31 January 1966

Major John A. King, USAF  
Secretary, OAR Scientific Advisory Group  
Department of the Air Force  
Headquarters Office of Aerospace Research  
Washington, D. C., 20333

Dear Major King:

I have your letter of 19 January and the very interesting report on research by the Air Force Cambridge Research Laboratories. I found the latter very interesting, and AFCRL should be complimented on its publication.

I regret very much that I will not be with you on February 1 and 2, as official duties here in Washington demand that I be in town. Please extend my best wishes to all those present.

STATINTL

Sincerely yours.
