ADM-6.2

OEL-622/64

23 JUN 1964

MEMORANDUM FOR: Director of Logistics

SUBJECT : Additional Funding

REFERENCE : OEL-480/64 dated 19 May 1964
ELR-258-64, Voucher 100,555-64

25X1A5a1

25X1A5a1

1. Reference requested that a contract be negotiated with [REDACTED] for a miniaturized VHF receiver together with two sets of drawings. Funding in the amount of [REDACTED] was encumbered for purposes of executing this contract.

25X1A5a1

2. Subsequent to the transmittal of referenced memorandum, this Office was advised that an additional [REDACTED] was required to consummate this task. The technical proposal received from [REDACTED] quoted a price of [REDACTED] as the unit price for the prescribed VHF receiver which included provision for two sets of reproducible engineering drawings. It was learned that this price applied to the purchase of receivers in increments of five and was not valid for the purchase of a single unit due to high initial tooling costs. Accordingly, the increase in funding set forth in requisition ELR-258-64, amendment 1, attached, provides for the higher price integral to the production of a single unit.

3. Based on the foregoing, it is requested that the contract with [REDACTED] be negotiated in the amount of [REDACTED] for the delivery of the single receiver, and further, that two sets of engineering drawings be obtained at a total price of [REDACTED]. Additionally, it is requested that this contract be time phased and that the second phase provide for the delivery of an additional four units at a unit price of [REDACTED] or a total of [REDACTED] to be funded from OEL's FY-65 allotment; subject, of course, to the acceptance of the pre-engineering model. The option to purchase the additional four units is to be valid for a period of 90 days from the effective date of the contract. Progress reports, together with cumulative financial statements, are to be prepared monthly for the review of the Project Officer.

4. Requisition ELR-258-64, amendment 1, attached, provides additional funding in the amount of [redacted] to consummate this task. Deliverable items under this task are to be one each of the VHF receiver together with two sets of engineering drawings. Engineering drawings will be delivered 30 days after the completion of the second phase should OEL elect to accept the 90 day option, or in the event the 90 day option is not accepted, 30 days from the date of delivery of the first preproduction model. All other provisions of reference with regard to establishment of this task supply.
