29 January 1959

MEMORANDUM FOR: Director of Administration
ATTENTION: Personnel Officer
SUBJECT: Intelligence Section Staffing

1. Request authorization for an additional GS-11 slot in the Intelligence Section. This will not increase the overall T/O for this section inasmuch as one GS-9 slot is being eliminated.

2. The need for the GS-11 authorization stems from the assumption of additional intelligence support responsibilities related to the Air Support Branch. These requirements are peculiar to Air Support Branch activities and have not previously been required in support of CHALICE. They include such requirements as maintaining of detailed radar and air order-of-battle

[redacted] graphic presentation of flight plans for these activities; and maintenance of intelligence records related to these operations.

3. This slot authorization presently exists in the Air Maritime Division and is filled by a Chief Warrant Officer. It is proposed that the slot authorization be transferred from AMD to DFD, and that its present incumbent be retained.
