MEMORANDUM FOR: [REDACTED] Action Staff/DDS&T

SUBJECT : Review of [REDACTED] Publication 25X1C
"Reconnaissance Satellites"
Part II - Military Implications

1. I have reviewed the publication at your request and have also discussed the security implications of the publication with [REDACTED] TSO/CIA. Certain assessments are readily apparent:

(a) Since we were given Copy No. 210, we must assume that at least that number of copies have been disseminated. This would preclude, under ordinary circumstances, our discreet and successful effort to have the paper recalled. 25X1C

(b) The author [REDACTED] holds no special clearances. He could be commended for the excellence of his research inasmuch as the entire paper is based on unclassified material, aerospace publications, and classified material not exceeding the Secret level. It should be further noted that the author refers to photographic satellite reconnaissance being done by the United States. It is a U.S. Governmental policy that any such reference must be in the TKH security control system. Since the publication under consideration is a [REDACTED] 25X1C publication, it follows that the TCO for [REDACTED] 25X1C should be apprised of the matter.

(c) Consideration should be given to requesting the [REDACTED] TCO to brief the author TKH. This will accord the required control over Subject and should preclude the publication of a Part III Reconnaissance Satellites Booklet at the Secret level. It is recommended we implement this course of action.
