Roger Hilsman, Assistant Secretary for Far Eastern Affairs: 'Crises Take a Little Longer'

# Decisions...Decisions...

By Robert R. Brunn

Staff Correspondent of The Christian Science Monitor

**CPYRGHT** 

**CPYRGHT** 

#### Washington

ALKING INTO ROGER HILSMAN'S office in the State Department my first reaction was that he has a thrust of jaw which bespeaks action. A correct impression. This newly appointed Assistant Secretary of State for Far Eastern Affairs led 300 men as an OSS guerrilla leader in Burma in World War II, in warfare that required quick intelligence and a tough body.

Both qualities are sanitized No Approved For Release policy battle in the Hilsman corner of "State" where he still deals with Burma, and even more so at the moment with South

What else takes up your day?

Other parts of your day, after you have met these initia problems: The Ambassador from the Philippines might have ar appointment with you to raise a problem of trade and the tarif barriers. You might have a meeting with the Ambassador of Thailand, who might come in on a problem in connection with SEATO. You might call in one of the ambassadors to make demarche to him about some problem dealing with his country. CoA-RDRig5-00001 RQQQ30028QQ37H5. You have t defend or help defend the request for foreign aid. You have to defend your own budget for your Far East missions abroad Vietnam, Laos, and Thalland.

But we ignored policy in our talk. This interview tries to tions Committee Subcommittee on Far Eastern Affairs. For sketch in Mr. Hilsman's Sanitized Approved For Release: CIAIRDRA 5.00001R000360280037 15 stifying about

### I assume you don't exactly work a 35-hour week?

Well, I get to the office about 8 in the morning, or 8:15. I rarely get home before 8 or 9 at night. This is normal times, not crisis times. Saturdays are just like any other day. And Sundays I generally have to take some stuff home to work on, if I don't have to come to the office — which I frequently do.

As a matter of fact, in my old job as director of the Department of Intelligence and Research, I remember on Sunday, Oct. 14, was the day that the U-2's were flying over Cuba and found the missiles. I had that day at home. I didn't have another day off, including Thanksgiving or Christmas.

#### Or Sundays?

Or Sundays, until Christmas Day. In other words, from Oct. 14 through Christmas Day, I worked at least 8 and usually 12 or 14 hours every day, all the time. That is a crisis period.

#### Well, what is your normal regimen?

In the normal time, the first thing you do when you arrive at the office you are given a whole sheaf of cables that have come in overnight from all the posts in your area abroad. You have got to read these for your own information to see how events

There are decisions to be made, questions to be answered, problems to be settled in every cable. Generally speaking, the officers in charge of Laos, Vietnam, the Philippines, Japan, and so forth consult with you about specific problems.

Many of these you can decide yourself, and you can issue instructions to the field and get a cable off to your ambassador and tell him how to handle the problem, or you might be calling the Pentagon or the AID agency to ask them to do something to meet this particular problem, orchestrating the different instrumentalities of foreign policy.

### When do you go to Secretary Rusk with problems?

Other problems require the decision by the Secetary of State, and you write him a brief memorandum or seek an appointment with him, or call him on the telephone, presenting in brief, concise form the nature of the problem and your recommendations for handling it and get his decision, when you can.

Some of it requires a decision by the President, You might have a meeting with the President, in which case you would have YROHan appointment with the President along with the Secretary of State or the Secretary of Defense.

It might be a joint meeting, an NSC [National Security Council] meeting, on a problem in your area.

## Making policy can be quite complex, can't it?

Yes, powerful though the United States is, it is not so powerful that it can dictate the course of history. There are other actors involved, and what they do has a bearing on events. Some things happen that nobody has any control of, spontaneous things. There is a crop failure in a country, or a man is shot, or there is an airplane crash. One of the great tragedies, for example, in the Philippines was the premature passing of Magsaysay.

You're not always in a position where your leverage on events is complete, and also you're dealing with very complicated matters where the United States may have several goals, not all of which it can achieve. If it wants to achieve goal Number A, it may be done only by sacrificing something of goal Number B You have to pick and choose which of the goals, and to which extent, you want to achieve — different and conflicting goals, you see.

Some of our goals are conflicting. You know, a very simple ne is you want peace, but you don't want it at the cost of scrificing our nation. So there are times when you can't have toth, you see. You have got to give up the goal of peace in order to achieve the goal of the continuing existence of our nation or the continuing of our national security or our national pojectives. This is a very simple illustration of what happens all the time.

But this makes it diffic Sanitized to Approved For Release ec 194 RDP75 i 0000 troubled for Separation of Church and Other Americans United for Separation of Church attle more complicated than in football where you win or lose.

You might have a meeting with the Senate Foreign Re recent events in Vietnam. The Senate wanted to hear what had been happening there, what we were doing about it, what our

I find that you also have dealings with American businessmen who have interests abroad, who have problems and need he p. You're doing this all day.

Frequently I come to my office at 8, finish with the init al batch of cables at 9, and between Congress and foreign ambas sadors and meetings with the Secretary and the President, there are days when I don't get back to my desk until 6, and then must begin the normal routine, less-than-urgent, less-than-crisis work of the day. That is one of the reasons you don't get home

## How does your family fit into this marathon day?

The interesting part on the family side is that it's perfectly true that your family makes some enormous sacrifices. I remember once my wife, after a year of the new administration, read somewhere that somebody was saying the President had asked us

## Meet Mr. Hilsman

not what the country could do for us but what we could to for the country. My wife snorted, and said, "Well, I know what I'm being asked to do for my country."

Because it's not only that she has to do all the things that a husband would normally do around the house if you were on there -- learning to be an electrician and a plumber and all the rest of this. As well as dealings with the children in ways that the father would normally be involved in - but she has responsibilities of entertaining foreign visitors coming from our area, of participating in various activities connected with the area. She is expected to help on, for example, women's problems or children's problems in the Far Eastern countries and to what she can to help. So she leads an enormously busy life to

But the really interesting thing about it all is that my chi dren, even my 6-year old, and my 12-year old girls and my 14-year old boy, have a feeling of serving their country in their own way.

### You've mentioned the secretaries and your staff and what a fine, loyal crowd they are. What about them?

You know it's not really surprising that the senior officers of the department are spending 12-18 hours a day without conplaint, because they have a feeling of participating in great events and you just don't complain when your country asks you to serv

But the thing that impresses me are the secretaries and the girls who probably don't have the same feeling of being in on the decision-making process. But yet the way they work without overtime pay-frequently 60-70 hours a week without overtime pay and without complaint. I think they really deserve an enor

#### You're a newcomer to the department of course. This performance was actually a surprise?

I'm terribly impressed, as not reallly being part of the foreign service, not a career fellow, not a foreign service officer but presidential appointee, at the dedication and the hard work  $\phi$ f

Also, I have gone to places like Vientiane, which is a sma place, in a backward part of the world and watched the wiv and children of foreign service officers coping with problems no electricity or running water or anything else we have her The wives of the foreign service officers in Vientiane, for exampl have had to ban together and teach their own children and built a school of their own, you see, with the wives being the teacher They are making enormous sacrifices.

Next Week: Meet Dr. Glenn Archer, lawyer and and Other Americans United for Separation of Church and State.

## BUSINESS and FINANCE

## Ottawa Dilutes Sales Tax

Canadian Finance Minister Valter Gordon has knocked a 115 million hole in his June 3 budget with a major retreat rom its controversial sales tax n building materials and prouction machinery.
In a statement in the House

Commons Monday night hat brought opposition jeers f "chicken," Mr. Gordon waered down the 11 percent tax o an immediate 4 percent. He aid it would increase in two tages to 11 percent by Jan. 1,

#### Tax Withdrawn

He also exempted schools nd universities completely rom the tax on building materials and opened a big loop-tole in his original plan to bush foreign-controlled com-panies into selling a minimum 5 percent ownership to Cana-

NE WALL STREET, NEW YORK \$

slash executed by the freshman Finance Minister on his maiden budget speech. On June 19, he lopped off the budget's plan for a 30 percent tax on large stock sales to foreign investors, aimed at halting United States take-overs of Canadian firms.

Mr. Gordon made both alterations under heavy pressure and a deluge of complaints nize with the needs of the from legislators and the busi- economy over a longer period." ness community. Observers could recall no previous federal budget being so widely changed by the government.

The minister indicated these and other changes would increase the deficit for the 1963-64 fiscal year to \$655 million, only \$54 million less than the last year of Conservative government. Mr. Gordon's original forecast was a deficit of \$585 million.

Mr. Gordon outlined this alteration in his original budget scheme of tax incentives and penalties to encourage a mini-mum 25 percent Canadian ownership in foreign-controlled corporations:

A company's status will be determined by th eownership of its shares during the 60 days preceding the company's tax vear.

Also, a company can meet the minimum 25 percent Cana-dian standard if its shares are listed on a Canadian stock exchange and not more than 75 percent of its voting stock is owned by a foreign shareholder and others associated with

#### Demands Voiced

Presumably this will mean that the other 25 percent of the shares can be owned by anyone, including foreign investors not connected with the parent firm. But the requirement that the Canadian subsidiary's stock be traded on a Canadian stock exchange would provide the opportunity for partial Canadian ownership.

In announcing the changes,

that theer had been a deluge of demands for the govern-ment to withdraw the sales tax on building materials and production machinery.

He said the government "cannot accept such pleas to eliminate the tax" but that its timing "can be adjusted in a way that will synchro-

He said the tax will rise to 8 percent on April 1, 1964, and to the full 11 percent at the end of that year. Those who have already paid the full 11 percent rate since the tax was effected June 13 will receive refunds, he said.

### Economic Outlook For '63 'Moderate'

By the Associated Press

New York The Federal Reserve Bank of New York says that early returns for June suggest con-tinued though moderate

strength in the economy.

The bank's Monthly Review indicated a substantial rise in auto assemblies in June and a decline in steel

ingot production.
"Although manufacturers' inventory expectations point to some slowdown in their over-all rate of stock accumulation in the third quarter this slackening may be offset by increases in outlays for plant and equipment," the bank said.
"Various measures have

been suggested to deal di-rectly with the problems created by a large influx of teen-agers. An increase in the skills and training of the labor force will in itself contribute to economic growth but in turn an expanding economy is required if direct measures are to be effective."

## Contract for Export

## Australian Iron

stralia-New Zealand Correspondent of The Christian Science Monitor

Sydney

Australian and American mining companies are scheduled soon to sign the first federal Bureau of Mins major export contract for iron sources, for one, had be ote from western Australia. Vast new deposits have been d scovered in the area since

The contract covers more than 5,000,000 tons of ore from e Tallering Range, 100 miles om the western port of the Ta

eraldton.

Japanese steel mills which have been negotiating the conact were reported to have proposed a price of \$12.6 per on on a cost and freight basis. This was 30 cents below the price asked by the Australianmerican partners, which inudes the Australian Western lining Corporation and Homes ake Mining and Hanna Mining corporations of the United States.

Competition Seen

Western Mining holds 50 ercent of the group interest nd the American companies percent. The group stands gain around \$60,000,000 on the Tallering Range contract with exports spread over a ven-year period.

The paring of 30 cents a ton from the price of Tallering ore by the Japanese negotiators reflected the sharply competitive state of the international on-ore market.

There has been much critism lately of the federal govrnment's policy in not lifting efore 1960 its iron-ore export an, introduced in 1938, to conrve Australia's then known on one reserves.

Delays Charged

Continuance of this ban, it argued, discouraged pros-ecting and delayed the certain put capital into this in iscovery of new important de-

coveries would have o light much sooner, criti-

tend.
