

SECRET

EYES ONLY

my notes
(NOTED BY MR. WALFIELD 10/11/66)

DIARY NOTES

A-DD/S

30 September 1966

1. Col. White wants an updating of the old Logistics study on where in the metropolitan area our employees live. I asked [redacted] to write a memorandum to Logistics on this. There is no urgency and I gave them a 1 November deadline.

25X1A

2. [redacted] came in to discuss their relationships with DD/S and DD/S components. I explained to Art that DD/S support to his office should come through his support officer and, if necessary, through [redacted] Policy matters and other matters that cannot appropriately be handled in this manner should insofar as possible be directed to the Support Office concerned. However, if he was unsure, he could always direct it to the DD/S and we would make proper referral of it. I think Art had in mind that we should have one officer on your staff with whom he could deal on all matters having an impact on the Support Directorate. I expressed the view that this would only slow matters up and should be more of a last resort rather than a first action.

25X1A

3. WTTG came out to take pictures of the building, both inside and outside, today. They were turned away at the gate but then they went around to the back gate and took some pictures. Later they went to the BPR and set up their cameras again. A patrol car was sent to stop them, but before it got there, they packed up and left.

25X1A

[redacted]

5. I asked Howard Osborn to get all the information he could find on [redacted] since Mr. Helms had expressed an interest in this item.

25X1A

6. [redacted] is not looking for other employment, feels that 20 years in the Agency gave him more vested rights than are now being recognized, and appears to expect us to take care of him. Scott merely wanted to report the interview. He will get in touch with Logistics and will report back to us after he has all the facts.

I feel we owe [redacted] due consideration - such as advised as to our funding
