18 March 1963

MEMORANDUM FOR: Contracting Officer, OSA

25X1A

ATTENTION :

SUBJECT : Action on Referenced Contract

REFERENCE : (1) Task Order No. 5, Contract No. BB-425, Gamma I and Gamma II Printer Design Study, Itek, Lexington, Massachusetts
(2) Task Order No. 6, same contract
(3) Memorandum dated 9 October 1962 (BYE-4501-63)

BB425
T.O. #5

1. Action relative to paragraph 3 of above referenced memorandum has been accomplished and the evaluating team and contract monitor are almost in a position to submit a finalized work statement and cost breakdown on the proposed Gamma I rectifier. Final action should be accomplished during the week of 18 March 1963.

2. It is requested that at the OSA level an audit of funds applicable to the Gamma I rectifier be made and a report be made to the contract monitor. The Itek contracting officer indicates that only (less fee) of the study funds were expended. After the fee is determined and applied, it is recommended that the remaining funds be transferred to the hardware part, T.O. #6. Itek estimates that the hardware item will cost approximately therefore, additional funds will be needed. It is desired to know rather precisely what remains and is applicable to T.O. #6 so that the remainder can be obtained.

3. It is requested that the stop order be lifted on T.O. # 6 immediately so that a continuation of procurement of long lead time items can be reinitiated.
