

26 July 1966

MEMORANDUM FOR: Deputy Director for Science and Technology

25X1A

1. has been bringing by drafts of the material he is generating for Earman for me to read. The most recent was a tutorial sort of thing on the world of SIGINT-ELINT, etc. In my comments back to him, I asked whether he had seen any real reason for COMOR to have a SIGINT Working Group and the USIB a SIGINT Committee, especially when the SIGINT Committee is chaired by a CIA guy and the SIGINT Working Group of COMOR is chaired by DIA?

25X1A

2. says that he really does not understand this, and can't find anyone that does. He observes, however, that the SIGINT Committee actually concerns itself most with COMINT whereas the Working Group is more ELINT oriented.

3. I think Hank would be willing to expand this area of his paper and put in some meaningful recommendations if you feel they would be appropriate, timely, and useful in the over-all requirements picture.
