DEPUTY "EXPOSES" CIA IN BRAZIL

[Following is a translation of an exclusive "expose" given in Brasil Urgente (Sao Paulo), 28 February 1964 issue, by Federal Deputy Joao Doria.]

CPYRGHT

"The accusation is an extremely serious one. National public opinion cannot go unnoticed and neither can it allow that no immediate steps be taken by the President of the Republic and the authorities of National Security. The accuser is a man of responsibility, a parliamentarian who deserves the respect of his country. He is Federal Deputy Joao Doria, of the PDC, from Bahia, who has done outstanding work in the CPI which investigated the criminal activities of IBAD and IPES. At present, he belongs to the CPI which is investigating the activities of foreign press agencies in Brazil. He is also a member of the FPN.

"The Hidden Hand

"Speaking exclusively to Brasil Urgente, Deputy Joao Doria said:

CPYRGHT

"The hidden hand which promoted the coup which overthrew Mossadeg in Iran; the tumults in Laos, in Vietnam, in the Congo, and in Algiers; those who financed the secret French army against de Gaulle; those who overthrew the reform presidents of Honduras and Santo Domingo to substitute for them gorrilla puppets of the United Fruit Company; those who assassinated President Kennedy in Dallas and shipped weapons along the coast of Venezuela, making it appear that the weapons came from Cuba; all this is precisely the same criminal hand which planned, financed, and executed the plans of IBAD in Brazil and continues to support, under different names, the same underground Nazi-Fascist organization which conspires against the security, independence, and development of the Brazilian people. The hand is the secret organization known as the CIA, which, since 1947, under President Truman, has centralized the intelligence and espionage services of the different military and civil departments of the US.'
