Red Subversion Campaign Told

COMMUNIST youth in Latin America, directed from Cuba, are planning a stepped-up campaign of subversion and infiltration, claims the exiled Committee of Youth Organizations (COJCE).

Intensification of guerrilla and terrorist activities in Latin America and particularly in the Caribbean can be expected in the coming months, the group claimed.

Venezuela and the Dominican Republic will be the immediate targets of the new campaign, according to COJCE.

The exile youth group said preparations for the new campaign are being made in Cuba in meetings between Castro government officials and Communist youth leaders.
