O.R.E. Notice No. 59

9 December 1948

SUBJECT: Disposal of coffee grounds

1. Complaints have been received from Public Buildings Administration that indiscriminate disposal of coffee grounds is clogging drains, particularly those of the water coolers. Approved disposal is by using the slop sink rooms.

2. Since there was difficulty in originally obtaining the privilege of bringing coffee making equipment into this building, this privilege should be protected. Please show consideration and do not abuse those advantages we have gained.
