FOREWORD1. Objective and Scope.

The Economic Intelligence Handbook, Statistical Summary is a concise reference work in tabular form designed to supply data pertinent to the analysis and assessment of the economic strength of Soviet Bloc countries, individually and collectively. Ideally such a compilation should contain data pertaining to production, plans, capacity, trade, availability, consumption, inventory, stockpiles, and known reserves. Where the present edition falls short of this objective, it is hoped that missing data may be supplied at a future date. Textual commentary on some of the more important data contained in the present Statistical Summary will be found in the Economic Intelligence Handbook now in preparation.

2. Sources and Reliability.

Unless otherwise indicated, data in this publication are ORR estimates contained in the ORR Estimates File as of 1 April 1953. To provide a central source for up-to-date reference data, ORR analysts contribute all economic estimates to this file as they are made and submit quarterly reports revising or confirming previous estimates. Consequently, such estimates are provisional and subject to change and do not necessarily represent the final position of ORR. Where feasible, estimated ranges of accuracy have been stated in percentage terms. Absence of ranges indicates only that no such assessment of reliability has been made. If practicable, a bibliographical supplement relating to ORR estimates contained in this Statistical Summary will be issued at a later date. 25X1

To fill certain gaps in ORR estimates, data available from other sources have been used. CIA has made no attempt to coordinate these data with the originators and has made no evaluation of them. Some obviously are from more reliable sources than others.

3. Boundaries.

Since the Soviet Bloc is relatively new and since significant boundary changes have occurred during the past quarter of a century, comparability of data becomes an important problem in analyzing some time series. Where possible, boundaries have been defined and comparability has been indicated in footnotes to individual tables. The map and territorial changes indicated in the area section (found on pages 1-3) should contribute to the resolution of other questions concerning comparability of data. Apparent discrepancies between officially announced total area figures and those computed on the basis of a summation of territorial changes probably are due to resurveys and to inaccuracy of prewar and wartime reporting.

4. Time Series.

No attempt was made in compiling the present handbook to adjust time series to take account of such problems as homogeneity of product and changes in reporting systems. Any adjustments for such factors known to have been made by analysts originally responsible for the estimates have been indicated in footnotes to individual tables.

5. Rounding.

Data in this report generally have been rounded where rounding would not result in more than a 5-percent difference in the number or in less than two significant figures. The fact that no assessment of the range of accuracy was available for many estimates made determination of the number of genuinely significant figures extremely difficult. Because of this fact and because of limitations of time, data in some tables have not been rounded in accordance with the general policy. More uniform and rigorous rounding procedures are anticipated for future editions of the Economic Intelligence Handbook.

6. Totals.

Totals for the European Satellites and the Soviet Bloc are merely summations of available data. Except in a few clearly indicated cases, no attempt has been made to adjust totals to compensate for gaps in country data. Totals are rounded summations of unrounded data. Hence they will not always agree with the sum of rounded figures appearing under individual country headings.

GLOSSARY OF TERMS AND CONVENTIONS

	<u>Terms</u>
Plan	Official plan data, sometimes derived from officially announced planned percentage increases over announced bases.
Availability	Stocks on hand plus production and imports minus exports.
Consumption	Domestic consumption from stocks, production, and imports.
Inventory	Total stocks on hand: that is, operational stocks plus normal and strategic reserves.
Known Reserves	Reserves underground or uncut.
	<u>Conventions</u>
Asterisks	Asterisks designate data taken from non-CIA sources and not evaluated by ORR.
Blank Spaces	Blank spaces indicate that data are not available.
Underscoring	Underscoring identifies data officially published by Soviet Bloc governments and accepted as estimates by the ORR analysts concerned.

AREA OF THE USSR AND SATELLITES

	Thousand Square Kilometers										
	Bloc	USSR	China	European Satellites	Albania	Bulgaria	Czecho-slovakia	East Germany	Hungary	Poland	Rumania
1937	34,030	21,420	11,562	1,048	28	103	141		93	388	295
1940	33,935	21,881	11,562	492	28	111			160		193
1945	34,717	22,103	11,598	1,016	28	111	128	107	93	312	237
1948 to 1953	32,866 a/	22,113	9,736 b/	1,017	29	111	128	107	93	312	237

- a. This figure does not include the 1,621,000 square miles of Outer Mongolia, separated from China in 1946. If Outer Mongolia is included, the total area of the Bloc is 34,487,000 square kilometers.
- b. This figure is for all of China, (see footnote a). The 36,000 square kilometers of Nationalist controlled Formosa must be subtracted to obtain a figure for Red China. Red China is estimated at 9,700,000 square kilometers.

USSR AREA CHANGES, 1937-1951

Year	Total Area	Territory Gained		Territory Lost	
		Name	Area	Name	Area
1937	21,420,210 a/				
1939	21,614,420	W. Ukraine (E. Poland) b/	93,040		
		W. White Russia (E. Poland) b/	101,170		
1940	21,881,020	Karelia-Kola Front	43,690		
		Bessarabia	45,100		
		N. Bucovina	5,810		
		Estonia c/	16,560		
		Latvia c/	65,690		
		Lithuania c/	59,750		
1941	21,330,110			Bessarabia	45,100
				N. Bucovina	5,810
1944	21,881,020	Bessarabia d/	45,100		
		N. Bucovina d/	5,810		
1945	22,192,600	Tannu Tuva	168,940		
		Kuril Islands e/	10,010		
		S. Sakhalin e/	33,380		
		Ruthenia f/	12,780		
		Klaipeda Region c/	2,820		
		Kaliningrad Oblast g/	15,070	Polish Border b/	21,420
1947	22,113,200	Pechenga (Petsamo) Region	10,600		
1951	22,113,200 h/	Polish Border	480	Polish Border	480

- a. 1/
- b. Eastern Poland was incorporated into the USSR by a USSR-Poland Treaty of August 1945. This treaty adjusted the line of Russian occupation of 1939, returning the area noted to Poland. The US was not a party to this agreement.
- c. The US Government does not recognize the incorporation of Estonia, Latvia, and Lithuania into the USSR. The Klaipeda Region (Memelland) is now included in the Lithuanian SSR.
- d. The Treaty of Peace with Rumania of 1947, signed by the US, confirms the cession of Bessarabia and Northern Bucovina to the USSR.
- e. Japan formally renounced title to the Kuril Islands and southern Sakhalin by the Peace Treaty. These areas are under Soviet administration.
- f. Ruthenia (Subcarpathian Ukraine) was incorporated into the USSR as a result of an agreement between the USSR and Czechoslovakia in June 1945. The US was not a party to this agreement.
- g. Kaliningrad Oblast (northern East Prussia) was placed under the administration of the USSR as a result of the Potsdam Conference of 1945. In the view of the US Government, final determination of sovereignty cannot be made until there is a Peace Treaty for Germany.
- h. Recent corrections in area calculations by Soviet geographers would increase this figure slightly, giving the approximate total land area of the USSR as 22,136,000 square kilometers.

CHINESE AREA CHANGES, 1937-1948 a/

Year	Total Area	Square Kilometers			
		Territory Gained		Territory Lost	
		Name	Area	Name	Area
1937	11,562,184 <u>b/</u>				
1940	11,562,184				
1945	11,598,145	Formosa and Pescadores	35,961 <u>c/</u>		
1946	9,976,944			Outer Mongolia	1,621,201 <u>c/</u>
1948	9,736,288 <u>d/</u>				

- a. Date of Communist control of Mainland - 1949.
 b. Includes "Manchoukuo," Tibet, and Mongolia. 2/
 c. 3/
 d. This figure is for all China. Communist China would be represented by this figure less the area of Formosa, which is under Nationalist control. 3/

ALBANIAN AREA CHANGES, 1937-1948 a/

Year	Total Area	Square Kilometers			
		Territory Gained		Territory Lost	
		Name	Area	Name	Area
1937	28,000 <u>b/</u>				
1940	28,000			(Occupied by Italy)	
1941	42,924	Yugoslavia and Greek Territory	14,924		
1945	28,000			Yugoslavia and Greek Territory	14,924
1947		Saseno	<u>5c/</u>		
1948	28,748 <u>d/</u>				

- a. Date of complete Communist control - 1945.
 b. Area figure rounded to nearest thousand square kilometers. 4/
 c. By the Italian Peace Treaty of 1947, Italy renounced all claim to the island of Saseno in favor of Albania.
 d. 3/

BULGARIAN AREA CHANGES, 1937-1948 a/

Year	Total Area	Square Kilometers			
		Territory Gained		Territory Lost	
		Name	Area	Name	Area
1937	103,000 <u>b/</u>				
1940	110,842 <u>c/</u>	S. Dobruja	<u>d/</u>		7,696
1941	139,092	Thrace and Macedonia			28,250
1944	110,842			Thrace and Macedonia	28,250
1948	110,842 <u>c/</u>				

- a. Date of complete Communist control - 1946.
 b. Area figure rounded to nearest thousand square kilometers. 4/
 c. 3/
 d. The Treaties of Peace with Bulgaria and Rumania in 1947 validated the cession of Southern Dobruja to Bulgaria. The US was a party to these treaties.

1938	88,912			Sudeten Districts Teschen Parts of Slovakia and Ruthenia	51,688
1939	Non-Existent				
1945	127,765	Restored Independence		Ruthenia	12,780
1947	127,827	Bratislava Bridgehead c/	62		
1948	127,827 d/				

- a. Date of complete Communist control - 1948.
 b. Area figure to nearest hundred square kilometers. u/
 c. The Treaty of Peace with Hungary of 1947, signed by the US, provides for the cession to Czechoslovakia of a small area south of the Danube near Bratislava.
 d. 3/

HUNGARIAN AREA CHANGES, 1937-1948 a/

Year	Total Area	Square Kilometers			
		Territory Gained		Territory Lost	
		Name	Area	Name	Area
1937	93,073				
1938	105,073	Parts of Slovakia and Ruthenia	12,000		
1939	117,173	Ruthenia	12,100		
1940	160,273	Transylvania	43,100		
1941	171,773	Yugoslav Provinces	11,500		
1945	93,073			All Territory Gained, 1938-1941	78,700
1948	93,011 b/			Bratislava Bridgehead	62

- a. Date of complete Communist control - 1947.
 b. 3/

POLISH AREA CHANGES, 1937-1951 a/

Year	Total Area	Square Kilometers			
		Territory Gained		Territory Lost	
		Name	Area	Name	Area
1937	388,000 b/				
1938	389,086	Teschen	1,086		
1939	Non-Existent			E. Provinces (to USSR) . 194,110 W. Provinces (to Germany) 194,976 c/	
1945	311,730 d/	Danzig e/ S. East Prussia g/ E. Germany g/ USSR Border	1,914 23,792 76,998 21,420	Teschen	1,036
1951	311,730	USSR Border	480	USSR Border	480

- a. Date of complete Communist control - 1947.
 b. Area figure rounded to nearest thousand square kilometers. u/
 c. This figure, the residual area of Poland after the deduction of the Soviet-occupied territory, is presumably the area occupied by Germany, including both provinces incorporated into the Reich and the "General Government" of Poland.
 d. 3/ The addition of the postwar territorial gains to the area explained in footnote c gives an approximate area of 318,000 square kilometers. This discrepancy probably is due to unreliability of wartime figures.
 e. These areas were placed under Polish administration by the Potsdam Conference of 1945. In the view of the US Government, final determination of sovereignty over these areas will not be made until there is a Peace Treaty for Germany.

RUMANIAN AREA CHANGES, 1937-1948 a/

Year	Total Area	Square Kilometers			
		Territory Gained		Territory Lost	
		Name	Area	Name	Area
1937	295,000 b/				
1940	193,294			Bessarabia N. Bucovina Transylvania S. Dobruja	45,100 5,810 43,100 7,696
1941	244,204	Bessarabia N. Bucovina	45,100 5,810		
1944	193,294			Bessarabia N. Bucovina	45,100 5,810
1945	236,394 c/	Transylvania	43,100		
1948	237,384 d/				

- a. Date of complete Communist control - 1947.
 b. Area figure to nearest thousand square kilometers. u/
 c. This figure for 1945 represents the rounded figure given for 1937 plus gains and minus losses. If accurate area data were available for wartime changes, this figure should agree with the official figure for 1948. No territorial changes occurred between 1945 and 1948.

a. ^{6/}

b. Planned

c. Increased by Supreme Soviet 1.1 billion rubles.

BUDGETS FOR FISCAL YEAR ENDING 31 DECEMBER 1952 ^{a/}

Bloc	Billion \$ US									
	USSR	China ^{b/}	European Satellites	Albania	Bulgaria	Czecho- slovakia	East Germany	Hungary	Poland	Rumania
Total Budget	127*	5.0*		0.204*	1.03*	6.47*	7.59* ^{c/}	3.60*	15.7*	2.73*
Military Budget	28* ^{d/}	3.0*		0.022*	0.110*	0.45*		0.502* ^{e/}	1.50* ^{f/}	0.473*
Military Budget as Per Cent of Total	0.022*	0.060*		0.011*	0.011*	0.007*		0.011*	0.010*	0.017*

a. ^{5/} All budget figures were converted to dollars at official exchange rates. Where more realistic rates are available, they indicate that use of official exchange rates results in an upward bias.

	Official Rate	More Realistic Rate
USSR - 1 ruble	\$0.25	
China - 1 Yen Min Piao	0.00004	
Albania - 1 lek	0.02	
Bulgaria - 1 lev	0.15	
Czechoslovakia - 1 crown	0.02	\$0.0057
East Germany - 1 mark	0.24	0.05
Hungary - 1 forint	0.085	0.04
Poland - 1 zloty	0.25	
Rumania - 1 leu	0.09	

b. 1952. No accurate data are available for Communist China; the above estimates are based on fragmentary data.

c. This figure is the proposed budget.

d. The figure shown is announced military expenditure; the addition of concealed expenditure would result in a substantial increase.

e. Expenditures by the State Security Authority are included.

f. This figure is not believed to provide for security forces, the air arm, or pre-military organizations.

a. 1928-1940, postwar boundaries excepting territories acquired from Czechoslovakia, Germany, Rumania, and Poland; 1941-1952, present boundaries.

b. Manchuria is included but not Outer Mongolia, Sinkiang, Sikang, or Tibet. Inventory averages for Outer Mongolia were as follows: prewar - 1.7 million, postwar - 1.6 million. The abrupt changes indicated in the numbers of horses are the result of estimation based on incomplete data.

c. Actual changes occurred more gradually.

d. 1928-1940, non-West Germany, i.e., 1937 Germany minus 1951 West Zone; 1941-1952, Soviet Zone.

e. Planned production was 15 million*. 9/ 10/

f. USSR - January 1956; Bulgaria - 1953 7/; Czechoslovakia - 1953 7/; East Germany - 1955 7/; Hungary - 1954 7/; Poland - 1955 7/ 11/; Rumania - 1955. 7/

- a. 1928-1940, postwar boundaries excepting territories acquired from Czechoslovakia, Germany, Rumania, and Poland; 1941-1952, present boundaries.
b. The above figures include cattle and buffalo for China and Manchuria but not Outer Mongolia, Sinkiang, Sikang, or Tibet. Inventory averages for Outer Mongolia were as follows: prewar - 2.1 million; postwar - 1.4 million. The abrupt changes indicated in the numbers of cattle and buffalo are the result of estimation based on incomplete data. Actual changes occurred more gradually.
c. 1928-1940, non-West Germany, i.e. 1937 Germany minus 1951 West Zone; 1941-1952, Soviet Zone.
d. Planned production was 65 million * 9/
e. Planned production was 3.9 million * 9/
f. Planned production was 7.2 million * 10/
g. USSR - January 1956; Bulgaria - 1953 7/; Czechoslovakia - 1953 7/; East Germany - 1955 7/; Hungary - 1954 7/; Poland - 1955 7/ 11/; Rumania - 1955. 2/

a. Ginned cotton as a percentage of raw cotton averaged 29.33 per cent during the period 1938-1940. Estimates of raw cotton production for the years 1941-1945 were obtained as follows: known ginned - 29.33; as unknown raw - 100.

b. Planned production for 1950 was 3.1 million metric tons.

c. Plan data are for the following years: USSR and Rumania - 1955; China and Bulgaria - 1953; Hungary - 1954.

a. Grease weight.

b. 1928-1940, postwar boundaries excepting territories acquired from Czechoslovakia, Germany, Rumania, and Poland; 1941-1952, present boundaries.

c. Manchuria is included but not Outer Mongolia. The average production of Outer Mongolia, 1946-1950, was 6,200 metric tons.

d. 1928-1940, non-West Germany, i.e., 1937 Germany minus 1951 West Zone; 1941-1952, Soviet Zone.

- a. Lignite or brown coal historically represents less than 1 per cent of total coal output in China. It is included with production of anthracite and bituminous coal, owing to the fragmentary nature of available data pertaining to brown coal extraction.
- b. Planned production of brown coal was 83 million* metric tons. 12/
- c. Planned production was 58,500 metric tons.
- d. Planned production quotas for 1951 and 1952 were 29,000,000 and 31,121,000 metric tons, respectively.
- e. Planned production was 145,126,000* metric tons. 9/
- f. Planned production of lignite and hard coal was 5,700,000* metric tons. 7/
- g. Planned production was 171,400,000 metric tons.
- h. Planned production was 5,495,000 metric tons.
- i. Bulgaria - 1953 9/ ; Czechoslovakia - 1953; East Germany - 1955; Hungary - 1954; Poland - 1955; Rumania - 1955. 15/

Plan ^{e/}										480	3,900

a. Natural gas excludes shale gas. Reported prewar figures for the USSR in metric tons have been converted to cubic meters on the assumption that 865 cubic meters of gas is equivalent to 1 metric ton of oil in British thermal unit (Btu) content. The Btu content of natural gas is assumed to be 37,958 Btu per cubic meter. These are US factors.

b. ^{15/}

c. Planned production was 8,400 million* cubic meters. ^{12/}

d. Planned production was 175 million* cubic meters. ^{12/}

e. Poland - 1955 ^{2/} ^{11/} ; Rumania - 1955. ^{2/}

PRODUCTION OF MANUFACTURED GAS ^{a/}

- a. Metal content of Bulgarian ore is believed to be approximately 60 per cent.
b. Czechoslovakian ore is assumed to have a metal content of approximately 33.33 per cent. This assumption was the basis for deriving ore figures from metal content data for the following years: 1928-1929 ^{17/}; 1930-1936 ^{24/}; 1939-1944. ^{16/}
c. Metal content data of Hungarian ore is assumed to be approximately 37 per cent. This assumption was the basis for deriving ore figures from metal content data for the following years: 1928-1929 ^{17/}; 1930-1936, 1938-1939 ^{24/}; 1941-1944. ^{16/}
d. Polish ore is assumed to have a metal content of approximately 33.33 per cent. This assumption was the basis for deriving ore figures from metal content data for the following years: 1928-1929 ^{17/}; 1930-1937. ^{24/}
e. Rumanian ore has a metal content of from 30 to 60 per cent. The medium of this range, 45 per cent, was used as the basis for deriving ore figures from metal content data for the following years: 1928-1929 ^{17/}; 1930-1937 ^{24/}; 1941-1943. ^{16/}
f. ^{7/}
g. Planned production was 40 million metric tons.
h. Planned production was 750,000* metric tons. ^{7/}
i. Planned production was 1,060,000* metric tons. ^{7/}
j. Bulgaria and Czechoslovakia - 1953 ^{7/}; East Germany - 1955 ^{7/}; Hungary - 1952; Poland - 1955 ^{7/} ^{11/}; Rumania - 1955. ^{7/}
k. 1952.
l. 1950.
m. Early 1952. Estimated range of accuracy, plus or minus 11 per cent.
n. It is estimated that 1.5 million to 2.0 million metric tons of ore were stockpiled annually in the years 1950-1952.
o. 1952. ^{25/}

- a. Bulgarian ore is believed to have a metal content ranging from 35 to 50 per cent. 1928-1935. 24/
b. Czechoslovakian ore is believed to have a metal content of approximately 50 per cent.
c. Hungarian ore is assumed to have a metal content of approximately 40 per cent. This assumption was the basis for deriving ore figures from metal content data for the following years: 1928-1929 11/; 1930-1933, 1935-1938. 24/
d. Rumanian ore is assumed to have a metal content of approximately 35 per cent. This assumption was the basis for deriving ore figures from metal content data for the following years: 1928-1929 17/; 1930-1937 24/; 1939-1943. 16/
e. This figure is for a World War II year, not necessarily 1944, and has an estimated range of accuracy of plus or minus 9 per cent.
f. This figure is for a World War II year, not necessarily 1944.
g. Estimated range of accuracy, plus or minus 11 per cent.
h. Planned production was 4.2 million metric tons.
i. The metal content of the ore is believed to be approximately 35 per cent.
j. Early 1952. Estimated range of accuracy, plus or minus 14 per cent.
k. Stockpile accretions are estimated to range from 1.2 million to 1.4 million metric tons annually during the period 1950-1952.

Plan h/											
Capacity, 1952-1953 i/			1,067*			60*	1,700*	707*	170*		110*

a. Only production of the Yaroslavl tire factory has been observed for the period 1939-1941. Approximate annual capacity, based on observed production, was as follows:

Year	Minimum Estimate	Estimate of Maximum Likelihood
1939	485,000	574,000
1940	678,000	848,000
1941	155,000	194,000

- c. The 1942 production of two factories, Yaroslavl and Omsk, has been observed. Estimates of combined annual productive capacity are as follows: minimum estimate - 406,000; estimate of maximum likelihood - 628,000.
- d. These data are the combined estimates of maximum likelihood of annual productive capacity, based on observed production of the Yaroslavl and Omsk factories. Minimum estimates are as follows: 1943 - 1,728,000; 1944 - 2,268,000.
- e. This figure is an estimate of maximum likelihood based on observed production of five factories, Yaroslavl, Omsk, Red Triangle, and factories using the trademarks "T" and "Y." The minimum estimate equals 2,088,000.
- f. 2/
- g. Planned production figures for 1951 and 1952 were 596,000 and 730,000 tires respectively.
- h. Bulgaria and Czechoslovakia - 1953 7/; East Germany - 1955. 7/

- a. This is based on a consuming population of 20,000,000 people at the US rate of consumption in 1952.
b. Imports from the US were negligible for 1951 and 1952, being limited by US licensing requirements to some gift packages only.
c. West is defined as all countries outside the Soviet Bloc excepting the US. In addition, 15 metric tons of miscellaneous antibiotics were imported from the West.

- a. Includes butter, beef, lamb, mutton, goat, and pork fats, except where otherwise indicated.
b. Non-creamery butter is not included. 1928-1940, includes Estonia, Latvia, and Lithuania; 1940-1952, postwar boundaries.
c. Includes Manchuria; pork fat only. The abrupt changes indicated in the production of animal fats are the result of estimation based on incomplete data. Actual changes occurred more gradually.
d. 1928-1940, non-West Germany (i.e., 1937 Germany minus West Zone 1951); 1941-1952, Soviet Zone only.

- a. Railroad rail production in the USSR is approximately 85 per cent of total rail production.
b. This figure is for the pre-World War II period, not necessarily 1938.
c. Estimated range of accuracy, plus or minus 1 per cent.
d. Estimated range of accuracy, plus or minus 7 per cent.
e. Estimated range of accuracy, plus 20 per cent or minus 10 per cent.
f. The figure for 1949 includes 2,000 metric tons of narrow-gauge rails and 12,000 metric tons of standard-gauge rails; the figure for 1950 represents heavy rail production with some accessories included.
g. Estimated range of accuracy, plus or minus 16 per cent.
h. Planned production was 1,350,000 metric tons of rails.
i. Estimated range of accuracy, plus or minus 3 per cent.
j. Estimated range of accuracy, plus or minus 2 per cent.
k. Estimated range of accuracy, plus or minus 8 per cent.

a. Plates and sheets are listed above as a single category because separation is impossible on the basis of available information. Carbon steel plates are considered to be those flat, hot-rolled, finished steel products that come within the following dimensional and weight limitations:
 0.180 to 0.230 inches thick, at least 48 inches wide;
 0.230 inches or thicker, at least 6 inches wide;
 7.53 to 9.62 pounds, at least 48 inches wide;
 9.62 pounds or heavier, at least 6 inches wide.

Sheets are defined as flat rolled material, 3/16 inches or less in thickness and at least 24 inches in width.

- b. Data are for pre-World War II period, not necessarily 1937.
 c. Estimated range of accuracy, plus or minus 1 per cent.
 d. Estimated range of accuracy, plus or minus 6 per cent.
 e. Estimated range of accuracy, plus or minus 14 per cent.
 f. Estimated range of accuracy, plus or minus 7 per cent.
 g. Estimated range of accuracy, plus or minus 15 per cent.
 h. Estimated range of accuracy, plus or minus 3 per cent.
 i. Estimated range of accuracy, plus or minus 8 per cent.
 j. Estimated range of accuracy, plus or minus 2 per cent.
 k. Data are for plants controlled directly by the Ministry of Smelting and Ore Mining.

- a. Includes tube testers, oscilloscopes, signal generators, and frequency meters.
b. Bloc production is 1.4 times USSR production.
c. Totals shown for the European Satellites represent the difference between the USSR and total Bloc production, see footnote d.
d. Albania, Bulgaria, Poland, and Rumania account for approximately 10 per cent of total European Satellite production.

Plan i/						1.3*		13*	10*	18*	5.2

a. See next table for equivalent 2-axle units.

b. Chinese production of freight cars is believed negligible.

c. The figure for 1946 assumes that all production was of 2-axle units. To convert the physical units shown in the table for the years 1947-1952 to equivalent 2-axle units, subtract 5,500. Multiply the remainder by 2, and add the result to 5,500. This is the reverse of the process used in deriving the physical units shown from a table of 2-axle equivalent units. It is based on the fact that yearly additions to inventory indicate 5,500 2-axle cars per year are produced for Polish use. Additional production is of 4-axle cars for the USSR.

d. 12/

e. Estimated range of accuracy, plus or minus 5 per cent. In addition, 3,310-3,557 narrow-gauge cars were produced in 1950.

f. Planned production.

g. Estimated range of accuracy, plus or minus 9 per cent.

h. Estimated range of accuracy, plus or minus 7 per cent. In addition, narrow-gauge cars were produced as follows: 1951 - 1,290-1,610; 1952 - 735-935.

i. Bulgaria - 1953 12/; East Germany - 1955 12/; Hungary - 1954 12/; Poland - 1955 12/; Rumania - 1955.

a. Includes telephone central station equipment such as carrier terminals, carrier repeaters, telegraph and teletype equipment, but excludes wire and cable.

b. Satellite production is believed to be equal to approximately 40 per cent of USSR production.

c. Negligible production by Albania, Bulgaria, Poland, and Rumania accounts for 10 per cent of Satellite production.

d. Estimated after allowing 10 per cent of Satellite production for Albania, Bulgaria, Poland, and Rumania.

- a. Data indicated as official probably represent only facilities available for public use.
b. Data are for all of Germany. No East-West breakdown is available. Data for 1928-1929 apparently include telegraph line and wire; data for 1932-1937 include wire and cable used for telegraph and long distance telephones reported to be 667,000 kilometers in 1938.
c. 1927. Data for 1928 are unavailable. It is probable that data represent only facilities administered by the Ministry of Communication.
d. Interurban and international facilities only.
e. Excluding the 9-province long-distance system and South China.

- a. Line is used to indicate total distance spanned by one or more wires. Data indicated as official probably represent only facilities available for public use.
- b. Data are for all of Germany. No East-West breakdown is available; apparently includes telegraph line and wire.
- c. Urban facilities only. Last year for which interurban and international facilities are known is 1927 when the figure was 89. It is probable these data represent only facilities administered by the Ministry of Communications.
- d. Interurban and international facilities only.

- a. Data indicated as official probably represent only facilities available for public use.
 b. It is probable that data represent only facilities administered by the Ministry of Communications.
 c. Data are for all of Germany. No East-West breakdown is available.
 d. 1927. Data probably cover only the state system.

- a. It is probable that data indicated as official represent only telephone conversations handled over public facilities. The estimated range of accuracy for the USSR is plus or minus 7 per cent. The estimated range of accuracy for the Satellites is plus or minus 12 per cent.
- b. Interurban and international telephone conversations on state and private systems.
- c. Data are for East Germany, excluding Berlin. It is estimated that East German interurban and international telephone calls represented 7 per cent of such calls for all Germany during the period 1947-1951. Figures shown above for the years 1928-1938 were obtained by applying this ratio to data for prewar Germany.
- d. It is probable that the data represent only telephone conversations handled over facilities administered by the Ministry of Communications.

- a. Data shown represent offices available to the public.
 b. It is probable that these data represent only facilities operated by the Ministry of Communications.
 c. Depot offices are not included: 10,505 depot offices are reported for 1923.
 d. Data on depot offices are not available. The number of depot offices is believed insignificant.
 e. Depot offices are not included. Available depot office data follow: 1928 - 1,800; 1929 - 1,698; 1930 - 1,564.
 f. 1928-1938, prewar Germany; 1948-1950, West Germany only. Available data indicate that, in addition, there were the following depot offices: 1928 - 4,461; 1929 - 4,140; 1930 - 3,114.
 g. Apparently, depot offices are not included in data for 1928 and 1929. Available data indicate that there were approximately 10,000 depot offices in 1925 and 1926.

1952		<u>j/</u>									

a. Up to and including 20 mm.

b. Figure includes only rifles and pistols.

c. 5/

d. All over 20 mm. unless otherwise indicated.

e. Data include artillery 75 mm. and over. The figures are for a World War II year, not necessarily 1944.

f. Data include artillery 75 mm. and over.

g. 5/ Including tank guns and assault guns, 22,500 pieces were produced in 1952.

h. Assembly only.

i. Data include 20 mm. and under. Estimated range of accuracy, plus or minus 50 per cent.

j. It is estimated that artillery ammunition was produced during 1952 in the following types and quantities: 155 mm. to 305 mm. - 255,000 rounds; 25 mm. to 122 mm. - 11,745,000 rounds. The estimated range of accuracy is plus or minus 50 per cent.

a. This figure is for a World War II year, not necessarily 1944.

b. These CIA estimates are higher than the 6,000 current production estimate carried by G-2. 5/

c. 1951. CIA figures are for USSR produced tanks and assault guns in the Bloc as of 31 December 1951. No estimate has been made concerning their distribution. G-2 figures are all from the same source. 5/

d. Included in this figure are 565 tanks which were not manufactured in the USSR. They are old tanks produced in wartime Germany, the US, and other non-Bloc countries. 5/
