STATINTL

Subject: ECP 1940-6, Contract FH-7322

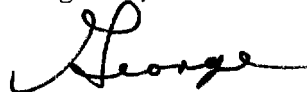

Dear Chuck,

After considerable review, we have decided that this ECP should be approved. The computer involved is an integral part of the EMR OPS AGE, a peculiar and very complex piece of checkout equipment. The computer's only use is for testing of the EMR. Because of this, we feel this computer does not fall within SAC's responsibility for support and that it is our obligation to provide necessary training.

STATINTL

Recommend you provide with formal approval to proceed with this change. We cannot provide an exact date for the course at this time. However, it appears that somewhere in the January - March 1967 period is reasonable.

Regards,

George
