STATOM : Records Officer,

DATE: 15 September 1966

SUBJECT: Diebold Safe-T-Stak Files

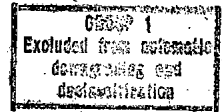

STAT 1. The  Services Division, Machine Section is using Subject Files on a test basis. After a six weeks trial, we have found that the first ten to twelve cards in the front of each drawer are nicked and must be re-produced before they can be machined.

2. The above condition is caused by the "Lip" type bevel at the front of each tray. The manufacturer should take steps to correct this condition.
