

*file***Office Memorandum • UNITED STATES GOVERNMENT**

TO : SA to Ch/G/RR

DATE: 19 December 1958

FROM : Chief, D/GG

25X1A6a

SUBJECT: Requirement Support for [REDACTED]

Reference: Memorandum of Request dated 21 November 1958

1. The following materials are forwarded in response to the reference request:

- a. Towns of Priority interest for Satellites and USSR (6 copies each)
- b. Areas of Interest in the Satellites and USSR, with reasons for interest (6 copies each)
- c. CIA Requirements for Urban Area Studies (6 copies)
- d. Guide to the Collection of Intelligence on Soviet Topographic Maps Through Observation and Elicitation (1 copy)
- e. Hungarian Cartography, 1958 -- article to appear in MR-56, now in Reproduction (1 Thermofax copy).

2. The Special Research Branch reports that it has not produced any research reports on the organization and structure of Soviet geodesy and cartography since the issuance of External Research Report No. 8, dated June 1954, which is attached. There are, however, 3 attachments herewith relating to more recent research concerning Soviet geodesy and cartography. The first is a map that outlines new surveys being undertaken in triangulation. This may be of interest for use as background in the possible debriefing of knowledgeable sources. The second item shows a revision of the organization of Soviet mapping. It does not, however, include the Soviet Naval hydrographic organizations. The third item consists of a series of organizational outlines of 4 typical types of map factories in the USSR. This also may be of interest for possible debriefing purposes.

3. With further reference to the third paragraph of the memorandum of request, it is assumed that the 501st Engineering Group has access to the NIS Chapters IX and Sections 19 of Chapter I, dealing with mapping agencies and programs.
