President Fails to Fool Public with Cuban Story

Have the American citizens been hoodwinked again by the President of the United States? He who so gallantly had the courage, audacity, and gall to get before the cameras, radio networks and tell the people of the greatest country on earth that Russian infiltration (invasion) at our doorsteps (90 miles) from the state of Florida to Cuba is no grave concern to us on the Western Hemisphere.

Who does he think he is fooling? Not the American people I'm sure for we are not that ignorant, naive, or stupid. Maybe the President looked cool, calm, and collected from being prompted by his brother-in-law who is a great actor. We don't need actors in the executive office but statesmen who consider our economic, political, social and religious rights, heritage of every American and free loving countries of the world. The Monroe Doctrine should be enforced at all costs!

If our C.I.A. State Department, military intelligence have provided information to the President that Russian build-up in Cuba is no threat to this hemisphere, it is high time that a clean-out of these departments be done, because they certainly aren't advising the President the whole facts. But it seems evident that the Communist infiltration over the years in these departments has been successful. Look around us here at home and abroad—recession, hysteria and increase in

national debt—our losses, unbalance of payments, loss of gold, etc., our defeats, our friends of the past are our enemies. The free world we dreamed of—Independent free nation, free trade, after World War II is conquered by the Russian bear and its tactics. Seventy-five per cent of the world is in its grip.

Mr. President, you know better but please tell the people the truth, how you are tied down by your inter-council advisers who are playing the United States for world stakes. Shed yourself from them and project yourself as the greatest statesman of the world embodying sovereignty, integrity, and the road of Christianity.
