

11 August 1966

Dear Jim,

This letter confirms our telecall of 9 August 1966 and authorizes you "go-ahead" with the purchase of one (1) each System Control Logic in accordance with EMR System Performance Spec 1940-SPS-1 "Vehicle Subsystem", dated 18 December 1964 as revised. This procurement would be against Contract No. FH-7322.

Request you furnish a firm price quote and delivery schedule within 60 days. Prior to negotiation we should agree as to the manner in which we will use a pricing formula.

Yours truly,

Chuck W.

SUBJECT: Procurement of One (1) Each System Control
Logic (SCL) - Contract FH-7322

Dear Chuck,

Reference is made to our previous intra-Air Force discussions and to those discussions with the contractor regarding this subject. We request that you authorize the contractor to procure and deliver one (1) each additional System Control Logic, in accordance with EMR System Performance Specification 1940-SPS-1, "Vehicle Subsystem", dated 18 December 1964 as revised, for our program. Upon delivery, this SCL should be shipped to the Project Support Office unless otherwise directed in the meantime. [redacted] has budgeted for this additional buy under the production contract. We recommend that you obtain a firm price quotation and delivery schedule because the estimated price and delivery schedule noted on the attachment, given to us by the contractor, is only budgetary in nature. Firm price and delivery schedule of this additional item will be as negotiated by you and the SPO.

STATINTL

Sincerely,

George
