

~~SECRET~~III. DD/S&T

Based on total PSD FY 1967 costs, the DD/S&T counted for only 3 percent ^{25X1} of PSD's workload but some 10 percent of total impressions (17 million).

OSI is the chief user of PSD's services, its requirements representing 75% of total DD/S&T printing requirements. OSI requirements include Scientific and Technical Reports (STIR) which average 3 per month, and the SECRET version of the Scientific Intelligence Digest (monthly) printed in the Main Plant; Scientific Intelligence Digest ("A" version which is released to selected foreign intelligence services monthly), Weekly Surveyor (SECRET), and about 6 STIRS per year printed in the Ground Floor Plant; and the Weekly Surveyor, Monthly Index of Scientific and Technical Publications, Daily Surveyor, monthly Scientific Intelligence Digest (SI and TK versions), and about 36 STIRS a year at the Special Printing Plant. OSI anticipates no increase in its recurring printing requirements over the next five years.

FMSAC has 2 recurring requirements: STIRS and the Missile/Space Event Report. The STIRS average 30 reports annually; no increase in this number is estimated through FY 1970. The Missile/Space Event Reports are printed in the Special Printing Plant and total about 125 annually.

~~SECRET~~

~~SECRET~~

Although this number is expected to remain the same, a twenty percent increase is expected in the number of pages as of FY 1970. These reports now average about eighteen pages in length.

OEL Elint Information Reports are low in volume and this series of reports as well as SIGINT Highlights and SIGINT Techniques Reports are expected to remain at about the same level through 1970.
