19 MAY 1966

MEMORANDUM FOR: Director, Office of Special Activities

SUBJECT: EAI Plotter Support

25X1A

25X1A

1. This memorandum is intended to record an understanding and agreement arrived at between Lt. Col. [redacted] of OSA and Mr. [redacted] of OSP on 6 May 1966.

25X1A

2. OSP is committed to help SOC in devising routines and setting up appropriate programs for the SOC mechanical plotter, an Electronic Associates Inc. device. Inasmuch as OSA has a background of experience in this and similar devices, Mr. [redacted] has asked for, and Lt. Col. [redacted] has agreed to provide, assistance to OSP in meeting the latter's commitment to SOC.

25X1A

25X1A

3. There are two problems, the more urgent is that of providing interim plotting routines to SOC in connection with the [redacted] program. OSA has agreed to furnish these routines, based on coordinate data to be supplied by OSP. OSP is committed to complete this work by about 1 July 1966.

4. The second problem is that of building up OSP skills in preparing such routines for mechanical plotters. In this connection, OSA has agreed to provide space, training and guidance for, at most, two people with skills in programming such plotters or similar devices (or people whose skills are such that they can be trained for this purpose).

5. Administratively, any such people will remain on the OSP staff but for some initial period, to be worked out later, will be directed and supported by OSA.
