

7 December 1964

MEMORANDUM FOR THE RECORD

On 2 December four people from NSA visited the Biographic Register, Special Register and Foreign Installations Branch of OCR. This was a follow up to a meeting which we had had at NSA on the subject of biographic intelligence during November. In Biographic Register, where they spent most of their time, they were briefed on the various collateral sources which the registry has in file and apparently were impressed at the variety and scope, which somewhat more than they had imaged. In the discussions which followed, the NSA representatives inquired as to how they might tap the Biographic Registry for information and they were consulted that the best channel would be to call in Special Register on the gray line who would forward the request.
