1. Primary purpose of the meeting was to discuss the results of tests conducted to determine the feasibility of System XX, as presented by ██████████, ASD/OEL on 7 November 1966. ██████████ had reported that tests results were favorable and it was believed that detection objectives could be achieved in the operational model. He questioned whether operational requirements dictated production of the operational model or if it would be more advisable to produce two operational phototypes for further operational testing.

2. The consensus of the board members was that while an operational model is an urgent requirement, prototype
