DIARY NOTES

DD/S

12 July 1966

1. Mercury Automobile--DD/I: [REDACTED] has indicated that he wishes to retain his Mercury automobile although it is old and economically unfeasible to repair. He has shown reluctance to accept a six-cylinder Plymouth or any other low-powered car as a substitute. He asked that repairs be made to the Mercury during his absence while on vacation. I telephoned [REDACTED] today to advise that we would not repair it as it was economically not feasible to do so, but that I would offer Jack an eight-cylinder Chevrolet which has recently come into our possession. I will await the DD/I's reaction when he returns.

2. Promotion of [REDACTED] A short time back I recommended for approval the promotion of [REDACTED] to GS-16. The memorandum was returned by the Executive Director-Comptroller with a note that this should be reconsidered about January 1967. Today I inquired as to the reason and was advised that it was the wish of the DCI that this action be deferred to this time with no prejudices to the recommendation for promotion.

3. [REDACTED] The proposal to reemploy subject on a reserve appointment in the Retiree Placement Service was questioned by the Executive Director. After some discussion it was agreed we would sit tight on this case pending further developments. It appears that [REDACTED] has a tentative offer of employment on the outside and we will simply wait to see how this develops. Interest in employing [REDACTED] in this position in the Office of Personnel is on the "minus" side.
