

5 September 1967

MEMORANDUM FOR THE RECORD

1. Mr. Walter Pfortzheimer, Chief, Historic Intelligence Collection [redacted] phoned me at 9:45 this morning to inquire about a procedure he could use to send a "very sensitive" OSS document to a "certain Presidential Library".

STAT

2. I reminded him that:

a. All transmittals of Agency documents went to National Archives through the CIA Records Administration Officer.

b. All OSS documents were removed from National Archives several years ago and were now in the Agency Archives and Records Center.

3. Mr. Pfortzheimer explained that this old OSS Document was addressed to a President and this "citizen" wanted to send it to the Presidential Library. Walter felt it might be handled directly with Mr. Herman Kahn in charge of those libraries, or perhaps should be sent to the President concerned.

4. I suggested that he certainly should contact the Office of Security before an Agency employee took any such action. I recommended that he call [redacted] Chief, Employee Activities Branch or Mr. Osborn, Director of Security.

STAT

5. I also said our OSS Archives might be benefited to receive this document or at least a copy of it. Also, if it had a special code word or project classification or restriction, it was quite possible that Mr. Kahn's high^{ly}cleared personnel did not have that particular clearance. He might check with United States Archivist Dr. Bahmer on that. I again suggested he check with Security on the matter.

[redacted]

CIA Records Administration Officer
