

OSA - 1273-66

March 14, 1966

To: Contracting Officer  
Contract DKN-3667

Subject: Final Cost Statement

The Technical Report SP-905, required by subject contract was submitted by our letter of December 17, 1965. As stated in that letter, we believe that we have amply explored the requirements contemplated by the study, notwithstanding that the total final price is less than one-third of the original forecast. The results of the study are self explanatory and indicate the feasibility of making certain modifications to the A-12 or SR-71 airplane to meet the proposed requirement.

Enclosed is our total final cost statement and price proposal required by Part IX, Retroactive Price Redetermination After Completion. We propose that the final price be \$18,450.00 and request that you advise when we may meet to discuss this proposal with you.

Very truly yours,

*Hal*
