MIS MASTER FILE PURGE CYCLE

NOTE: Given a "Purge Date" of 30 June 1969 - all Projects with completion dates before 1 July 1969 - will be purged from the MIS Master File.

The magnetic tapes created as a result of this run - will be used as indicated in the accompanying flow chart - and retained for at least 3 months - or longer if SIS requests...

PHASE I

The MIS Master File is fed into the MIS Master File Date Purge Program along with the date parameter card input. In accordance with the decision logic shown in attachment 1, the program produces two files- one, a New MIS Master File, the other, a file of those records purged from the original MIS Master File. The New MIS Master File goes on as input to PHASE II. The file of purged records is saved for possible later use.

PHASE II

The New MIS Master File is fed into the MIS UPDATE CYCLE, with the only transaction against it being a "Leave project" time card with an illegal transaction code. Thus it is insured that the entire New MIS Master File will pass through the update, producing the MIS Reports Listing (Reports 1-13) with the statistics for all the information now present on the New MIS Master File. None of the data that was present as input to this UPDATE will have been disrupted since the only transaction against the file will have been rejected by the Time Card Edit routine during the course of the update.

DECISION TABLE FOR LOGIC OF MIS MASTER FILE DATE PURGE PROGRAM

Does the Project A record have a status of "closed"?	N	Y	Y	Y	Y	Y	Y
Is there a "complete Date" in the A record ?	-	Y	Y	N	N	N	N
Is the "complete Date" of the A record later than that of the date on the date parameter card?	-	Y	N	-	-	-	-
Is there a C record corresponding to the Responsible Component of this project?	-	-	-	N	Y	Y	Y
Is there a "complete Date" in this C record?	-	-	-	-	N	Y	Y
Is this C record's "complete Date" later than the date on the date parameter card?	-	-	-	-	-	N	Y
Write A record and all associated B,C,D, and E records to New MIS Master File.	X	X					X
Write A record and all associated B,C,D, and E records to Purged Records File.			X	X	X	X	
Get next project A record and start process again.	X	X	X	X	X	X	X
