all campuses leads to the A.A.S. degree and prepares students for professional careers as legal or executive secretaries.

In the near future approval is expected for a four-year program

in Office Administration. Graduates with this background can expect to move into positions as office managers and administrative support persons. Those interested should contact the School of Education for information concerning status of the program.

Social Science

The Social Science programs provide an integrated approach to the study of human behavior. Students become familiar with the issues, problems, methods and analytical tools of the social sciences. They gain knowledge of their own and other cultures, and in the process of deciding their own futures, they sometimes participate in improving society.

Students select from the following areas of concentration: sociology and anthropology, political science and public administration or economics.

Internships in local, state and federal government not only offer experience of educational value, but often lead to permanent jobs and careers.

Career possibilities:

- Government
- Social research
- Business
- Social work
- Education
- Community organizations

Speech Communications

Flexibility is a key to the major in Speech Communications with students having a choice of three concentrations that include basic communication skills.

The Organization Concentration requires a number of courses in management basic to entry-level business skills and graduate study.

Speech Arts Concentration includes subjects such as Dynamics of Small Group Communication, Persuasive Speech and Oral Interpretations. These subjects are augmented by liberal arts courses suited to the student's individual interests.

Mass Media or Selling Concentration provides a choice of marketing courses fundamental to careers in advertising, marketing, selling and broadcasting.

Courses in speech-related subjects are available at the White Plains and Pleasantville campuses.

Career possibilities:

- Communication consultant
- Commentator
- Personnel
- Business and financial institutions
- Marketing
- Government

Pathology

The desire to help those who are not fortunate enough to have perfect speech and hearing ability, motivates many students to choose Speech Pathology for their major. The program offers a choice of four specializations: clinical, research, teaching and administration.

Career possibilities:

- Clinician
- Physiological research
- Hospitals
- Research laboratories
- Community and health agencies

Admission to Pace University

Pace University welcomes applications from men and women who have the motivation and desire to benefit from the Pace educational experience. The University seeks a diverse student body composed of persons from a variety of social, economic, ethnic, religious and educational backgrounds. The University complies with federal regulations regarding handicapped students.

The Admissions Committee looks for students who have demonstrated academic ability utilizing factors including the high school record, previous college records, results of the SAT or ACT examination, extra-curricular activities, work experiences and recommendations. Requests for financial aid do not affect the admission decision in any manner.

High School Preparation

	Recommended Units	
English	4	
History/Social Science	3-4	
Mathematics	3-4	2 units are required for admission
Science	3-4	2 units of lab science required for nursing
Academic electives	4-6	
Total academic units	16-18	

It is strongly recommended that applicants to the Lubin School of Business Administration complete as many units of mathematics as possible in high school. Applicants to the School of Nursing are urged to complete as many units of mathematics and science as possible.

Admissions Procedure

Students may enter the University in September, January or June. Pace employs a policy of rolling admissions which allows the Admissions Committee to reach its decision as soon as the student's academic record is complete.

All applicants

1. All applicants to Pace University must complete the enclosed application and forward it along with the \$15 non-refundable application fee to the Admissions Office at the Pace campus they wish to attend.
2. All applicants must arrange to have an official high school transcript sent to the Admissions Office. Applicants who have received the High School Equivalency Diploma should submit their diploma and test scores.
3. Medical certificate required for all applicants to nursing programs.

Advanced Credit

Pace readily accepts college credits earned through various testing programs including the Advanced Placement Program, the College Level Examination Program, and the New York State College Proficiency Program. Credit is also granted for scores of over 600 in specified SAT Achievement Examinations under Pace's Premium for Excellence Program.

Transfer Applicants

1. Transfer applicants should follow steps 1-2 as above.
 2. Official transcripts indicating attendance at any and all colleges must be submitted to the Admissions Office whether the applicant is seeking transfer credit or not.
- A liberal acceptance of transfer credit plus varied and comprehensive degree programs are two of the major reasons students transfer to Pace. The University welcomes transfer students and understands the many factors that influence them in selecting another college. Transfer students are urged to meet with an Admissions counselor to discuss credits and any questions they may have concerning the transfer.

Campus Visits

The Admissions staff is most willing to meet individual applicants and discuss their goals and interests as they relate to the programs of the University. Such interviews are not required nor are they a part of the admissions decision. However, an interview at Pace allows the applicant to visit the campus and evaluate the environment and facilities that Pace has to offer.

Early Decision

Pace University subscribes to the College Entrance Examination Board's first-choice Early Decision Plan. Under this plan, applicants must submit all application materials prior to November 1 and must indicate EARLY DECISION on their application. Early decision applicants must certify that if admitted to Pace, they will attend Pace University and withdraw all other applications.

Early decision applicants will be notified of their admissions decision no later than December 15. Any applicant who is not accepted under Early Decision will be reviewed, without bias, under the regular admissions program.

Early Admissions

High school juniors who have shown strong academic ability and who have received the recommendation of their guidance counselor may enter Pace under the Early Admissions Plan. Selected high school students may also choose to attend Pace for the summer sessions between the junior and senior years. Qualified high school seniors may enroll in courses at Pace during their senior year in high school.

Deferred Admissions

An accepted student may defer his/her enrollment for up to one year as long as the student does not attend another college during this time. Requests for deferred admissions should be made in writing to the Admissions Office. Students who have received this status are reminded that they must re-apply for housing and financial aid. Students who are accepted to the School of Nursing are not eligible for deferred admissions.

Foreign Students

Pace University welcomes students from other nations. Foreign applicants should request the brochure entitled "A Guide for Applicants from Other Nations" from the Admissions Office. Foreign applicants are required to have all necessary documents on file with the Admissions Office by the following deadline: June 1st for the Fall semester and November 1st for the Spring semester.

Adult Students

A large number of "non-traditional" students are enrolled at all campuses of the University. Their concerns and questions are different from those of their younger counterparts. For this reason, it is recommended that all adult students make an appointment with counselors in the School of Continuing Education. In so doing, they will find professional guidance for academic and personal matters that will help enormously in their college careers.

UNDERGRADUATE ADMISSIONS APPLICATION

Pace University is a private university which offers undergraduate students a choice of three campuses: New York City, Pleasantville/Briarcliff, and White Plains.

Please be aware that not all programs are offered on the three campuses. For details please consult the appropriate catalog.

Applications must be accompanied by a non-refundable application fee of \$15; check or money order should be made payable to Pace University. The application fee and all records should be sent to the campus to which you are applying.

Please complete the entire application and return it, together with the fee, to the campus of your choice.

Additionally, each applicant is urged to submit with his application any information which is pertinent. Such information should be submitted in the form of a short autobiography or essay.

I understand that in the course of my association with Pace University I will be given the privilege of taking part in many University activities, both on and off the University premises, including athletics, varsity and intramural, which activities are not a part of my course of study, and that I will also be afforded the opportunity of taking part in optional field trips under University auspices. In consideration of the foregoing privileges, I hereby agree to assume all risks of injury to person, or injury to or loss of property, and to hold Pace University harmless from any and all loss or damage that may be sustained by me by reason of any injury to myself or damage to my property while engaged in any such activities or trips, or in going to or returning from such activities or trips, including athletics, varsity and intramural.

I FURTHER AGREE AND AUTHORIZE Pace University to publish for public relations purposes my photograph or photograph(s) in which I appear.

I understand that admission to Pace University is a privilege and not a right, and I agree that my admission, continuance upon the rolls, and graduation are subject to the right of the authorities of Pace University to require my withdrawal for scholastic, disciplinary, or other reasons, under circumstances deemed sufficient by them.

NOTE: In the event an enrolled student of Pace University enters the military or naval service of the United States, he will be deferred with credit satisfactorily completed, and his tuition will be adjusted on the basis of actual attendance.

Please be sure all of the information requested above has been answered fully and correctly. Omission or falsification of information may constitute grounds for discipline and/or dismissal.

This waiver must be signed by parent or guardian if applicant is under 18 years of age.

SCHOLARSHIP AND FINANCIAL AID

Pace University recognizes that students and their parents are often unable to meet the expenses of a college education without some financial assistance. To the full extent of its resources, the University is committed to sharing this burden with its students, and it participates in all major state and federal financial aid programs.

Information presented here serves as a guideline to more detailed material in the University bulletins. The award schedules shown below are for the two major government programs currently assisting many Pace students.

The Pace University Scholarship and Financial Aid Application, required of all applicants for student aid, is attached. A personal interview with a Financial Aid Counselor may be arranged by calling the Financial Aid Office at the campus to which you submitted your admission application.

YOU MAY QUALIFY FOR FUNDS UNDER BOTH OF THESE AWARD SCHEDULES.

BASIC EDUCATIONAL OPPORTUNITY GRANT PROGRAM

Award Schedule for Pace Students

Adjusted Gross Income	* Estimated Grant
\$0-6,000	\$1,800
8,000	1,675
10,000	1,500
12,000	1,325
14,000	1,155
16,000	990
18,000	825
20,000	665
22,000	510
24,000	355
26,000	200

*For the purpose of illustration, these Grant estimates are based on full federal funding and the following assumptions. The applicant is a full-time dependent student from a family of four with one parent working. The family's net assets are not in excess of \$25,000, and there are no unusual expenses. The family does not receive any form of nontaxable income. Grant eligibility for students from families with other characteristics will vary.

TUITION ASSISTANCE PROGRAM 1980-81 Award Schedule for Pace Students (N.Y. State Residents)

N.Y. State Taxable Income	1st & 2nd Year Award	3rd & 4th Year Award
\$2,750	1,800	1,600
3,000	1,785	1,585
4,000	1,725	1,525
5,000	1,665	1,465
6,000	1,595	1,395
7,000	1,525	1,325
8,000	1,455	1,255
9,000	1,375	1,175
10,000	1,295	1,095
11,000	1,215	1,015
12,000	1,115	915
13,000	1,015	815
14,000	915	715
15,000	795	595
16,000	675	475
17,000	555	355
18,000	415	215
19,000	375	200
less than 20,000	200	200

Undergraduate students who are independent and unmarried with no tax dependents whose net taxable income is \$10,000 or less, receive an \$1,800 TAP award in their first and second years and \$1,600 in their third and fourth years. The award is reduced by 30% of the taxable income over \$1,000. The award will be at least \$200 if the income is \$5,666 or less. No award will be made to students with a taxable income of \$5,667 or more.

FINANCIAL AID CALENDAR**January 1**

Filing of Financial Aid Form with the College Scholarship Service in Princeton, New Jersey begins. Students also file the Pace University Financial Aid Application with the campus of their choice.

March 15

Deadline for new and renewal financial aid applicants to file the Financial Aid Form and Pace University Financial Aid Application for the next academic year. Applications filed after this date will receive second priority in the awarding of University-administered aid, subject to the availability of funds.

March 15 – May 31

Award period for incoming freshman and transfer student for the next academic year.

May 1 – June 1

Suggested period for fall semester applicants to file the Student Payment Application for the New York State Tuition Assistance Program. (New York State residents only.)

Suggested period for fall semester applicants to submit Guaranteed Student Loan Application to the Financial Aid Office.

(Students requiring deferment of payment due to late applications for aid from these programs will be assessed a \$25 fee.)

June 1 – August 1

Award period for upperclass or resuming students for the next academic year.

October 1 – November 1

Suggested period for spring semester applicants to file the Student Payment Application for the New York State Tuition Assistance Program. (New York State residents only.)

Suggested period for spring semester applicants to submit the Guaranteed Student Loan application to the Financial Aid Office.

(Students requiring deferment of payment due to late application for aid from these programs will be assessed a \$25 fee.)

November 1

Deadline for new financial aid applicants to file the Financial Aid Form and Pace University Financial Aid Application in order to receive second priority consideration in the awarding of University-administered aid for the Spring semester.

ESTIMATED DIRECT EXPENSES

	Resident	Commuter
Tuition and Fees (Avg.)	\$3120	\$3120
Books	200	200
Dormitory Room	1225	
Meal Plan (5 days—3 meals per day)	850	

ESTIMATED INDIRECT EXPENSES

Weekend meals	\$350	
Meals and home maintenance		\$850
Personal Expenses	500	500
Transportation	50+	200+
	<u>\$900</u>	<u>\$1550</u>

It should be emphasized that the above totals represent estimates, and that the University will only bill you for tuition, fees and dorm rent, if you are a resident student. The meal plan is optional. An installment plan is available on all campuses.

Scholarship and Financial Aid Application 1980-81

Return to the Financial Aid Office at the campus to which you sent your Application for Admission. All applications and Financial Aid Forms received in the Financial Aid Office before March 15 will receive first priority in the distribution of financial aid.
