Subject

Follow-up to NSDD-96 in the IG-IEP

The IG-IEP has been tasked with developing information and policy options for consideration by the SIG-IEP in implementing NSDD-96 on the management of the international debt problem. One working group has already been formed to examine the role of U.S. Government guarantee programs in managing the international debt problem.

Marc Leland will chair a meeting of the International Debt IG-IEP next Tuesday, August 2, to examine the ways in which protectionist practices of developed and developing countries relate to the handling of the international debt problem. The meeting will be held at 11:00 a.m., in Room 4121 of the Main Treasury Building. Attendance will be principal, plus one.

David E. Pickfold Executive Secretary

National Intelligence Council

MEMORANDUM FOR: Director of Central Intelligence

FROM:

Maurice C. Ernst NIO for Economics

SUBJECT:

Policy on the LDC Debt Problem

REFERENCE:

NSDD #96, 9 June 1983

- 1. During the preparation of the NSDD on the international debt problem, a split developed between Treasury and the NSC Staff on how to handle strategic planning of policy options that might require substantial modification of the current ad hoc approach. In order to accommodate Treasury's legitimate concern that information on formal contingency planning would leak, and consequently would scare financial markets, it was agreed that a small group with representatives from the most concerned agencies would be established under the general sponsorship of the SIG-IEP, but without formal status or agenda. After a good deal of foot-dragging on Treasury's part, the group is finally going to meet next Monday, 1 August. Representation apparently will be at about the Assistant Secretary level. Harry Rowen will receive the invitation as your representative. No formal memoranda apparently will be circulated.
- 2. My impression is that the group is to examine the debt problem in a broad, relatively long-term framework so that the Administration can consider how various programs (financing, trade, etc.) may need to be modified, or if necessary new programs created, to deal with major contingencies as they arise. Specific policy recommendations will continue to develop through the IG and SIG-IEP.
- 3. CIA clearly has an important role to play in support of this effort. The NIE on the medium term political implications of the debt crisis, which is now in train, will address some of the most critical issues which have so far been untreated in the interagency work on the debt problem. DDI monthly assessments on the debt problem and building block analysis of major trends affecting the debt problem, such as the response of LDC exports to OECD economic recovery, also will be useful.

Maurice C. Ernst
