2. Since the number of reporting personnel is stringently limited and the number of effective observing hours of this personnel is further reduced by Soviet obstruction and surveillance and the danger of compromise it is essential that we in Washington ask only for high priority information which will be used. In the past collection demands have greatly exceeded collection abilities. This decreases the probability that items reported are those most needed and tends to discourage field personnel. Since many of the areas to be [redacted] covered in the last travel season and these reports may be currently reaching the consumers it is urged that special efforts be made to avoid asking questions for which answers are available in Washington. Enclosed is a list of all reports known to this office covering US Embassy Travel during September and October. This supplements the list forwarded to you on 1 November 1954.

3. The following points should be noted when preparing contributions for folders:

25X1A2g

- b. Targets which are not described with sufficient precision to allow identification by a traveler will not be included. Proper location should include, where possible:
 - (1) A kilometer reading for items along a route and not in towns for which there exist US Target Complex Mosaics or Charts, series 25.
 - (2) Location by coordinates and sheet number for items in areas covered by US Target Complex Mosaics or Charts, series 25. Where an MR or CR number exists on annotated mosaics and charts it will replace coordinates.
 - (3) A street address where possible.
 - (4) Any additional information which may assist the traveler.
- c. Where no information is known the guide, "General Observations Applicable to All Journeys - October 1953", currently under revision, may be used. When some information exists here, it is necessary to specify the particular features of a target which are desired. This enables the traveler to concentrate on filling the gaps and avoids reporting information already held.
- d. It is requested that contributions be submitted in the following form.
 - (1) Route Journey

Km Reading	Item and Description	Location	Requirements
	(2) Town Brief		

Mosaic or Chart No or Coord	Item and Description	Location	Requirements

- 4 -

e. Items of unusual urgency and importance may be noted with an asterisk. This should be done with restraint and confined to the most exceptional targets.

4. As agreed it is expected that Air Force will supply four copies of US Target Mosaic and Charts covering areas under consideration and Army will supply four copies of the 1/250,000 maps covering routes.

5. The names of additional routes and town briefs to be revised or prepared in April and May will be forwarded to you by the middle of February.
