DRAFT

WAR PLANS SUMMARY OF DD/I OFFICES

ONE:

ONE's plan:

Calls for less broad country estimates and an increase in special and crash estimates on narrower areas;

Suggests possible publication of a periodic global review with short term projections and support of post-hostilities planning;

Envisions increased military contributions to estimates and, therefore, an assignment of military representatives from service agencies to ONE with no increase in the Board;

Pictures the national estimates mechanism as being hampered by communications problems;

Poses the problem of accomplishing national estimates production by liaison or briefer estimates transmittable over wire communications;

Mentions the possibility of establishing cadres on D-day at the relocation sight based on the assumption of eventual Washington attack.

OSI

OSI's plan:

Emphasizes scientific intelligence production on war-making potential and greater emphasis on the application of science to war making;

Would increase coordination inter-agency-wise by OSI;

Calls for determination of theater commander's decision with

25X6

[REDACTED] /27 : CIA-RDP61S00750A000600090068-1

Provides overseas personnel for inspection of captured equipment and interrogation of captured personnel;

Calls for strengthening the development of new collection techniques applicable to combat situations.

OCI:

OCI's plan:

Continues its current intelligence function, the support of the DCI briefing responsibility to the NSC and the function as CIA COMINT staff;

Calls for the establishment of a CIA current intelligence center and a Presidential Situation Room;

Personnel-wise, anticipates going from one to three shifts and

25X1A

[Redacted]

Would test their war plans by trial evacuations;

^{would}
~~They plan to~~ train their military reservists and the components

for the CIA center and Presidential Situation Room;

States the need to arrange disposition of NIC and overseas personnel;

Calls for coordination with CIA elements, IAC, NSC and NSA.

ORR:

ORR's plan:

Expects basic organization to remain unchanged;

25X1B

Dispatch [Redacted] teams to

the theaters;

25X1C

Would establish intelligence officer positions in [Redacted]

25X1C

-3-

Assumes at least one year global war and that DCID 15/1 and IAC-D-21/1 will still be in effect;

25X1A

Would give cartographic support to the President's Situation Room;

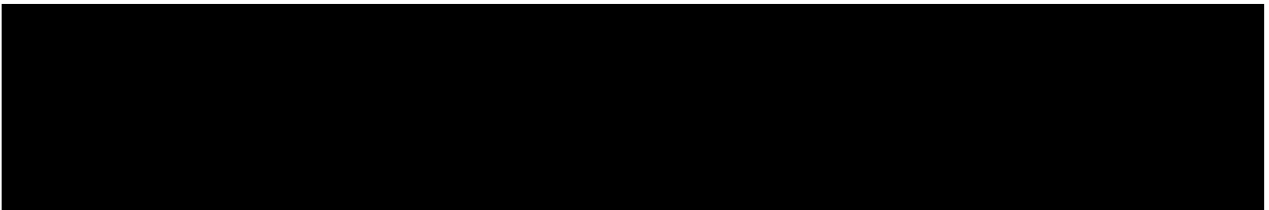

Space-wise would double up ORR personnel and begin two shifts. (In the long run they would try to work back to present space allocations);

In training, calls for trial evacuations and training analysts in photo interpretation and special materials along with other reservists;

Calls for coordination of ORR war plans with the IAC/EIC area,

25X1B

OCR:

OCR gave its divisions three assumptions on which to plan: a) use of present quarters with 30% staff increase, b) evacuation of present quarters with limited files and equipment and most of present staff, c) relocation with heavy loss of personnel and dependence on Vital Records.

Biographics: would continue its same function with additional records to support military field interrogation centers and U.S. citizens engaged in technical development work;

-4-

Biographics continued:

Expects to rely on military intelligence to a larger degree as normal overt sources are reduced;

And would reduce biographic coverage on non-enemy areas.

Graphics: needs to obtain more film and photos through ONI and Air Force Liaison and through domestic field offices;

Requests more film and equipment in the relocation center in order to function effectively there;

Requires no additional space;

Industrial: anticipates additional requirements from wartime established agencies and US/Allied organizations;

Needs to obtain the return of overseas Government files for exploitation purposes;

States they will need more files and equipment than are at present at the relocation center.

Expects communications problem to increase;

Requires examination of the effect of an increase in military machine and library functions from the point of view of possible decrease in need for CIA services;

Expects present space will be adequate by going on extra shifts.

Liaison: will establish full-time branch liaison offices in the IAC agencies and the new agencies;

Expect to collect new information from the new agencies;

Assume that intelligence requirements will become specific

- 5 -

Liaison continued:

Expect to use Cross Reference Index of Requirements centrally for the intelligence community to improve Washington coordination of requirements on the field;

Expect to increase liaison with foreign governments.

Library: will increase bibliographies and research aids and reconstitute coverage of extra-library facilities in CIA, other Government agencies and private institutions;

Expect to lose publications procurement from overseas and to increase contact with the military for such collection;

25X1C

Machine: plans an increase in equipment to meet more requests more speedily.

Special: expects to receive more material and will need more people and machines to speed its work.

Although with some variance between divisions, OTR plans considerable use of OTR courses and on-the-job training of reserves.

OO:

OO expects to continue its present mission and has its headquarters relocation set. It indicates need of guidance on whether or not it should plan for possible attack on both overseas and headquarters installations. In the absence of guidance it has assumed the answer is yes.

25X1B

25X1B

-6-

[REDACTED]

Have discussed this question with the military and assume logistic support will be provided for the teams by the military.

25X1A

[REDACTED]

Plans that the field installations will not be taken over by theater commanders;

Will centrally control the field installations from Washington;

Will continue to use military communications channels and assume leased facilities will remain available;

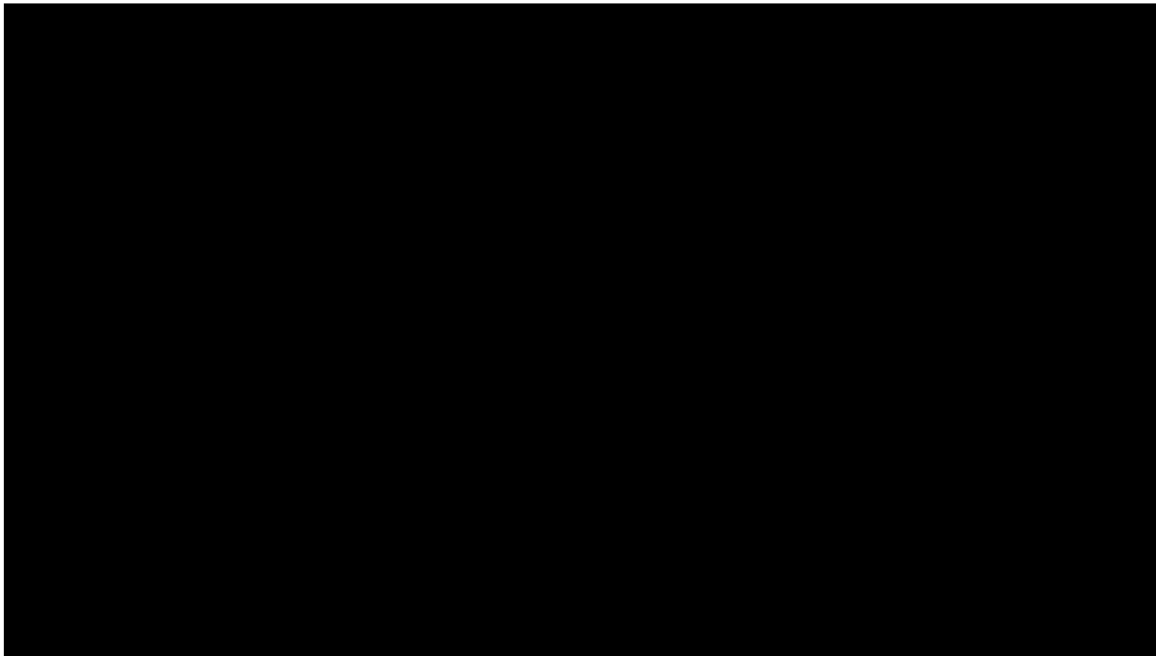

Expects logistic support overseas from the military;

Plans that the theater commanders' need [REDACTED] will coincide with Washington's need; STATSPEC

Plans to continue operations in neutral countries;

Expects the military situation will preclude establishing re-location sites near the field units;

STATSPEC

 continued;

Has planned for new situations to ^{of}tend their coverage and provide fallback facilities;

Plans to ask Logistics to provide the equipment necessary to war;

Plans a six month stock of critical items;

25X1A

FDD: will continue its present mission with an increase in ASDIC representation and in support of US/Allied agreements ⁱⁿ new Agencies;

States their organization is sufficiently flexible to be altered at any time according to requirements.

25X1C

Expects an increase in the support of other agency components (covert intelligence and operations, Logistics Office, etc.);

Expects an increase in defector workload;

Plans a significant increase in the  responsibility; 25X1A

25X1A Although the Chief will move  sufficient staff will

25X1A relocate  to continue operations;

Field offices have not yet completed evaluation plans but are being given guidance;

25X1A

[REDACTED] continued:

Is still in consultation with Office of Communications on alternative field communications set up which presently would be undertaken by commercial lines.

OBI:

OBI states the NIS program will provide basic intelligence information (which they state was needed and missing through most of World War II) plus use of NIS backstopping files;

Expects NIS machinery to serve as a mechanism to produce special basic intelligence materials;

Expects to support post-hostility occupations and to up-date NIS by World War III changes;

Expects private printing arrangements will be necessary to supplement Government printing of NIS.
