CONFIDENTIAL

CIA SENIOR SEMINAR

Block III: THE INTELLIGENCE BUSINESS IN CIA

The content of Block III is designed to provide an overview of the Agency's intelligence missions and a detailed examination of selected activities. Senior officers and panels will examine specific issues relating to their areas of responsibility. Various developments pertaining to the gathering of intelligence will be analyzed to describe and interpret the role of intelligence in influencing policy decisions.

25X1

MONDAY, 3 APRIL

0830) - Introduction to Block III

[REDACTED]
Senior Seminar Staff

0900) - Foreign Intelligence Operations
1100)

[REDACTED]
Chief, Foreign
Intelligence Staff

The speaker will discuss the foreign intelligence mission of the Clandestine Service, the role of the agent source in intelligence collection, likely changes in collection priorities, e.g., economic information, and problems of coordinating agent operations among U.S. agencies.

25X1

1300) - The Agency Planning, Programming
1600) - and Budgeting System
(Room 6E-0708, Headquarters)

Charles A. Briggs,
Director, Office of
Planning, Programming
and Budgeting

The speaker will examine the Planning, Programming and Budgeting concept employed by the Agency in comparison with the PPB systems employed by other agencies of Government. Advantages and problems inherent in the PPB system when used in an intelligence organization will be described.

CONFIDENTIAL

TUESDAY, 4 APRIL

0830)
0915) - Individual Presentation

25X1

0930)
1130) - Counterintelligence Activities

Chief of Operations,
Counterintelligence
Staff

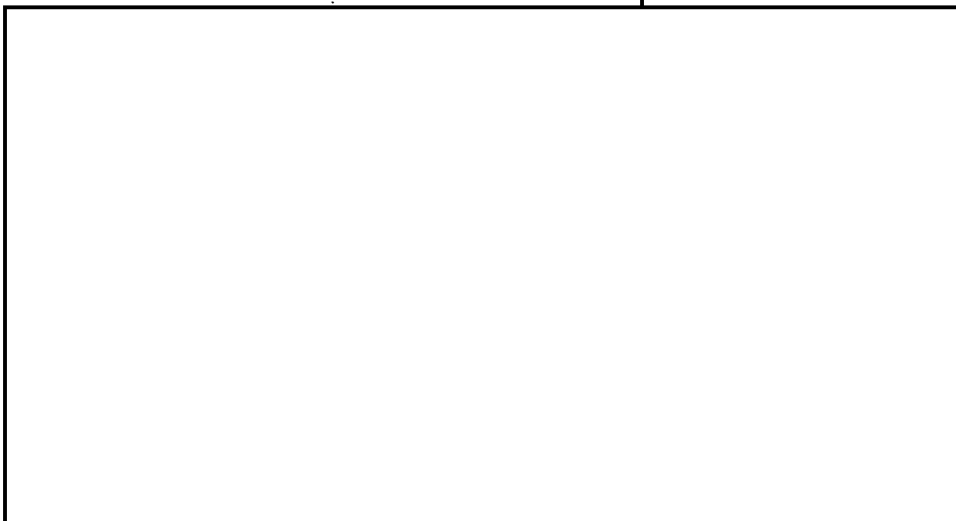

A ranking member of the CI Staff will review the CIA mission of the Agency with particular emphasis on its role as the central repository, principal collector and processor of CI information. He will examine the relationship of CI to other Clandestine Service disciplines, political decisions at the national level, and coordination with other agencies of the Intelligence Community. Various operations will be described to illustrate CI as a component of these operations, to highlight the significance of intelligence about foreign security services as an element of operational planning and execution, and the role of such operations regarding the penetration, manipulation and repression of opposition intelligence services.

25X1

1400)
1600) - Station Operations

25X1

CONFIDENTIAL

- 3 -

WEDNESDAY, 5 APRIL

0830) - Depart Chamber of Commerce Building for
Technical Services Division Laboratory

0930) - Briefing and Tour
1230) -

1230) - Lunch at Technical Services
1330) - Division Laboratory

25X1

25X1

1400) - Depart for Chamber of Commerce Building

1500) -
1645) - SIGINT Activities of the
Clandestine Service

The presentation will review how the
Clandestine Service conducts a variety
of covert SIGINT activities and examine
the relationship of these activities to
those of other Directorates and other
government agencies, particularly NSA.

25X1

THURSDAY, 6 APRIL

0900) -
1015) -

CONFIDENTIAL

CONFIDENTIAL

- 4 -

THURSDAY, 6 APRIL (Contd.)

1030) - A Discussion With the Deputy Thomas H. Karamessines,
1200) Director for Plans Deputy Director for
Plans 25X1

1400) - Communications Role in
1600) Operations Director of
Communications

A top-level manager with broad experience will brief on the size and scope of our world-wide communications system and different types of communications support, including staff and operational communications. He will also cover communications R&D and look ahead at the impact of future developments in Agency communications, including technical advances and inter-agency developments.

FRIDAY, 7 APRIL

0830) - Seminar Discussion
1000)

1015) - Medical Problems in CIA John R. Tietjen,
1200) Director of Medical
Services

The speaker will discuss characteristics of health and disease among Agency employees, including problems of behavior, as well as relevant social and occupational factors.

25X1

FRIDAY, 7 APRIL (Contd.)

1400)
1600) - Logistical Support in
Southeast Asia

[REDACTED]
Deputy Director of
Logistics

The speaker will depict the Agency's logistics system, using the logistical support of paramilitary operations in Southeast Asia, notably the procurement and delivery of supplies, as a case illustration.

25X1

[REDACTED]
covered. He will also review the management of the Agency's physical plant, equipment and resources, stressing the distinction between the functions of CIA and GSA, and will examine the Agency's contracting program.

MONDAY, 10 APRIL

0900)
1100) - Significant Security
Developments

Howard J. Osborn,
Director of Security

A senior security officer will discuss how the Agency security system has evolved in recent years to provide Agency employees with greater personal assistance and to gain a broader understanding of mutual security responsibilities. He will cover significant security threats to CIA, with particular reference to the technical field. The presentation will also examine the methods used by Security to pursue security leaks such as the Pentagon Papers and the Jack Anderson revelations.

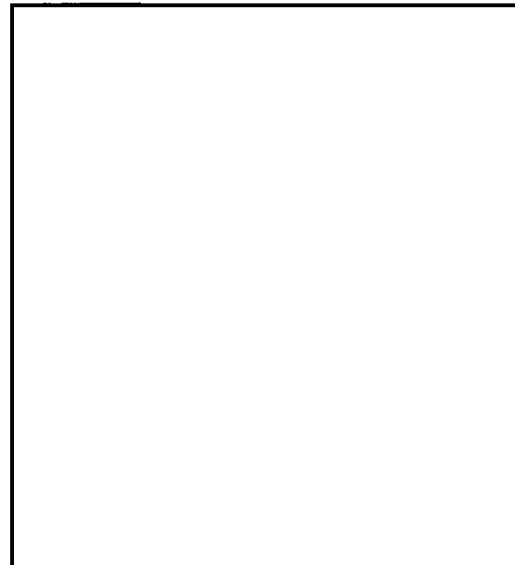

CONFIDENTIAL

25X1

MONDAY, 10 APRIL (Contd.)

1400) - Intelligence Production Panel
1600)

Panel:

A group of senior officers from three DDI production offices will discuss the functions and responsibilities of their components. The focus will be on current intelligence -- political, economic, and military. The panel members will discuss the priorities of their work, how current intelligence fits into the larger picture, and what use they make of various source materials. The panel will also examine the relationship between the policy-maker and the intelligence producer and comment on the question of production undertaken in response to outside requests vis-a-vis Agency-initiated work.

- 7 -

TUESDAY, 11 APRIL

0830)
1200) - Technical Intelligence Collection
Systems
(Room 6B-00, Headquarters)

0830)
0900) - The Organizational
Structure

Harold L. Brownman,
Director of Special
Projects 25X1

0900)
1000) - Office of Special
Activities

Deputy Director of
Special Activities

1015)
1200) - Office of Special
Projects

Mr. Brownman

The speakers will discuss current and planned technical intelligence collection systems; their contribution towards filling gaps in our intelligence knowledge; and the impact of these systems on the intelligence product, management, and the policy maker.

1400)
1600) - Technical Analysis

David Brandwein,
Director, Foreign
Missile and Space
Analysis Center

A top missile intelligence specialist will discuss the ways in which the analyst takes raw data in the form of telemetry, imagery, radar tracking data and other information, and uses them to build up a picture of the capabilities and performance characteristics of strategic weapons systems. Examples will be given of actual cases involving current Soviet weapons programs.

- 8 -

WEDNESDAY, 12 APRIL

0830) - Applied Research and Robert M. Chapman,
0920) Development Director of Research
and Development

The speaker will describe the relationship of intelligence requirements to Agency R&D, budgetary factors which influence planning, examples of developmental activity, and their application to intelligence collection.

0930) - Coordination of Research and Donald H. Steininger,
1100) Development in CIA Assistant Deputy
Director for Science
and Technology

The speaker will provide orientation on various types of R&D performed by the Agency, discuss the role of contractors in support of this effort, and describe coordination of R&D activity in the Agency and in the Intelligence Community.

25X1

1200) - Depart for
National Photographic Interpretation
Center

1300) - Briefing and Tour Arthur C. Lundahl,
1600) Director, National
Photographic
Interpretation Center

The "Father of Modern Photo Interpretation" will discuss NPIC's mission, charter, functions, and relationship with other members of the Intelligence Community, techniques of interpreting overhead photography, and support to photo collection systems. Following the briefing, there will be a tour of the photographic laboratory, examination and explanation of various mensuration devices, and a demonstration of the integrated information system.

1600) - Depart for Chamber of Commerce Building

CONFIDENTIAL

THURSDAY, 13 APRIL

0830) - Individual Presentation
0915)

0930) - Agency ELINT Operations
1045)

John N. McMahon,
Director of ELINT

The speaker will discuss the work of the Office of ELINT in DDS&T, its ground station and airborne collection capabilities, third party relationships, collaboration with NSA, and support to other Agency operations.

1100) - Seminar Discussion
1200)

1400) - Intelligence and Arms Control
1600)

Panel:

25X1

CONFIDENTIAL

THURSDAY, 13 APRIL (Contd.)

A CIA panel will discuss the role of intelligence during the preparation phase for arms control talks, in the negotiating phase, and its prospective role after a treaty is in force. Panel members will touch on CIA inputs to study efforts at the working level, participation in NSC and Verification Panel policy-making discussions, the role of CIA representatives and arms control negotiators, and the technical problems in monitoring an arms control agreement.

FRIDAY, 14 APRIL

0830) - Individual Presentation
0915)

0930) - A Discussion With the Deputy Carl E. Duckett,
1130) - Director for Science and Deputy Director for
Technology Science and Technology

Our top officer in the technical intelligence field will apply his extensive experience to provide perspective on the role which science and technology play in the intelligence process.

25X1

1300) - Estimative Intelligence
1500)

Deputy Director of
National Estimates

The speaker will discuss the process of producing national intelligence estimates which represent the most forward looking intelligence input into the formulation of U.S. national security policy. Major steps required to produce a national estimate will be covered. The changing character and scope of national estimates in recent years will also receive attention.
