Subject: Invention Disclosures under Contract RS-8037

STATINTL

Dear [Redacted]

Receipt of your letter dated 29 April 1966 is acknowledged. It is noted that the Government will not file applications for patents on Invention Disclosures Nos. 5072-1 and 5062-1. As successors in title to [Redacted] the present corporation did not participate in any decisions regarding what patent action might be taken in regard to the subject disclosures. We would like to further investigate the potential patent protection that might be afforded for Invention Disclosure No. 5072-1.

STATINTL

Since no title has as yet passed to the Government under the Patent Rights Clause No. 16, Subparagraph (B), [Redacted] Inc. by this letter preserves its rights to file a patent application on Invention Disclosure No. 5072-1 should further investigation so dictate, and to release Invention Disclosure No. 5062-1 to the invention under the conditions set forth in your letter.

STATINTL

Accordingly, we are proceeding to take the foregoing action with regard to both disclosures on the basis of this understanding.

Very truly yours,

STATINTL
