MEMORANDUM FOR: Assistant Deputy Director for Intelligence

SUBJECT : Summary of IAS Workload - August 1970

157 28
44000
314
1260

1. This report summarizes the current work of the Imagery Analysis Service. At the end of August the Service had [redacted] This included

25X1

[redacted] assistants for a total of [redacted] personnel contributing directly to imagery analysis and reporting, plus [redacted] personnel performing management and support functions. The time of nine imagery analysts on PCS assignment to DDP is not included in this summary.

25X1

25X1

25X1

2. Our workload is described in the attached four tables. Table 1 compares the time expended by all personnel in August with similar data for the preceding five months. It also compares the workload on hand for the next three months, on imagery analysis and reporting only, with similar data for the preceding five months. Table 2-4 show time expended and workload on hand for imagery analysis and reporting only according to geographic area, subject, and requester respectively.

3. New imagery received by IAS during August included one KH-4. (Parts 1 & 2), [redacted] Part 1), and one GS mission. The analysis of one KH mission continued into September. The Service expended approximately 3400 manhours in August on preliminary assessment and assimilation of these materials. This activity is included in the tables.

25X1

4. The Middle East crisis required a considerable increase in time. As reflected in the accompanying tables, 2400 manhours were expended on this effort, of which 600 were overtime. A considerable reduction in the time spent on the USSR accompanied this change.
