MEMORANDUM FOR: Director, National Security Agency

ATTENTION: Assistant Director, NSA for Production

SUBJECT: ELINT Collection and Analysis Committee

REFERENCE: Your Memorandum, Serial: N 1469, 26 October 1967, Same Subject

In reference memorandum you set forth a proposal that a new ELINT collection and analysis committee be established to consider "specific ELINT collection and analysis questions of high interest" and to exchange data on "special collection efforts and techniques, analysis methodology, division of effort, new data from all sources, and conclusions reached." In our view the establishment of such a committee would duplicate responsibilities currently assigned to existing USIB committees and other interagency mechanisms. We believe that current ELINT questions should be resolved within the context of the present structure, rather than by the creation of a new committee such as you propose.
