1. [redacted] was proposed as a replacement for [redacted] as Contracting Officer for OSA/DD/S&T. A question was raised as to [redacted] qualifications and I inquired of a number of people who affirmed to me his high qualifications and ability to handle this position. I advised Colonel White of my findings today and he concurred in the assignment [redacted] to this position. (George Meloon was advised of this decision.)

3. Director's Automobile: The status of the Director's automobile was raised by Colonel White who wanted to know why it was not ready. I checked with George Meloon and found that there was a slight dispute over the type of aerials to be put on the car for the communications unit. The technicians were going "all out" to the point where the exterior antennae would represent an unacceptable public display. I requested that Meloon see to it that excessive antennae were eliminated but to have an effective communications system installed. I was informed this afternoon that all has been resolved and the car should be available shortly. (The keys and registration were delivered to [redacted] on 24 August by [redacted])
